- 6 Development of the Economic Environment
- **8** Business Development in the First Quarter of 2017
- 15 Expected Development in the Remainder of the Fiscal Year

Overview

A very successful start to the 2017 fiscal year reaffirmed Vonovia's corporate strategy. The takeover and integration of conwert led to a further expansion of our real estate portfolio and a further rise in the value of the company. Strong organic rent growth of 3.4% and the first-time inclusion of conwert enabled us to increase our operating result further. This performance is reflected in the year-over-year rise of 17.1% in the FFO 1.

Our planned investment drive to modernize and expand our housing stock was successfully launched in the first quarter of 2017. This further substantiates our position of maintaining our own craftsmen's organization. The positive developments at the start of the year have enabled us to raise our FFO 1 forecast for 2017 to \in 900–920 million.

Vonovia SE on the Capital Market

The Vonovia Share

The attractive risk/return profile offered by housing companies listed on the German stock market in general and the positive business development at Vonovia in particular resulted in sustained demand for shares in Vonovia in the first quarter of 2017. In the first three months of 2017, Vonovia's share price rose by 6.9 % as against the closing price seen on December 31, 2016,

to \in 33.03. The DAX showed similarly strong development during the same period, climbing by 7.25% to 12,312.87 points. By contrast, the EPRA Europe rose by only 0.5% to 1,711.95 points.

Vonovia's market capitalization amounted to around ϵ 15.5 billion as of March 31, 2017.

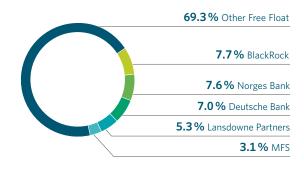

Share Price Performance in the First Three Months of 2017

Shareholder Structure

Free Float and Breakdown of Major Shareholders

(as of March 31, 2017)

Based on the German stock exchange's definition of free float, only the interest held by Norges Bank (Norwegian Ministry of Finance) does not count towards the free float. This means that 92.4 % of Vonovia's shares were in free float on March 31, 2017.

In line with Vonovia's long-term strategic focus, the majority of its investors have a similarly long-term focus. The company's investors include pension funds, sovereign wealth funds and international asset managers in particular. There is also a large number of individual shareholders, although they only represent a small proportion of the total capital.

Investor Relations Activities

In the first quarter of 2017, communication with investors focused on the following issues, in particular: property valuation, the investment program, innovative property management, the immunity of Vonovia SE's business model to macroeconomic fluctuations, the importance of acquisitions and organic growth, and the takeover of conwert.

In order to provide information to interested members of the financial community, the Investor Relations team once again organized and carried out numerous property tours for interested investors and analysts on location with colleagues from the operational areas of the company.

We will continue to communicate openly with the capital market as this year progresses. Various roadshows and conferences, as well as our Capital Markets Day, have already been planned. Information can be found in the Financial Calendar on our Investor Relations website. \$\frac{1}{2}\$ http://investors.vonovia.de

Analyst Assessments

As of March 31, 2017, 30 national and international analysts were publishing studies on Vonovia. The average target share price was \in 36.10, with 55% of analysts issuing a "buy" recommendation and 38% issuing a "hold" recommendation. Only 7% issued a "sell" recommendation for Vonovia's shares.

As part of the conwert takeover offer, 93.09 % of the shares were tendered for exchange. 87.57 % of conwert's shareholders accepted the cash exchange offer, with 5.52 % accepting the stock exchange offer.

Development of the Economic Environment

German Economic Upswing Gaining Breadth

According to the Kiel Institute for the World Economy (IfW), the German economy made another strong start to the year with a great deal of momentum in 2017. Based on the current data, the slowdown that had started to emerge in the middle of last year is no longer visible. According to the German Federal Ministry of Economic Affairs and Energy (BMWi), production in the manufacturing sector was increased considerably at the start of the year. The order situation also remains positive. Despite a slight dip in construction activity at the turn of the year, the overall conditions point towards a sustained dynamic construction sector. The upswing also continued in other areas of the economy, particularly in the majority of service sectors, meaning that economic output was up by 0.6% in the first quarter of this year after expanding by 0.4% in the closing quarter of last year. What is more, the ifo business climate index is currently showing the most positive value seen since July 2011. Nevertheless, the geopolitical risks remain relatively high. In particular, the conflicts in the Middle East and the associated tension within Europe in matters relating to refugee policy could have an impact on the economic climate. Aside from this, major eurozone economies are facing upcoming elections that could potentially have a significant impact on overall economic development. The monetary policy pursued by the European Central Bank (ECB) remains extremely expansive, with key interest rates still sitting at an alltime low of o.o%.

The labor market remains on a positive trajectory: according to the Federal Statistical Office (Statistisches Bundesamt), the number of people in work in February 2017 was up by 608,000 year-on-year. The German Federal Employment Agency (Bundesagentur für Arbeit) published an unemployment rate of 6.0% for March 2017. This is down by 0.5 percentage points compared with the previous year.

Consumer price performance has been picking up again ever so slightly since the end of last year. In January 2017, the rate of inflation – based on the consumer price index – came to 1.9 %, with the trend continuously being shaped by price developments in the energy sector.

Continued Rise in Quoted Rents and Quoted Prices in Germany

Quoted rents in Germany remained on an upward trend at the beginning of 2017. According to IMX, the price index of the real estate portal Immobilien-Scout24, rents rose by 0.4 percentage points between December 2016 and January 2017 and by 0.5 percentage points between January 2017 and February 2017. The increase in the quoted prices for owner-occupied apartments was once again much more pronounced than the increase in rents. According to IMX, the prices for existing owner-occupied apartments increased by 1.8 percentage points month-on-month in January and 1.9 percentage points in February. The price index for newly built apartments rose by 1.6 percentage points and 1.1 percentage points during the

same periods. This means that, looking at Germany as a whole, there are no signs of the market potentially settling down, as had been previously discussed.

According to ImmobilienScout24, price developments for newly built owner-occupied apartments slowed in the course of last year in certain major cities. This indicates that price growth is reaching its limits in some cases. According to Deutsche Bundesbank, the increasing supply growth in 2016 is not sufficient to restrict the price pressure created by the sustained high demand for living space. Deutsche Bundesbank believes that the price of residential property ownership in cities is likely to have moved even further away from the level based on economic and demographic factors. The experts believe that only part of the additional momentum can be explained by the further reduction in financing costs. F+B Forschung und Beratung für Wohnen, Immobilien und Umwelt GmbH reports that the prices of apartments offered on real estate portals have been developing in line with the increase in new contract rents for some time now.

German Residential Investment Market Makes a Strong Start to 2017

In the first quarter of 2017, residential building bundles and residential developments of 50 units or more accounted for a total transaction volume of around € 3.2 billion on the German residential investment market. according to the real estate consultancy firm CBRE. This puts the transaction volume up by around 30% on the same quarter of last year. The sustained high market activity on the German residential investment market is being driven by highly liquid fixed assets. The transaction volume is, however, limited by the sustained lack of supply. According to CBRE, investors are focusing increasingly on project developments. CBRE expects purchase prices and rents to continue to rise as the year progresses. This will be reflected in continued yield compression in top locations in Germany. A transaction volume of well in excess of € 10 billion may be realistic in 2017.

Demand for Living Space in Major German Cities Remains High

The demand for living space in Germany's major cities remains high. According to a recent expert opinion published by the Cologne Institute for Economic Research (IW), this is due to strong immigration from abroad and other parts of Germany. German cities are not, however, managing to create enough additional living space to meet the demand. Compared with the required construction level, only around 53% of the apartments required were built between 2011 and 2015 looking at the nationwide average. The rate was often as low as 30% in the country's major cities. According to the Cologne Institute for Economic Research, this has resulted in rising prices and rents and in a wave of migration to neighboring areas.

Business Development in the First Quarter of 2017

Group Makes a Good Start to the Fiscal Year

Vonovia got off to a very successful start to the 2017 fiscal year. The takeover of conwert Immobilien Invest SE allowed us to expand our own residential portfolio to 355,525 units at the end of the quarter. We also continued to pursue our corporate strategy in the course of the quarter. In the Rental segment, this relates, in particular, to the further expansion of our modernization measures and the ramping up of our

new construction measures. In the Extension segment, we continued to further expand our housing-related services while in the Sales segment, we forged ahead with our strategy of selective sales.

Our positive business development is reflected in the development of our key performance indicators.

The following key figures provide an overview of the development in FFO 1 and other value drivers in the first quarter of 2017:

in € million	3M 2017	3M 2016	Change in %	12M 2016
Rental income	417.2	392.0	6.4	1,538.1
Maintenance expenses	-63.1	-58.6	7.7	-247.4
Operating expenses	-68.5	-64.4	6.4	-244.5
Adjusted EBITDA Rental	285.6	269.0	6.2	1,046.2
Extension income	215.8	138.7	55.6	851.2
thereof external income	51.4	27.2	89.0	108.1
thereof internal income	164.4	111.5	47.4	743.1
Operating expenses	-196.0	-131.1	49.5	-794.2
Adjusted EBITDA Extension	19.8	7.6	160.5	57.0
Adjusted EBITDA Other	-5.3	-0.5	960.0	-9.2
Adjusted EBITDA Operations	300.1	276.1	8.7	1,094.0
FFO interest expense	-76.8	-86.0	-10.7	-322.7
FFO 1 current income taxes	-5.1	-3.8	34.2	-10.5
FFO 1	218.2	186.3	17.1	760.8

In the reporting period, we were able to increase our primary key figure for the sustained earnings power of our core business, **FFO 1,** by ϵ 31.9 million or 17.1% compared with the first quarter of 2016 to ϵ 218.2 million. This trend was fueled primarily by the positive development in adjusted EBITDA Operations, which increased by 8.7% from ϵ 276.1 million in the first quarter of 2017. Positive growth was witnessed in both the Rental and Extension segments.

In the **Rental segment**, our apartments had virtually full occupancy at the end of the first quarter of 2017. The apartment vacancy rate of 2.7 % was down slightly on the value of 2.8% seen in the first quarter of 2016 and is now due predominantly to construction measures as part of our extensive investment program. Rental income increased by 6.4 % from € 392.0 million in the first quarter of 2016 to € 417.2 million due to acquisitions. At € 6.06/m², the average monthly in-place rent at the end of the first quarter of 2017 was up 3.8% on the previous year's figure of ϵ 5.84/ m² at the end of the first quarter of 2016. This increase comprises a market-based increase in rent of 1.6%, a further increase in rent of 1.8% resulting from property value improvements, new construction measures and the addition of extra stories and, finally, a rent increase of 0.4% per square meter due to portfolio optimization measures as a result of sales. This means that organic rent growth, i.e. the increase in the like-forlike rent based on constant total square meters, plus increases in rent associated with the creation of new square meters in our properties, comes to 3.4% on the whole.

In the first quarter of 2017, we increased our modernization and maintenance measures to a volume of ε 191.4 million (3M 2016: ε 125.4 million). Modernization efforts increased significantly from ε 51.9 million in the first quarter of 2016 to ε 114.2 million in the first quarter of 2017.

Operating expenses in the Rental segment were up by 6.4% on the figures for the first quarter of 2016 to ϵ 68.5 million due to acquisitions. All in all, adjusted EBITDA Rental increased by 6.2% from ϵ 269.0 million in the first quarter of 2016 to ϵ 285.6 million in the first quarter of 2017.

We were able to further boost our earnings power and, in particular, significantly improve the output of our craftsmen's organization in the Extension segment, too. This will allow us to successfully implement our investment program in the 2017 fiscal year, helping us to continue to improve our portfolio considerably in the 2017 fiscal year. In addition, we continued to expand our business activities in the areas of condominium administration, the provision of cable television to our tenants, metering services and insurance and residential environment services in the first quarter of 2017. Total income from our Extension activities increased by 55.6% from € 138.7 million in the first quarter of 2016 to € 215.8 million in the first quarter of 2017. The adjusted EBITDA Extension improved considerably from € 7.6 million in the first quarter of 2016 to € 19.8 million in the first quarter of 2017.

The EBITDA margin of the core business, calculated based on the adjusted EBITDA Operations in relation to rental income within the Group, once again showed positive development in the reporting period. It increased from 70.3% in the first quarter of 2016 to 71.8% in the first quarter of 2017.

Due to refinancing and lower interest rates, FFO interest expense came to ϵ 76.8 million in the first quarter of 2017, down by 10.7% on the value for the first quarter of 2016 of ϵ 86.0 million.

We successfully continued our selective sales strategy in the **Sales segment**. The segment covers all business activities relating to the sale of single residential units (Privatize) and the sale of entire buildings or land (Non-Core/Non-Strategic). A total of 1,692 apartments were sold in the first quarter of 2017 (3M 2016: 15,551). 535 of these apartments were attributable to privatization (3M 2016: 890) and 1,157 to Non-Core/Non-Strategic (3M 2016: 14,661).

In the reporting period, adjusted EBITDA Sales came to ϵ 19.1 million, down considerably on the value of ϵ 35.0 million seen in the first three months of 2016. Sales in the previous year had been shaped considerably by the block sale of 13,570 units to LEG. The fair value step-up for privatization came to 31.1% in the first quarter of 2017, up slightly on the value of 30.9% seen in the first quarter of 2016 despite increases in value at the end of 2016. By contrast, the Non-Core/Non-Strategic fair value step-up came to 2.3% in the first quarter of 2017, which is slightly lower than the value of 3.8% seen in the first quarter of 2016.

in € million	3M 2017	3M 2016	Change in %	12M 2016
Income from disposal of properties	492.2	690.5	-28.7	1,227.9
Fair value of properties sold adjusted to reflect effects not relating to the period from assets held for sale	-465.8	-650.7	-28.4	-1,107.7
Adjusted profit from disposal of properties	26.4	39.8	-33.7	120.2
thereof Privatize	17.1	17.4	-1.7	71.1
thereof Non-Core/Non-Strategic	9.3	22.4	-58.5	49.1
Selling costs	-7.3	-4.8	52.1	-27.7
Adjusted EBITDA Sales	19.1	35.0	-45.4	92.5

The non-recurring items eliminated in the adjusted EBITDA as a whole came to ε 13.9 million in the 2017 reporting period, much lower than the value of

 ε 26.7 million seen in the first quarter of 2016, which is due primarily to lower acquisition and integration costs.

in € million	3M 2017	3M 2016	Change in %	12M 2016
Business model optimization/development of new fields of business	5.5	3.8	44.7	19.5
Acquisition costs incl. integration costs*	4.0	14.7	-72.8	48.3
Refinancing and equity measures	0.9	0.7	28.6	3.2
Severance payments/pre-retirement part-time work arrangements	3.5	7.5	-53.3	23.5
Total non-recurring items	13.9	26.7	-47.9	94.5

^{*} Including takeover costs and one-time expenses in connection with acquisitions, such as HR measures relating to the integration process. Figures for the previous year shown in line with the current reporting structure for 2017

The financial result in the first quarter of 2017 came to ϵ -83.0 million, which is a considerable improvement on the comparable figure for the first quarter of 2016 of ϵ -131.4 million. This is due primarily to the repayment of financing in 2016. In addition, the first quarter

of 2016 was hit by transaction costs and prepayment penalties in connection with the repayment of portfolio loans. FFO 1 interest expense is derived from the financial result as follows.

in € million	3M 2017	3M 2016	Change in %	12M 2016
Income from non-current loans	0.5	0.5	-	1.9
Interest income	0.5	8.9	-94.4	14.1

FFO interest expense	-76.8	-86.0	-10.7	-322.7

^{*} Excluding income from other investments

The profit for the period came to ε 130.7 million in the first quarter of 2017, up considerably on the value of ε 79.2 million reported in the first quarter of 2016. This is mainly due to an increase in rental income and an improved financial result.

At the end of the first quarter of 2017, the adjusted NAV per share came to ϵ 31.18, up by 28.2% on the prior-year figure of ϵ 24.32. This is mainly due to the revaluation performed at the end of 2016 and to the addition of conwert Immobilien Invest SE in 2017. The EPRA NAV per share climbed from ϵ 30.15 at the end of the first quarter of 2016 to ϵ 37.43 at the end of the first quarter of 2017. No NAV forecast will be provided from the 2017 fiscal year onwards.

in € million	Mar. 31, 2017	Mar. 31, 2016	Change in %	Dec. 31, 2016

Assets

Consolidated Balance Sheet Structure

	Mar. 31, 2	Mar. 31, 2017		016
	in € million	in %	in € million	in %
Non-current assets	33,208.8	95.3	30,459.8	93.7
Current assets	1,639.3	4.7	2,062.3	6.3
Total assets	34,848.1	100.0	32,522.1	100.0
Equity	14,270.6	41.0	13,888.4	42.7
Non-current liabilities	16,828.0	48.3	16,229.1	49.9
Current liabilities	3,749.5	10.7	2,404.6	7.4
Total equity and liabilities	34,848.1	100.0	32,522.1	100.0

The Group's **total assets** increased by \in 2,326.0 million from \in 32,522.1 million as of December 31, 2016, to \in 34,848.1 million, mainly due to an increase in **investment properties** of \in 2,482.7 million to \in 29,463.0 million, with \in 2,445.9 million resulting from the integration of the conwert Group, and due to an increase in **goodwill** of \in 212.9 million due to the first-time consolidation of the conwert Group. **Current assets** fell by \in 532.9 million to \in 1,007.9 million, mainly as a result of the drop in cash resources due to the payment of the conwert cash component from the first tender phase and the repayment of the CMBS Taurus. The inflow from the January EMTN drawdown had the opposite effect.

The gross asset value **(GAV)** of Vonovia's property assets came to ϵ 29,598.1 million as of March 31 2017, which corresponds to 84.9% of total assets compared with ϵ 27,106.4 million or 83.3% at the end of 2016.

The ε 382.2 million increase in **equity** to ε 14,270.6 million is due, in the amount of ε 130.7 million, to the positive profit for the first quarter, as well as to the non-cash capital increase and the increase in minorities due to the takeover of conwert.

This brings the **equity ratio** to 41.0 % compared with 42.7 % at the end of 2016.

The increase in **current liabilities** is dominated by the residual purchase price obligation of \in 275.0 million for

^{**} Based on the number of shares on the reporting date (Mar. 31, 2017: 468,796,936; Mar. 31, 2016, and Dec. 31, 2016: 466,000,624)

the conwert shares tendered during the second offer phase, which were paid in the second quarter of 2017.

The **NAV** amounts to ε 17,548.6 million as of March 31, 2017.

Financial Position

Cash Flow

The following table shows the Group cash flow:

Key Data from the Statement of Cash Flows

in € million	3M 2017	3M 2016
Cash flow from operating activities	241.9	227.5
Cash flow from investing activities	-773.2	258.0
Cash flow from financing activities	-1.6	-447.2
Net changes in cash and cash equivalents	-532.9	38.3
Cash and cash equivalents at the beginning of the period	1,540.8	3,107.9
Cash and cash equivalents at the end of the period	1,007.9	3,146.2

The cash flow from **operating activities** comes to ε 241.9 million for the first three months of 2017 compared with ε 227.5 million for the same period of 2016. The increase is mainly due to the improvement in the EBITDA IFRS operating result, in particular due to the integration of the acquired conwert portfolio. The change in net current assets, which is down by around ε 10 million on the value for the same period of 2016, had the opposite effect.

The cash flow from **investing activities** shows a payout balance of ϵ 773.2 million in total due to net payouts of ϵ 1,133.3 million for the cash component of the conwert takeover. The proceeds from sales included in the figure came to ϵ 513.2 million, down by ϵ 207.1 million year-on-year. Investments in investment properties came to ϵ 131.8 million (previous year: ϵ 54.1 million), due in particular to payouts for modernization measures.

The cash flow from **financing activities** is characterized by the proceeds from the EMTN drawdown and by the fact that new mortgages were taken out (funds relating to the German government-owned development bank, KfW) in a total amount of ϵ 1,041.8 million. On the other hand, payouts were made in connection with scheduled and unscheduled repayments (mainly CMBS Taurus) in the amount of ϵ 1,172.0 million, as well as for transaction and financing costs and interest paid totaling ϵ 112.7 million.

The **net drop** in **cash** and **cash equivalents** in the first quarter of 2017 comes to ϵ 532.9 million.

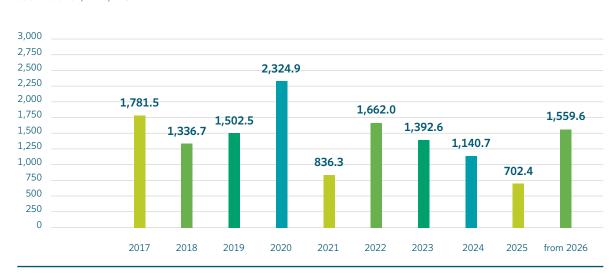

Financing

Vonovia's credit rating as awarded by the agency Standard & Poor's is unchanged at 'BBB+'with a stable outlook for the long-term corporate credit rating and 'A-2' for the short-term corporate credit rating. At the same time, the credit rating for the issued unsecured bonds is 'BBB+'. Vonovia placed a total bond volume of ε 11.5 billion via its Dutch subsidiary Vonovia Finance B.V.

The **debt maturity profile** of Vonovia's financing was as follows as of March 31, 2017:

Maturity profile

Expected Development in the Remainder of the Fiscal Year

Economy as a Whole: The Economic Expansion will Continue to Stabilize

After the German economy picked up in the fourth quarter of 2016, reporting solid growth of 1.9 % at the end of the year, the economic indicators suggest that the growth trend is set to continue. The Kiel Institute for the World Economy (IfW) expects GDP to expand by 1.7% in the course of 2017, with the slightly lower growth rate attributable exclusively to the lower number of working days. Private consumption will expand at a much slower pace due to the purchasing power losses resulting from the increase in oil prices. With no further increase in spending on refugee migration, the rate of public consumption growth is likely to slow. Instead, the IfW expects investments to be the main engine driving the sustained upswing, primarily due to the further expansion in construction investments. Equipment investments are also likely to pick up again after showing slightly slower development of late due to the uncertain international environment. Foreign trade also dropped due to the uncertainties on key sales markets such as the United States and the United Kingdom. As the global economy gradually recovers, however, the IfW predicts a return to strong export and import growth over the next two years, with the upswing, driven primarily by the domestic economy, expected to result in imports growing at a much faster rate than exports.

Looking ahead to 2018, the IfW expects to see a further acceleration in economic momentum, predicting GDP growth of 2.0 %. This forecast rests on the fact that the expansion forces in the domestic economy

are likely to remain strong, with the monetary environment expected to continue to provide considerable stimulus and the outlook for exports expected to improve further as the global economy recovers.

According to the IfW, the risks to the growth forecast lie in geopolitical tension resulting from conflicts in the Middle East, a sharp increase in crude oil prices, the uncertain development of the external value of the euro and the increasing susceptibility of the German economy to overheating and the negative developments that would come as a result.

Real Estate Market: Germany Expected to see High Demand and Continued Rent Increases

Savills believes that the overall conditions on the German residential real estate market remain positive from an investor's perspective. The population is still growing and the short supply on the rental market will persist in many cities in the medium term. Given the high demand, rents will continue to rise this year unless the state steps in with clear regulatory measures to slam the brakes on rent development. Savills believes that Germany's major metropolitan areas offer positive long-term growth prospects. Investors should look not only at the country's core cities, but also at their surrounding areas.

In an environment of geopolitical uncertainty, the stability that Germany offers as a location is likely to create sustained investment pressure on the German residential real estate market. While FERI EuroRating Services AG (Feri) believes that the risk of overheating is mounting on the whole, it remains limited to major cities and regional hotspots. Although the empirica bubble index increased again in the fourth quarter of 2016, there is no conventional nationwide price bubble at the moment. Rents and purchase prices in 227 out of 402 administrative districts and self-governing cities are no longer developing in tandem, with the bubble index indicating a medium to high risk for 158 districts. Yields are low, but are justified by exceptionally low interest rates, and to some extent the low interest rates are the reason behind the low yields.

Savills does not believe that a significant increase in interest rates is on the horizon in Europe at the moment. Future value developments will depend not only on interest rates but also on the real economy and demographic trends. Experts at bulwiengesa believe that marked price corrections in Germany's major cities are unrealistic. ImmobilienScout24 believes that, in addition to rising quoted rents, the prices of existing and newly built apartments are likely to continue to rise looking at Germany on average. According to DB Research, residential property ownership remains affordable due to positive income momentum and low interest rates for construction. There are, however, pronounced differences from region to region.

Due to the significant increase in rents in many places, there are also calls for greater regulation of the residential property market in the run-up to the German Bundestag elections. The most significant new regulatory measure from a property owner's perspective, the rent ceiling, is already in place in more than 300 municipalities in twelve federal states. In Mecklenburg-West Pomerania, the federal state government has been tasked with introducing the regulations as soon as possible. It seems unlikely that a second package of tenancy legislation will be pushed through before the 2017 election.

Business Outlook

Vonovia got off to a very successful start to the 2017 fiscal year on the whole. Bolstered by the acquisition of conwert and the further expansion of our Extension business, we were able to further expand our leading market position in the first quarter of 2017.

We expect the positive business developments to continue over the coming quarters and that we will achieve the forecast figures as published in our 2016 annual report. Given the dynamic development of the German real estate market, we expect to see a further increase in value in our investment properties in 2017 and with this a further boost to NAV.

We have updated our forecast for the following key figures:

Forecast for 2017

	Actual 2016	Forecast 2017*	in the 2017 Q1 Report
FFO 1	€ 760.8 million	€ 830-850 million	€ 900-920 million
FFO 1/share	€ 1.63	€ 1.78-1.82	approx. € 1.88
Rental income from property management	€ 1,538 million	€ 1,530-1,550 million	€ 1,660-1,680 million
Organic rent increase	3.3%	Increase of 3.5–3.7 %	Increase of 3.8-4.0 %
Maintenance incl. capitalized maintenance	€ 320.1 million	approx. € 340 million	approx. € 340 million
Modernization	€ 472.3 million	€ 700-730 million	approx. € 730 million
Step-up Privatize	36.2%	approx. 35 %	approx. 30 %
