

Heads up: This is the future of logistics

TeamViewer Frontline's Pick-by-vision solution

Inefficient methods lead to lack of productivity, high costs and dissatisfied workforce

Productivity

“More order in less time”
is the focus of more than

2/3

of supply chain executives
because of the ever-
increasing volume of
orders

Quality

Only 1% more
commissioning
errors increase the
whole handling
costs by

+10%

Flexibility

More complex orders,
market fluctuations and
the trend towards

Lot size 1

demand easily scalable
solutions

Workforce

Despite the crisis and
inflation, the demand
for personnel in
warehouse work
grows by

+30%

Vision picking combines the capabilities and advantages of established picking technologies

Pick-by-vision

patented

* Visual instructions

Like pick-by-light

Instant Support

Like talking face-2-face

Performance

Like nothing else

Scan confirmation

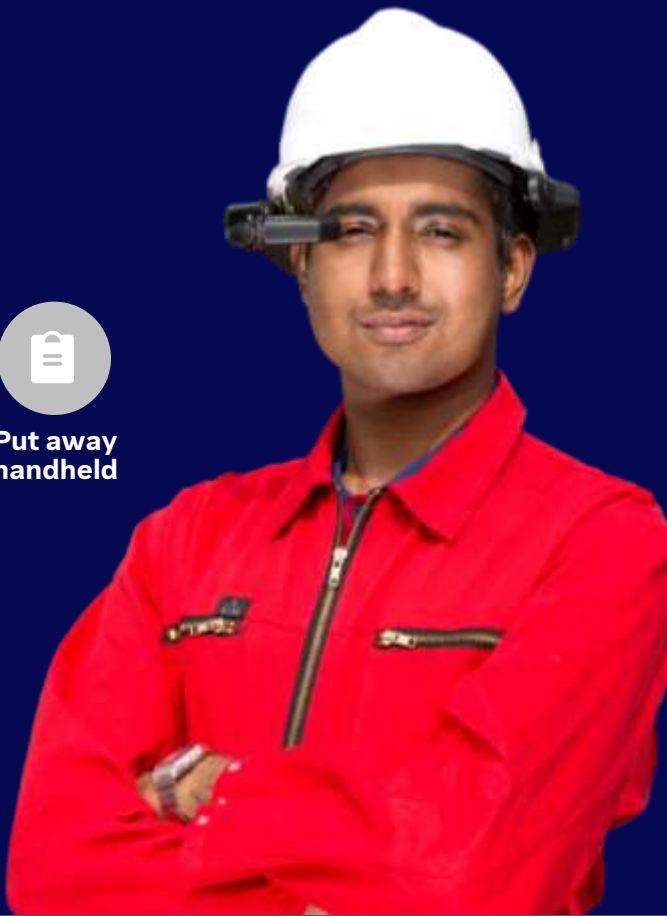

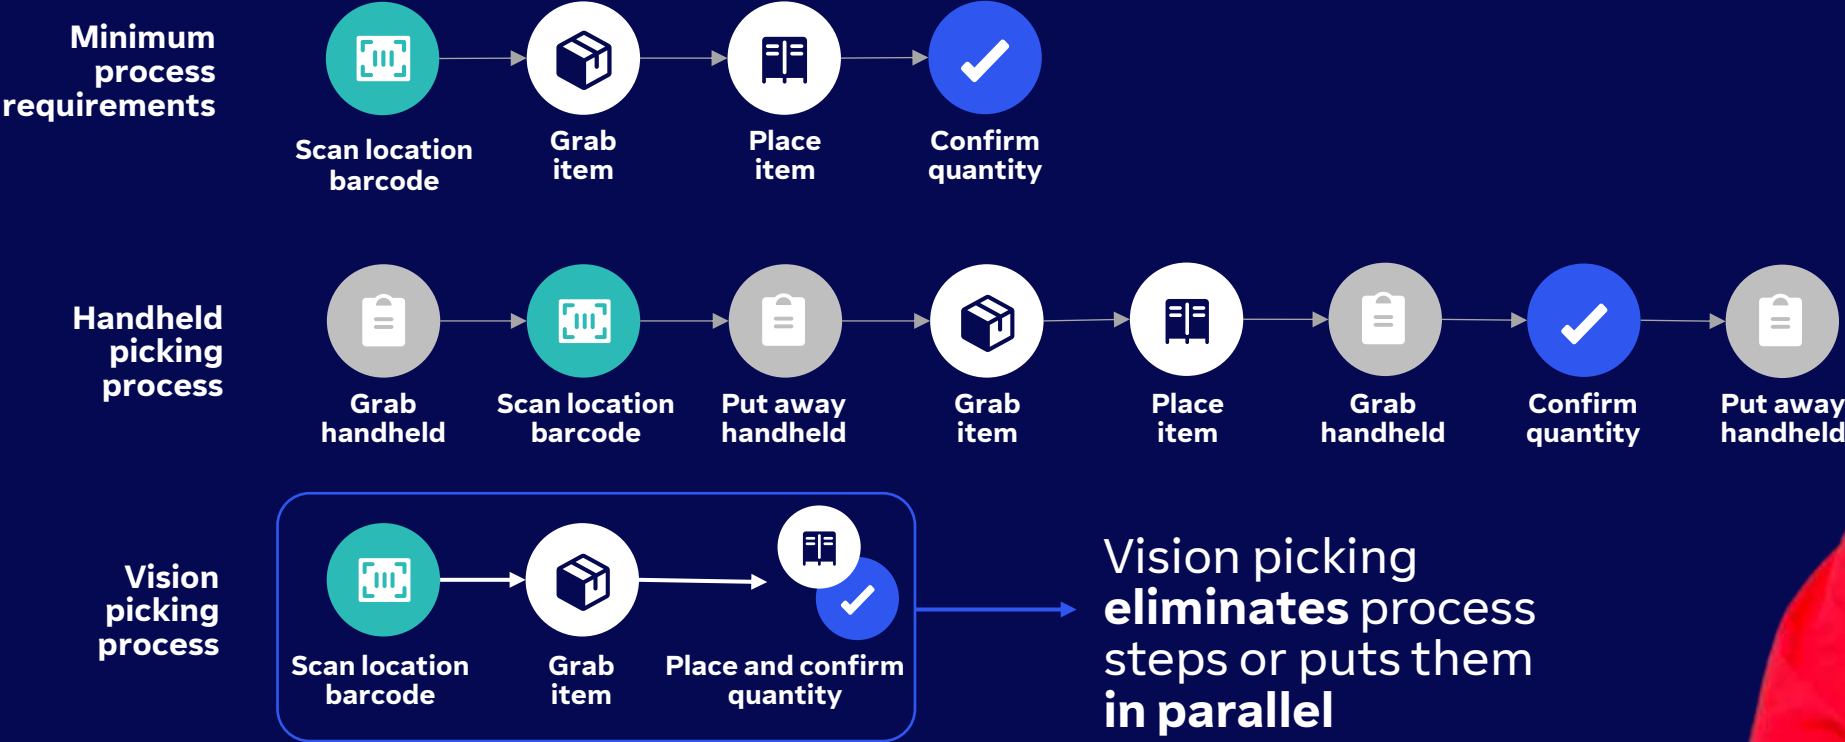

Like handheld scanners

Voice interaction

Like pick-by-voice

Vision picking achieves higher efficiency by streamlining processes and reducing idle time to a minimum

Smart glasses and wearable scanners are an industrial-grade, ergonomic combination that enables hands-free work in the warehouse

REALWEAR NAVIGATOR 500 VUZIX M400 ALMER ARC 2 ZEBRA TC21

ZEBRA RS6100 PROGLOVE MARK3 PARTITALIA DISCOVERY MINI

A central blue circle with a white plus sign (+) is positioned between the two rows of devices, indicating a combination or integration of the technologies.

- Smart glasses visualize information
- Rugged hardware built for enterprise use
- Wearable scanners for instant confirmation
- Wireless connectivity and Bluetooth enabled

Easy Implementation: Leveraging Partnerships and Standard Interfaces for Seamless Integration

Strategic Industry Partnerships

 **Manhattan.**

 **SAP**

Deloitte.

Industry Interfaces

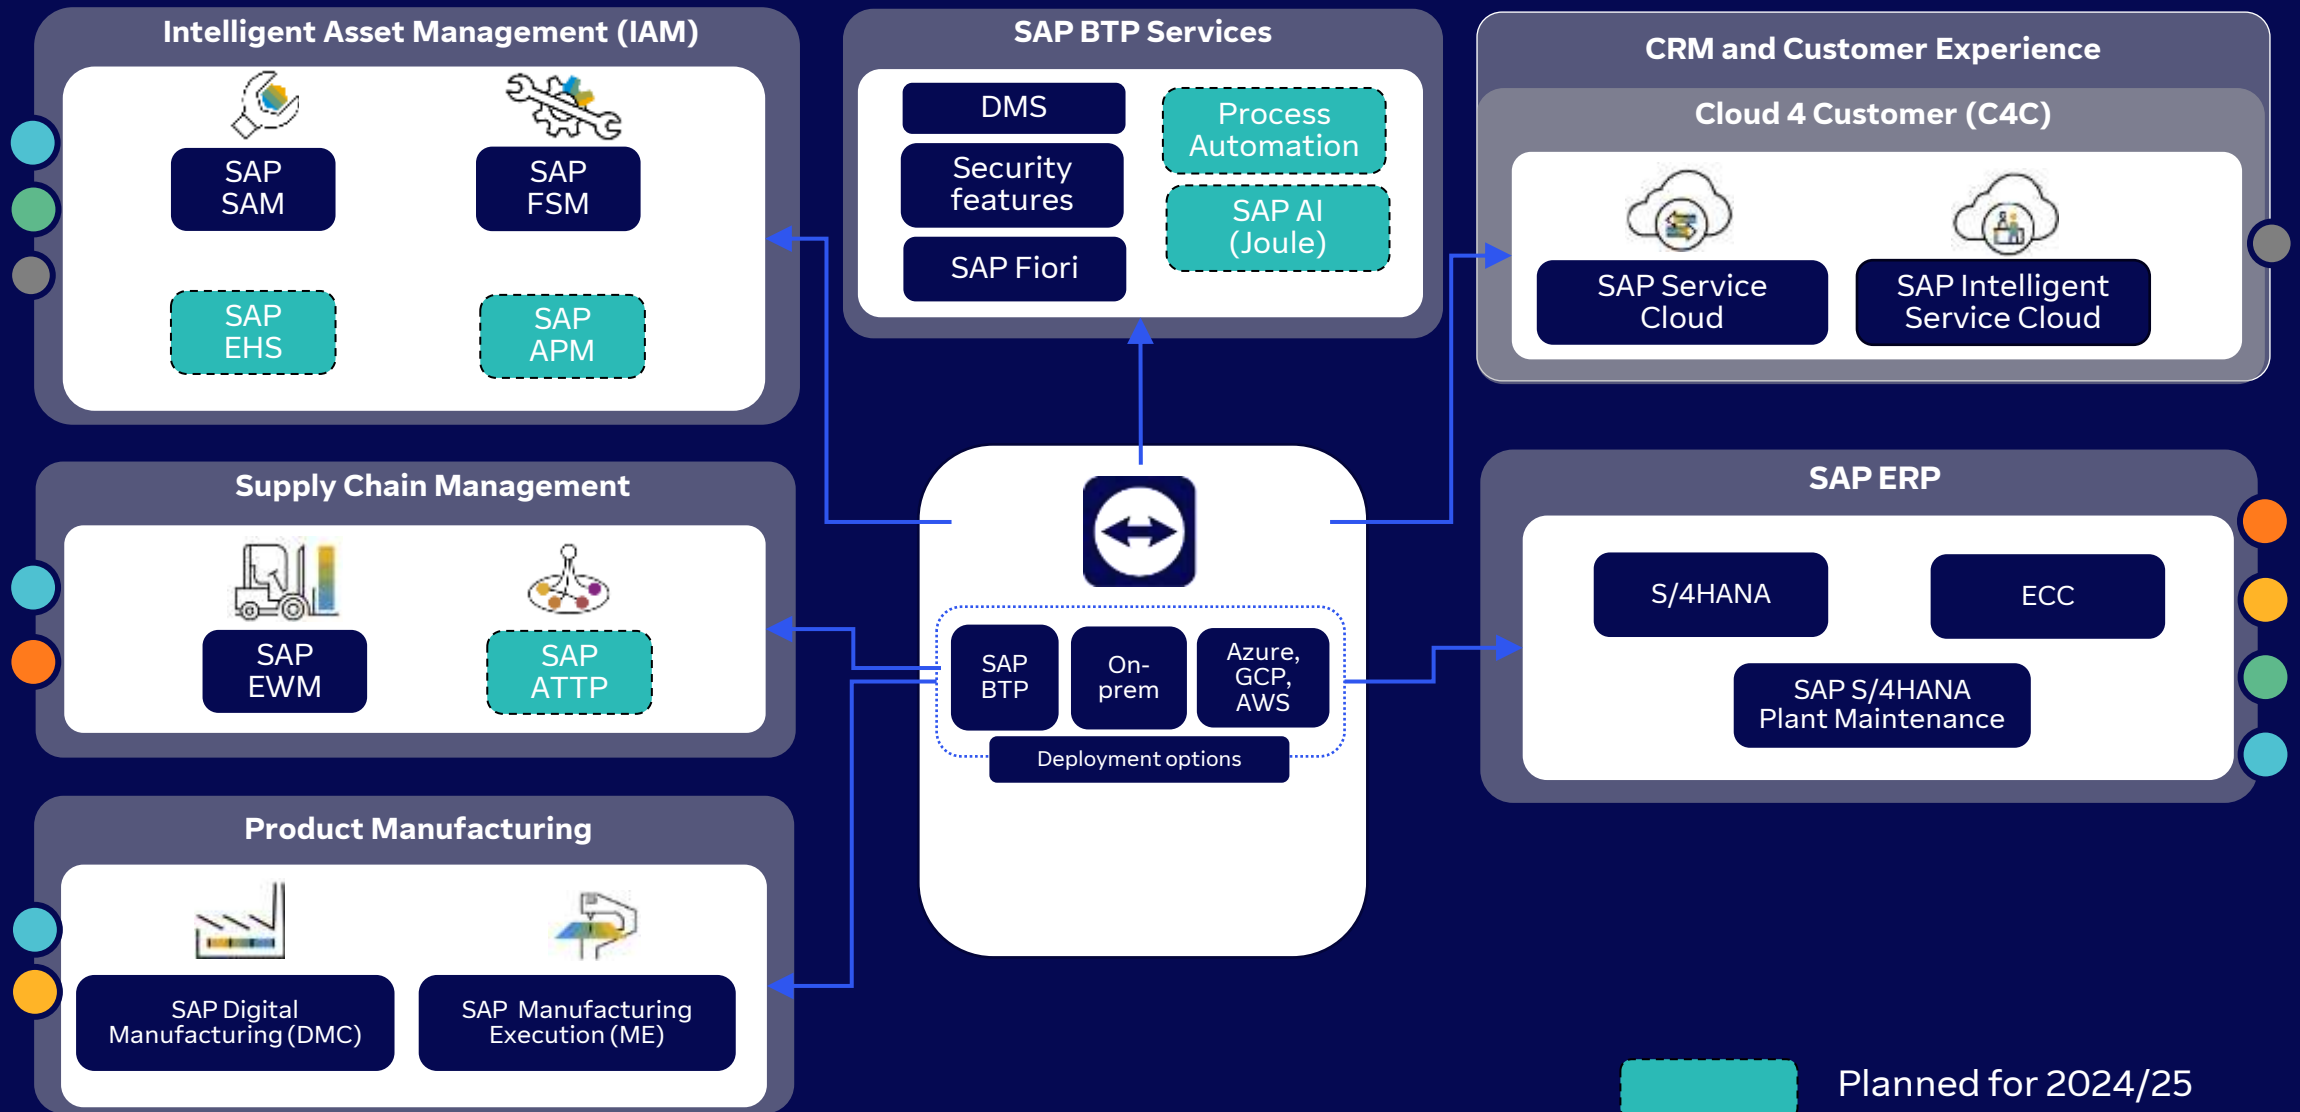

Telnet-based

ITSMobile

- Seamlessly integrates into existing customer landscapes.
- Minimal disruption ensures low effort for customers.
- Standardized interfaces simplify implementation and reduce costs.

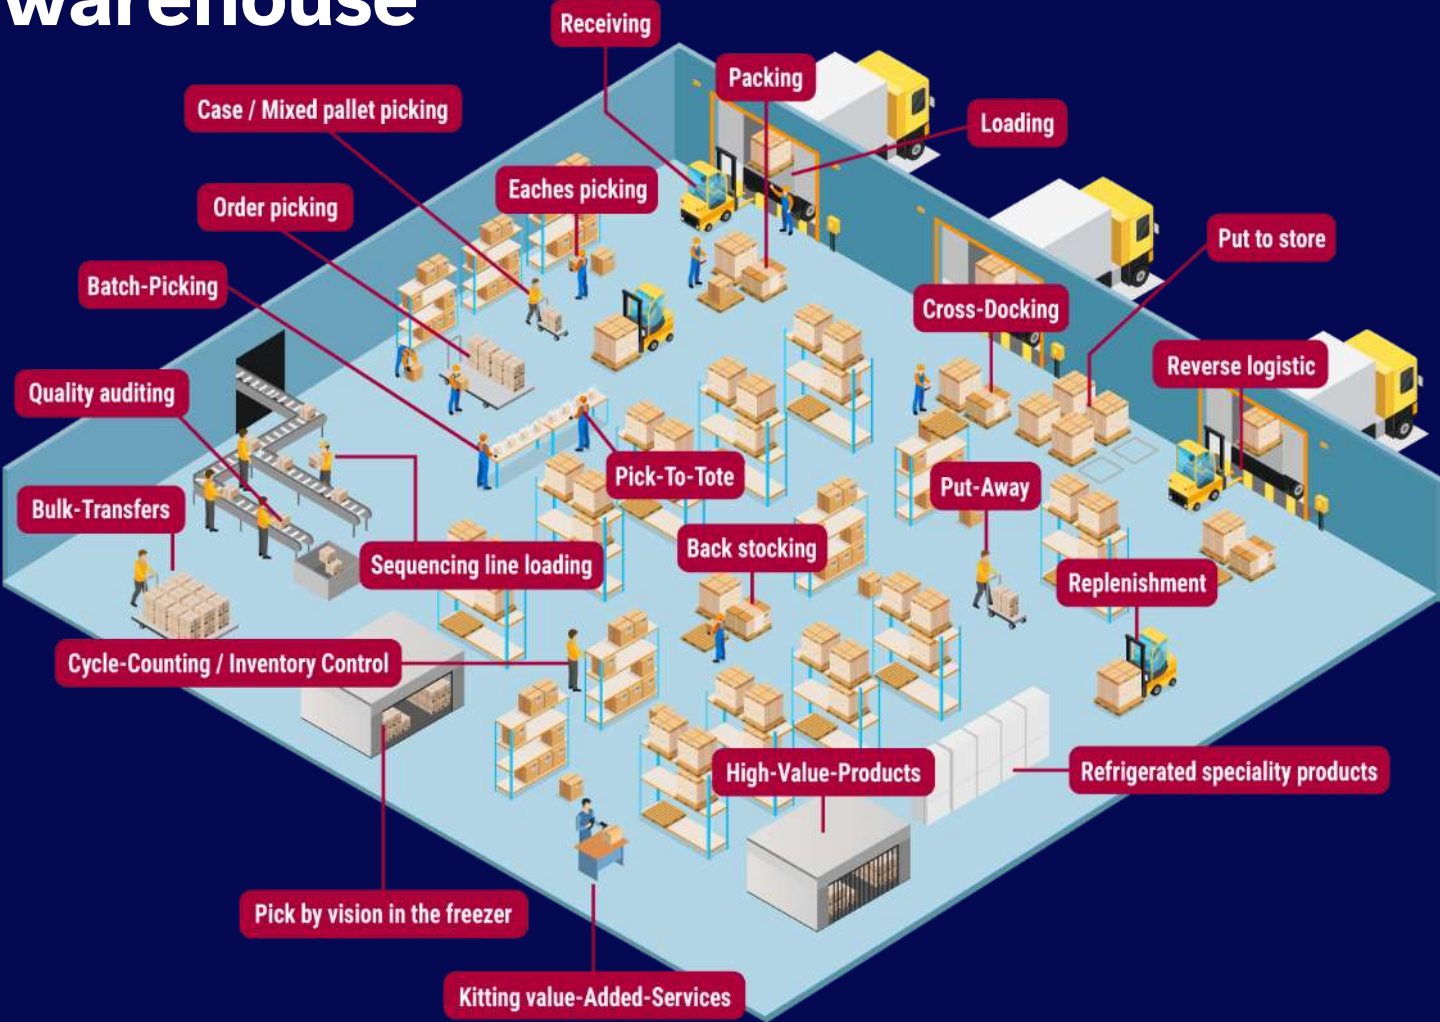

Leveraging existing content seamlessly as direct integration provides real-time info

Logistics Operations 4.0: Frontline Pick in the warehouse

Manual processes are the core of warehousing operations, but they often rely on outdated, bulky, or confusing methods.

The next logical step: Support your workforce with effective and ergonomic state-of-the-art technology.

TeamViewer and SAP transform pharmaceutical distribution for Nadro with AR

- With demand growing by up to 25% year-to-year, Nadro needed to modernize its warehouse strategy.
- TeamViewer and SAP delivered the solution for digitalized cloud-based warehousing and picking processes.
- Reduced error rate increases satisfaction among customers.
- Overtime is no longer required meaning staff have a better work-life balance.
