Industry Positioning

The Dixie Group

THE DIXIE GROUP

- Strategically our business is driven by our relationship to the upper-end consumer and the design community
- This leads us to:
 - Have a sales force that is attuned to design and customer solutions
 - Be a “product driven company” with an emphasis on beautiful and trend setting styles, colors, and designs
 - Be quality focused with a reputation for building excellent products and standing behind what we make
 - And, unlike most of the industry, not manufacturing driven

Business Challenges

2021

- Invista sold Stainmaster brand to Lowes
 - Ultimately led to the loss of our business with Lowes – our largest mass merchant customer
- We sold our commercial division to Mannington
 - Began a restructuring plan to right size our operations to the new sales volume

2022

- Our primary raw material supplier exited the business in an abrupt and abusive manner
 - We endured exorbitant price increases coupled with significant internal costs, disruptions in operations and delayed introductions of new product
 - We lost our business with our largest mass merchant retailer as a result of the sale of the Stainmaster brand and cost increases
- Exorbitant increase in the freight costs for imported goods
- Cost and operational disruptions as a result of our ongoing restructuring plan

2023 -
2024

- Higher rates on mortgages and inflated housing prices have caused a decline in sales within the flooring industry
- Decline in the volume of sales of existing homes - a primary driver for our business
- Persistent inflation and other economic conditions have delayed interest cuts expected in 2024

2023 Cost Reduction Plan

\$35.6 Million

| Initiative |  Employee Headcount Reduction Number of employees was reduced by 27% (354 employees) |  Lower Costs on Nylon Fiber. Existing nylon broadloom styles were converted to new raw material fibers from multiple suppliers at lower cost |  Reduction in Sample Expense Prior year included non-recurring expense for displays related to decorative and hard surface businesses |  Reduction in the Cost of Freight for Imported Inventory Inflated costs incurred in 2022 returned to, and remained at, more normal levels in 2023 |  Other Cost Reductions Operational improvements, reductions in other raw materials, lease revenue from available warehouse space, increased freight surcharges and favorable adjustment to customer discount terms |
|--------------|--|--|--|---|--|
| Cost Savings |  \$13.4 Million |  \$7.0 Million |  \$5.0 Million |  \$4.1 Million |  \$6.1 Million |

2024 Cost Reduction Plan

\$11.9 Million

| Initiative |  Raw Material Cost Savings Savings from Partial Year of Internal Extrusion Operations and reductions in Costs of Nylon Fiber and Polyester Yarn |  Reductions in Expenses for Samples Costs maintained at a level to support new product introductions and sample replenishment |  Lower Expenses Related to Restructuring |  Change in Customer Terms for Discounts |  Other Cost Reductions Operational Improvements and Lease Revenue from Available Warehouse Space |
|--------------|---|---|---|--|--|
| Cost Savings |  \$3.6 Million |  \$2.0 Million |  \$2.0 Million |  \$1.7 Million |  \$2.6 Million |

Looking Forward

We anticipate strong sales driven by pent up demand when interest rates are reduced and the housing market recovers.

Gross margins will continue to improve with full volume from extrusion operations and increased volume in the manufacturing plants.

Selling expenses are expected to stay at normal levels for product introductions and sample replenishment.

Other income will increase for revenue from leasing available warehouse space.
