

Non-US GAAP Financial Measures and Supplemental Information

April 21, 2014

In this document, the terms "Company," "we" and "our" refer to Celanese Corporation and its subsidiaries on a consolidated basis.

Purpose

The purpose of this document is to provide information of interest to investors, analysts and other parties including supplemental financial information and reconciliations and other information concerning our use of non-US GAAP financial measures. This document is updated quarterly.

Use of Non-US GAAP Financial Measures

From time to time, management may publicly disclose certain numerical "non-GAAP financial measures" in the course of our earnings releases, financial presentations, earnings conference calls, investor and analyst meetings and otherwise. For these purposes, the Securities and Exchange Commission ("SEC") defines a "non-GAAP financial measure" as a numerical measure of historical or future financial performance, financial position, or cash flows that excludes amounts, or is subject to adjustments that effectively exclude amounts, included in the most directly comparable measure calculated and presented in accordance with US GAAP, and vice versa for measures that include amounts, or are subject to adjustments that effectively include amounts, that are excluded from the most directly comparable US GAAP measure so calculated and presented. For these purposes, "GAAP" refers to generally accepted accounting principles in the United States.

Non-GAAP financial measures disclosed by management are provided as additional information to investors, analysts and other parties as the Company believes them to be important supplemental measures for assessing our financial and operating results and as a means to evaluate period-to-period comparisons. These non-GAAP financial measures should be viewed as supplemental to, and should not be considered in isolation or as alternatives to, net earnings (loss), operating profit (loss), cash flow from operating activities, earnings per share or any other US GAAP financial measure. The method of calculation of the non-GAAP financial measures used herein may be different from other companies' methods for calculating measures with the same or similar titles. Investors, analysts and other parties should understand how another company calculates such non-GAAP financial measures before comparing the other company's non-GAAP financial measures to any of our own. These non-GAAP financial measures may not be indicative of the historical operating results of the Company nor are they intended to be predictive or projections of future results.

Pursuant to the requirements of SEC Regulation G, whenever we refer to a non-GAAP financial measure, we will also present on the Investor Relations/Financial Information/Non-GAAP Financial Measures page of our website, www.celanese.com, in this document, in the presentation itself or on a Form 8-K in connection with the presentation, to the extent practicable, the most directly comparable financial measure calculated and presented in accordance with GAAP, along with a reconciliation of the differences between the non-GAAP financial measure we reference and such comparable GAAP financial measure. This supplemental financial disclosure should be considered within the context of our complete audited financial results for the given period, which are available on the Investor Relations/Financial Information/SEC Filings page of our website, www.celanese.com.

This document includes definitions and reconciliations of non-GAAP financial measures used from time to time by the Company.

Specific Measures Used

This document provides information about the following non-GAAP measures: adjusted EBIT, operating EBITDA, adjusted earnings per share, net debt, adjusted free cash flow and return on capital employed. The most directly comparable financial measure presented in accordance with US GAAP in our consolidated financial statements for adjusted EBIT and operating EBITDA is net earnings (loss); for adjusted earnings per share is earnings (loss) from continuing operations per common share-diluted; for net debt is total debt; and for adjusted free cash flow is cash flow from operations. We do not believe that there is a directly comparable financial measure calculated and presented in accordance with GAAP for return on capital employed.

Definitions

- Adjusted EBIT is defined by the Company as net earnings (loss) less interest income plus loss (earnings) from discontinued operations, interest expense and taxes, and further adjusted for certain items and amounts attributable to noncontrolling interests ("NCI"). We believe that adjusted EBIT provides transparent and useful information to management, investors, analysts and other parties in evaluating and assessing our core operating results from period-to-period after removing the impact of unusual, non-operational or restructuring-related activities that affect comparability. Our management recognizes that adjusted EBIT has inherent*

limitations because of the excluded items. Adjusted EBIT is one of the measures management uses for planning and budgeting, monitoring and evaluating financial and operating results and as a performance metric in the Company's incentive compensation plan. We may provide guidance on adjusted EBIT but are unable to reconcile forecasted adjusted EBIT to a US GAAP financial measure without unreasonable effort because a forecast of certain items is not practical. Adjusted EBIT by business segment may also be referred to by management as segment income.

- Operating EBITDA is defined by the Company as net earnings (loss) less interest income plus loss (earnings) from discontinued operations, interest expense, taxes and depreciation and amortization, and further adjusted for certain items and amounts attributable to NCI. Operating EBITDA is equal to adjusted EBIT plus depreciation and amortization, and has the same uses and limitations as adjusted EBIT described above.
- Adjusted earnings per share is defined by the Company as earnings (loss) from continuing operations, adjusted for income tax (provision) benefit, certain items, refinancing and related expenses and amounts attributable to NCI, divided by the number of basic common shares, convertible preferred shares and dilutive restricted stock units and stock options calculated using the treasury method. We believe that adjusted earnings per share provides transparent and useful information to management, investors, analysts and other parties in evaluating and assessing our core operating results from period-to-period after removing the impact of unusual, non-operational or restructuring-related activities that affect comparability. We may provide guidance on adjusted earnings per share but are unable to reconcile forecasted adjusted earnings per share to a GAAP financial measure without unreasonable effort because a forecast of certain items is not practical.

Note: The income tax rate used for adjusted earnings per share approximates the midpoint in a range of forecasted tax rates for the year. This range may include certain partial or full-year forecasted tax opportunities, where applicable, and specifically excludes changes in uncertain tax positions, discrete items and other material items adjusted out of our GAAP earnings for adjusted earnings per share purposes, and changes in management's assessments regarding the ability to realize deferred tax assets. We also reflect the impact of foreign tax credits when utilized for the adjusted earnings per share tax rate. We analyze this rate quarterly and adjust if there is a material change in the range of forecasted tax rates; an updated forecast would not necessarily result in a change to our tax rate used for adjusted earnings per share. The adjusted tax rate is an estimate and may differ from the actual tax rate used for GAAP reporting in any given reporting period. It is not practical to reconcile our prospective adjusted tax rate to the actual GAAP tax rate in any given future period.

- Adjusted free cash flow is defined by the Company as cash flow from operations less other productive asset purchases, operating cash flow from discontinued operations and certain cash flow adjustments, including amounts attributable to NCI and capital contributions from outside stockholders of the Company's consolidated ventures. We believe that adjusted free cash flow provides useful information to management, investors, analysts and other parties in evaluating the Company's liquidity and credit quality assessment. Although we use adjusted free cash flow as a financial measure to assess the performance of our business, the use of adjusted free cash flow has important limitations, including that adjusted free cash flow does not reflect the cash requirements necessary to service our indebtedness, lease obligations, unconditional purchase obligations or pension and postretirement funding obligations.
- Net debt is defined by the Company as total debt less cash and cash equivalents, adjusted for amounts attributable to NCI. We believe that net debt provides useful information to management, investors, analysts and other parties in evaluating changes to the Company's capital structure and credit quality assessment.
- Return on capital employed is defined by the Company as adjusted EBIT divided by the sum of property, plant and equipment, net and trade working capital (calculated as trade receivables, net plus inventories less trade payables – third party and affiliates), adjusted for outside stockholders' interest in property, plant and equipment, net related to the Company's consolidated ventures and trade working capital amounts attributable to NCI.

Supplemental Information

Supplemental Information we believe to be of interest to investors, analysts and other parties includes the following:

- For those consolidated ventures in which the Company owns or is exposed to less than 100% of the economics, the outside stockholders' interests are shown as noncontrolling interests. Beginning in 2014, this includes Fairway Methanol LLC for which the Company's ownership percentage is 50%.
- Net sales for each of our business segments and the percentage increase or decrease in net sales attributable to price, volume, currency and other factors for each of our business segments.
- Cash dividends received from our equity and cost investments.

Results Unaudited

The results in this document, together with the adjustments made to present the results on a comparable basis, have not been audited and are based on internal financial data furnished to management. Quarterly results should not be taken as an indication of the results of operations to be reported for any subsequent period or for the full fiscal year.

Change in accounting policy regarding pension and other postretirement benefits

Effective January 1, 2013, we elected to change our policy to immediately recognize actuarial gains and losses and the change in fair value of plan assets for our defined benefit pension plans and other postretirement benefit plans. Financial information for prior periods has been retrospectively adjusted.

⁽¹⁾ See Certain items presentation (Table 8) for details.

⁽²⁾ Calculated using adjusted effective tax rates as follows:

| | Q1 '14 | 2013 | Q4 '13 | Q3 '13 | Q2 '13 | Q1 '13 | 2012 | 2011 | 2010 | 2009 |
|----------------------------------|--------|------|--------|--------|--------|--------|------|------|------|------|
| (In percentages) | | | | | | | | | | |
| Adjusted effective tax rate..... | 21 | 19 | 19 | 19 | 19 | 19 | 17 | 18 | 21 | 24 |

⁽³⁾ Excludes the immediate recognition of actuarial gains and losses and the impact of actual vs. expected plan asset returns.

| | Actual Plan Asset Returns | Expected Plan Asset Returns |
|---------------|---------------------------|-----------------------------|
| Q4 '13 & 2013 | 7.9 % | 8.0% |
| 2012 | 13.1 % | 8.1% |
| 2011 | 7.6 % | 8.1% |
| 2010 | 15.1 % | 8.1% |
| 2009 | 17.9 % | 7.9% |

⁽⁴⁾ Potentially dilutive shares are included in the adjusted earnings per share calculation when adjusted earnings are positive.

Table 4
Net Sales by Segment - Unaudited

| | Q1 '14 | 2013 | Q4 '13 | Q3 '13 | Q2 '13 | Q1 '13 | 2012 | 2011 | 2010 | 2009 |
