- Spread between closing and satisfaction yields expanded in 2Q23

Closings vs Satisfaction Yields¹

Effective Floating Rate Loans Rise to >21% of the Loan Portfolio; Significant Repricing to Occur Through 2025

- Floating rate loans include any loans (including back-to-back swaps) tied to an index that reprices within 90 days; including the \$400MM of loan portfolio hedges, effective floating rate loans total \$1.46B or >21% of the loan portfolio
- Through 2025, loans to reprice ~220-230 bps higher assuming index values as of June 30, 2023
- ~16% of loans reprice (>21% including all loan portfolio hedges) with every Fed move and an additional 10-15% reprice annually

NIM Stabilizes from March; Cautiously Optimistic

(\$MM)

The NIM Should:

- Compress if the Fed continues to raise rates
- Expand, after a lag, if the Fed stops raising rates
- Expand if the Fed cut rates

Our Actions Have Reduced Liability Sensitivity

Percentage Change to Net Interest Income from Base Case
Based on a 100 bps Shock in Rates

- The Balance Sheet is structured where liabilities reprice faster than assets (initially) when rates increase
- Implementing a swap strategy along with adding floating rate assets
 - During 2Q23, over \$400MM of interest rate hedges were added and \$250MM of forward hedges became effective
- When the Fed stops increasing rates, and after a lag, funding costs should stabilize, and assets then reprice higher (assuming a stable rate environment)
- The duration of the assets is between 3-4 years compared to 1-2 year for the liabilities
- By adding interest rate hedges and implementing other structural changes, liability sensitivity has been reduced to by 64% over the past year

Net Charge-offs Significantly Better Than the Industry; Strong DSR

Key Takeaways – Cautiously Optimistic

- **Executing on our Action Plan**

- These actions will result in improved profitability in the future and set the stage for consistent and significantly higher returns

- **Areas of Focus improved during the quarter**

- Significantly reduced liability sensitivity
- Credit quality improved and underwriting remains solid
- Expanded liquidity capacity
- Continue to service our customers and deepen relationships

- **Improving metrics but cautious on the environment**

- 2Q23 NIM was in line with the month of March
- Asset quality improved during the quarter
- Deposit balances were better than past seasonal patterns
- Loans declined slightly
- Capital ratios were stable
- Expecting additional Fed rate increases

Reconciliation of GAAP Earnings and Core Earnings

Non-cash Fair Value Adjustments to GAAP Earnings

The variance in GAAP and core earnings is partly driven by the impact of non-cash net gains and losses from fair value adjustments. These fair value adjustments relate primarily to borrowings carried at fair value under the fair value option.

Core Net Income, Core Diluted EPS, Core ROAE, Core ROAA, Pre-provision, Pre-tax Net Revenue, Core Net Interest Income FTE, Core Net Interest Margin FTE, Core Interest Income and Yield on Total Loans, Core Noninterest Income, Core Noninterest Expense and Tangible Book Value per common share are each non-GAAP measures used in this presentation. A reconciliation to the most directly comparable GAAP financial measures appears below in tabular form. The Company believes that these measures are useful for both investors and management to understand the effects of certain interest and noninterest items and provide an alternative view of the Company's performance over time and in comparison, to the Company's competitors. These measures should not be viewed as a substitute for net income. The Company believes that tangible book value per common share is useful for both investors and management as this measure is commonly used by financial institutions, regulators and investors to measure the capital adequacy of financial institutions. The Company believes this measure facilitates comparison of the quality and composition of the Company's capital over time and in comparison, to its competitors. This measure should not be viewed as a substitute for total shareholders' equity.

These non-GAAP measures have inherent limitations, are not required to be uniformly applied and are not audited. They should not be considered in isolation or as a substitute for analysis of results reported under GAAP. These non-GAAP measures may not be comparable to similarly titled measures reported by other companies.
