BUSINESS DEVELOPMENT IN THE FIRST QUARTER OF 2005

CONSOLIDATED EARNINGS AFTER TAXES

- I The Deutsche Wohnen Group's consolidated earnings after taxes in Q1 2005 amounted to €0.5 million. This represents a drop of €0.7 million compared to the first quarter of the previous year (€1.2 million).
- However, it should be noted in this context that the gross profit from housing privatization in particular is not significant in the first few months of a fiscal year.

HOUSING PRIVATIZATION

- I The drop in earnings after taxes resulted primarily from lower book gains on sales (€0.8 million as against €3.5 million in the same period of 2004).
- In the period until March 31, 2005, 32 housing sales were reported in the balance sheet (first quarter of 2004: 73). The gross profit from sales amounted to €0.4 million (March 31, 2004: €2.6 million).
- However, the total number of housing sales recorded rose by around 37% to 149, as against 109 the previous year. This figure meant that the sales team once again met its intrayear targets; these effects will only be recognized in the balance sheet later in the year.

RESIDENTIAL PROPERTY MANAGEMENT

- I The segment result for Residential Property Management improved by around 8% year-on-year to €9.2 million as against €8.5 million. The reasons for this were the reduction in maintenance expenses of around €0.3 million, and a drop in depreciation of residential and commercial buildings of around €0.4 million.
- Total estimated rental income and actual rental income (€22.3 million and €20.3 million respectively) remained at almost the same level as 2004 (€22.4 million and €20.6 million) despite the sales of residential units in the previous year.

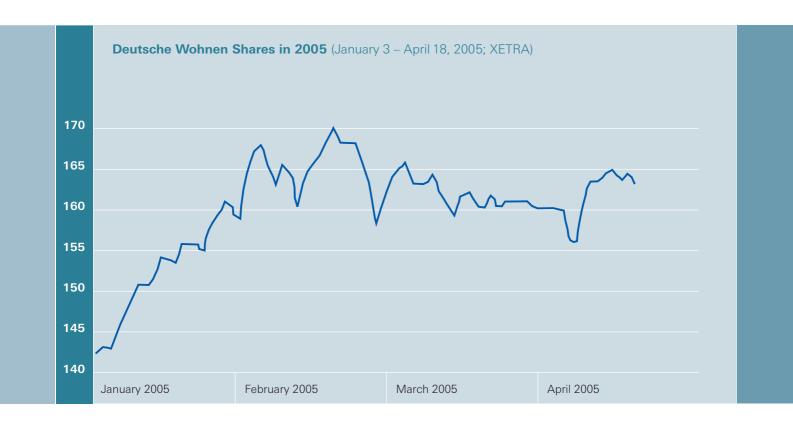

OTHER KEY GROUP FIGURES

On the basis of this operating result, the effects of housing privatization described above led not only to a decrease in earnings after taxes but also to a drop in EBIT (–22%), EBITDA (–19%) and cash flow (–22%) compared with the first quarter of 2004.

MERGER OF TWO GROUP COMPANIES

- In February 2005, Rhein-Main Wohnen GmbH was merged with Rhein-Nahe Wohnen GmbH as part of intragroup restructuring.
- The merger will result in a one-off real estate transfer tax expense in the current fiscal year. However, this will be offset by a clear reduction in corporation and trade tax payments in years to come.
- On the basis of this one-time real estate tax effect, the Management Board is forecasting reduced consolidated net income for full-year 2005 compared with 2004.

DEUTSCHE WOHNEN SHARES

I Deutsche Wohnen's share price increased significantly since the beginning of the year. Following on a year-end price of €139.52 (XETRA), an all-time high of €170.30 was reached by mid-February. After a period of consolidation, the price at the time of writing of this interim report (mid-April 2005) is between €163 and €165.

- I There are two main reasons for the improved share price:
- I Firstly, the announcement of the introduction of Real Estate Investment Trusts (REITs) in Germany as of 2006 has led to a sharp growth in interest in German real estate stocks among international investors in particular.
- In addition, Deutsche Wohnen AG is the only listed company that offers a broad range of investors access to the German housing market, thanks to the tradability of its shares.

Consolidated Balance Sheet as of March 31, 2005
