Accelerating DOoH-Momentum in “normalising Market”!

Quarterly & LTM Development biased by Macro Environment for almost 4 Years

Drop of pre-pandemic LTM by ~35% to low-point during pandemic; since then, DOoH trippled

DOoH making up ~40% of OoH Business by End of 2024

Challenging Environment for Ad Market was an additional Catalyst for DOoH

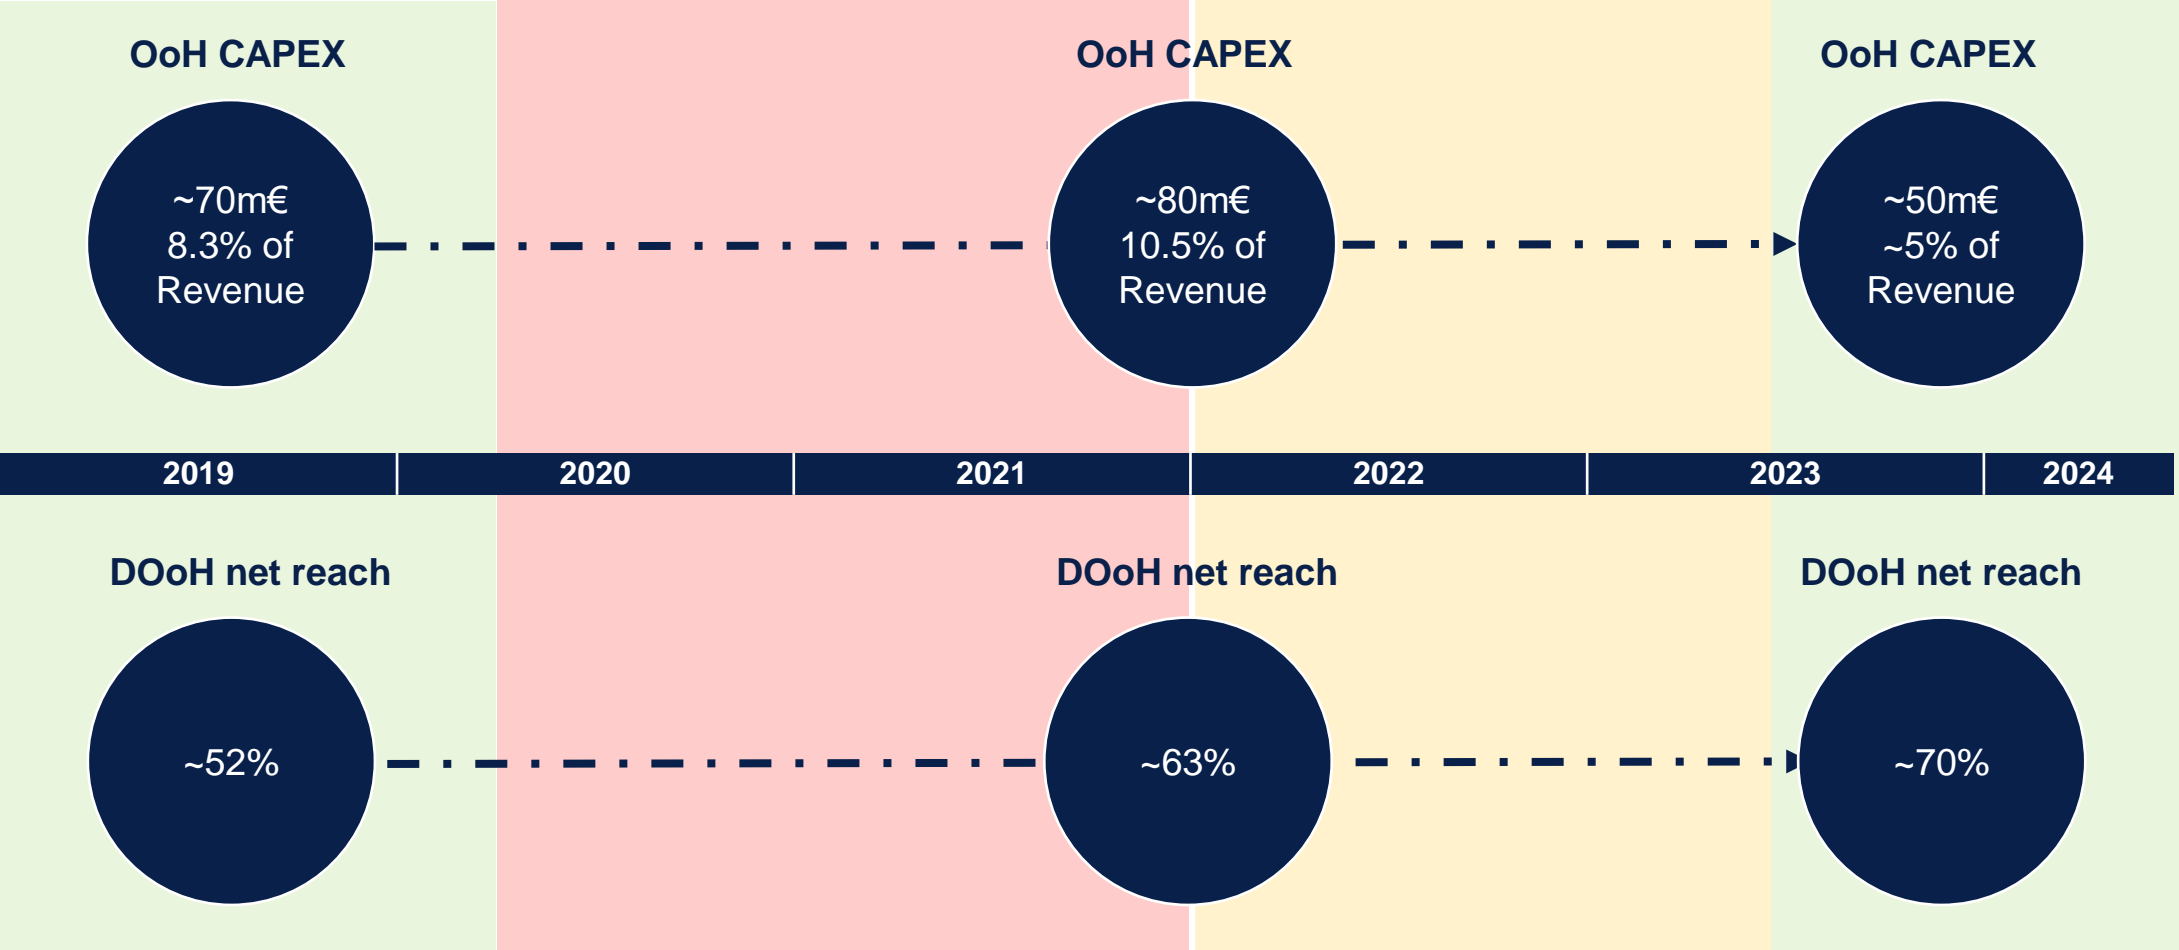

Share of DOoH within our OoH business doubled in the last 4 years

Anti-cyclical long-term Investment into digital Infrastructure pays off

Strategic Investments took DOoH to a new Level of Audience Coverage

CAPEX: in absolute terms stable going forward and as share of revenue declining year over year

Qualitative Product Enhancement of DOOH Network going forward

Focus on Highlights for Advertisers and Category Drivers

“Domination”: e.g. Hamburg main station planned for 2025

“Cut Through”: Motion Cubes rollout 2024/2025

“Sustainability”: Green Digital since 2023

Gold Standard Case with Deutsche Telekom for the UEFA Euro 2024

DOoH as the Fusion of Mass Audience, Targeting/Data, Content and Automation

Live broadcast of goals during the European Championship

- Content and advertising in an entertainment environment
- Ströer tech stack enables near real-time playout
- Highly frequented Public Video touchpoints scale and reach mass audience
- Granular targeting options (e.g. with DCO)
- Complexity managed by fully automated programmatic systems
- Exceptionally positive feedback by the audience

Current Momentum driven by Future-Proof Operational Levers

Transformation of OoH is operating in normal macro Environment again

- 1 The most profitable product (=DOoH) is growing the fastest and will be >50% around the end of 2026
- 2 The most profitable sales channel (=national business) is back on pre-COVID share – with sustainable sales KPIs and overproportionate growth of programmatic sources
- 3 Upfront investment in digital infrastructure is completed and CAPEX as share of revenue will constantly decline while we continuously still improve the product
- 4 Our fill rate – parallel to robust price increases – is still at a comparatively low level
- 5 We have adjusted our Classic OoH business to the inflationary challenges of 2022/23, the tobacco ad ban as well as an overall still lower level than in pre-pandemic times

Comment

- Digital with ongoing double-digit revenue growth especially due to continuing increase of programmatic sales
- Dialog also with double-digit revenue growth in Q2, supported by acquisition of additional call center locations in PY – Call Centers and Direct Marketing activities with improved mid-single digit organic revenue growth in Q2
- EBITDA (adj.) with increase in Q2, more than compensating for slight decline in Q1

Comment

- Statista with accelerated revenue growth driven by platform business
- Asam with broadly stable revenues in Q2; solid growth in Retail and eCom channels compensate for decline in international wholesale distribution
- EBITDA (adj.) with decrease resulting from lower gross profit from wholesale distribution and higher marketing intensity at Asam

Outlook

Outlook

- **For Q3 2024, we expect organic revenue development as follows:**
 - OoH around +10% (Classic/Services low single digit, DOoH more than +20%, Digital and Dialog up mid-single digit)
 - Statista back to double digit growth (~ mid to high teens); Asam DACH up high single digit but in total down high single digit due to development in international wholesale
- **Full-year guidance: OoH exceeding the initial expectation as published in our Full-year guidance by 40 Million Euro. On group level this will be offset by lower Asam sales in a non-core medical wholesale product in China.**
 - Organic revenue growth noticeably higher than 2023 (+7.5%) and substantial operational leverage based on:
 - EBITDA margin (adj.) around prior year level & IFRS effects roughly stable
 - Therefore EBIT (adj.) with double the growth rate of EBITDA (adj.)
 - Free cash flow (adj.) significantly above growth rate of EBIT (adj.)
