SAFE HARBOR

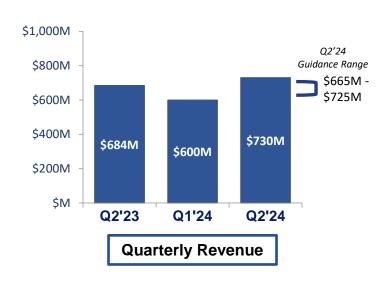

This presentation contains forward-looking statements including statements regarding Teradyne's future business prospects, financial performance or position and results of operations. You can identify forward-looking statements by their use of forward-looking words such as "anticipate," "expect," "plan," "could," "may," "will," "believe," "estimate," "goal" or other comparable terms. Forward-looking statements in this presentation address various matters, including statements regarding Teradyne's financial guidance, future business prospects, results of operations, market size and conditions, earnings per share, mid-term earnings model, sales mix, customer product development, customer demand and sales expectations, the payment of a quarterly dividend, and the repurchase of Teradyne common stock pursuant to a share repurchase program. Investors are cautioned that such forwardlooking statements involve risks and uncertainties that could cause actual results to differ materially from the forward-looking statements due to known and unknown risks, uncertainties, assumptions, and other factors. Such factors include, but are not limited to, macroeconomic factors and slowdowns or downturns in economic conditions generally and in the markets in which Teradyne operates; decreased or delayed product demand from one or more significant customers; a slowdown or inability in the development, delivery and acceptance of new products; the ability to grow the Robotics business; the impact of increased research and development spending; the impact of epidemics or pandemics such as COVID-19; the impact of a supply shortage on our supply chain and contract manufacturers; the consummation and success of any mergers or acquisitions; unexpected cash needs; the business judgment of the board of directors that a declaration of a dividend or the repurchase of common stock is not in Teradyne's best interests; changes to U.S. or global tax regulations or guidance; the impact of any tariffs or export controls imposed by the U.S. or China; the impact of U.S. Department of Commerce or other government agency regulations relating to Huawei, HiSilicon and other customers or potential customers; the impact of U.S. Department of Commerce export control regulations for certain U.S. products and technology sold to military end users or for military end-use in China; the impact of the Israel-Hamas conflict; the impact of regulations published by the U.S. Department of Commerce relating to semiconductors and semiconductor manufacturing equipment destined for certain end uses in China; and the impact of trade regulations and restrictions that impact our ability to manufacture certain products to and support certain customers. The risks included above are not exhaustive. For a more detailed description of the risk factors associated with Teradyne, please refer to Teradyne's Annual Report on Form 10-K for the fiscal year ended December 31, 2023. Many of these factors are macroeconomic in nature and are, therefore, beyond Teradyne's control. We caution readers not to place undue reliance on any forward-looking statements included in this presentation which speak only as of the date of this presentation. Teradyne specifically disclaims any obligation to update any forward-looking information contained in this presentation or with respect to the announcements described herein.

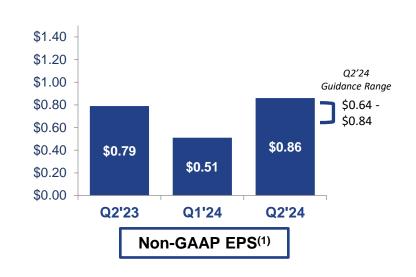

Q2'24 Summary

Sales of \$730M | Gross Margin of 58.3% | Non-GAAP EPS of \$0.86 | Above High Guidance

- Semi Test strength in Compute,
 Mobile and Memory drove upside
- Robotics executed to plan and grew 26% YoY

- Gross Margin up from Q1'24 and improved from guidance
- Favorable volume and product mix were the main drivers

- Non-GAAP EPS of \$0.86
- Repurchased 0.1 million shares / \$8 million, \$104.45 /share average

Q2'24 Summary and Full Year Outlook

Q2 Summary

Q2'24 sales of \$730M and earnings (non-GAAP EPS of \$0.86) were above the high end of the guidance range

- Semi Test strength in Compute, Mobile and Memory drove upside
- In Universal Robots, OEM channel grew 67% YoY and was over 30% of UR revenue in Q2
- Gross margin strength in volume and product mix

2024 Outlook

SOC TAM unchanged at \$3.6-\$4.2B

 Compute TAM estimated at \$1.6B vs \$1.5B prior estimate (at midpoint), offset by \$100M estimated decline in mobile

Memory test TAM unchanged at \$1.2-\$1.3B, trending towards higher end

Expect revenue to grow in the low single-digit range YoY

- Test revenue up modestly and Robotics revenue up 10-20% YoY on new products and channel improvements
- Revenue distribution: 1H 48% / 2H 52%, further de-risking full year plan
- Vertically Integrated Producer (VIP) channel gaining momentum

Mid-Term Earnings Model Growth Drivers Remain in Place

Test

- Market recovery in Mobile, Auto and Industrial
- Al drives SOC and Memory test demand as edge applications are deployed and 2nm/GAA delivers higher complexity
- Shift toward Vertically Integrated Producers builds

Robotics

- All expands the range of applications into a lightly penetrated market
- New products/services and channel improvements expected to drive growth through 2026+

In addition to disclosing results that are determined in accordance with GAAP, Teradyne also discloses in this presentation and on the earnings call non-GAAP results of operations that exclude certain income items and charges. These results are provided as a complement to results provided in accordance with GAAP. These non-GAAP performance measures are used to make operational decisions, to determine employee compensation, to forecast future operational results, and for comparison with the Company's business plan, historical operating results and the operating results of the Company's competitors. Management believes each of these non-GAAP performance measures provides useful supplemental information for investors, allowing greater transparency to the information used by management in its operational decision making and in the review of the Company's financial and operational performance, as well as facilitating meaningful comparisons of the Company's results in the current period compared with those in prior and future periods. A reconciliation of each available GAAP to non-GAAP financial measure discussed in this presentation is contained in the following slides and on the Teradyne website at www.teradyne.com by clicking on "Investors" and then selecting the "GAAP to Non-GAAP Reconciliation" link. The non-GAAP performance measures discussed in this presentation may not be comparable to similarly titled measures used by other companies. The presentation of non-GAAP measures is not meant to be considered in isolation, as a substitute for, or superior to, financial measures or information provided in accordance with GAAP.

- Teradyne determines non-GAAP operating cash flow ("Free Cash Flow") by adjusting GAAP cash flow from operations excluding discontinued operations, less property, plant and equipment additions. Free cash flow is considered a non-GAAP financial measure. Teradyne believes that free cash flow, which measures our ability to generate cash from our business operations, is an important financial measure for use in evaluating Teradyne's financial performance. Free cash flow should be considered in addition to, rather than as a substitute for, income (loss) from continuing operations or net income (loss) as a measure of our performance and net cash provided by operating activities as a measure of our liquidity.
- Teradyne believes it is important to view free cash flow as a measure that provides supplemental information to Teradyne's entire statement of cash flows.
- Although other companies report their free cash flow, numerous methods may exist for calculating a company's free cash flow. As a result, the method used by Teradyne to calculate free cash flow may differ from the methods other companies use to calculate their free cash flow.
- The following table sets forth a reconciliation of free cash flow, a non-GAAP financial measure, to net cash provided by operating activities, a GAAP measure, which we believe to be the GAAP financial measure most directly comparable to free cash flow.
