Forward-looking statements

This presentation contains statements that the Company believes to be "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including, without limitation, statements regarding the Company's future financial position, business strategy, growth and drivers, capital allocation, resiliency, targets (including financial targets for 2028), projected sales, costs, margins, earnings, capital expenditures, debt levels and cash flows, and plans and objectives of management for future operations, are forward-looking statements. When used in this presentation, words such as "may," "will," "expect," "intend," "estimate," "anticipate," "believe," "should," "project," "confident" or "plan" or the negative thereof or variations thereon or similar terminology are generally intended to identify forward-looking statements. Similarly, references in the strategy circle that appears in this presentation to diversified growth, healthy margins and disciplined capital allocation are intended to be forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, assumptions and other factors, some of which are beyond the Company's control, which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These factors include the cyclical nature of the Company's access equipment, fire apparatus, refuse and recycling collection and air transportation equipment markets, which are particularly impacted by the strength of U.S. and European economies and construction seasons; the Company's estimates of access equipment demand which, among other factors, is influenced by historical customer buying patterns and rental company fleet replacement strategies; the impact of orders and costs on the U.S. Postal Service contract; risks that a trade war and related tariffs could reduce the demand for or competitiveness of the Company's products or cause inefficiencies in the Company's supply chain; the Company's ability to increase prices to raise margins or to offset higher input costs; the Company's ability to accurately predict future input costs associated with U.S. Dept. of Defense contracts; the Company's ability to attract and retain production labor in a timely manner; the Company's ability to realize the anticipated benefits associated with the AeroTech acquisition; the strength of the U.S. dollar and its impact on Company exports, translation of foreign sales and the cost of purchased materials; the impact of severe weather, war, natural disasters or pandemics that may affect the Company, its suppliers or its customers; the Company's ability to predict the level and timing of orders for indefinite delivery/indefinite quantity contracts with the U.S. federal government; budget uncertainty for the U.S. federal government, including risks of future budget cuts, the impact of continuing resolution funding mechanisms and the potential for shutdowns; the impact of any U.S. Department of Defense solicitation for competition for future contracts to produce military vehicles; risks related to the collectability of receivables, particularly for those businesses with exposure to construction markets; the cost of any warranty campaigns related to the Company's products; risks associated with international operations and sales, including compliance with the Foreign Corrupt Practices Act; the Company's ability to comply with complex laws and regulations applicable to U.S. government contractors; cybersecurity risks and costs of defending against, mitigating and responding to data security threats and breaches impacting the Company; the Company's ability to successfully identify, complete and integrate other acquisitions and to realize the anticipated benefits associated with the same; and risks related to the Company's ability to successfully execute on its strategic road map and meet its long-term financial goals. Additional information concerning these and other factors is contained in the Company's filings with the Securities and Exchange Commission, including the Form 8-K filed today. All forward-looking statements speak only as of the date of this presentation. The Company assumes no obligation, and disclaims any obligation, to update information contained in this presentation. Investors should be aware that the Company may not update such information until the Company's next quarterly earnings conference call, if at all. In particular: The statements in this presentation that relate to the Company's financial targets for 2028 use language that might imply a level of certainty about the likelihood that the Company will attain these targets, it is possible that the Company will not attain them in the timeframe noted or at all. By their nature, the risk and uncertainty associated with these targets are greater than that associated with near-term guidance and should not be construed as guidance. Therefore, investors should construe these statements regarding the Company's financial targets for 2028 only as targets rather than promises of future performance or absolute statements.
