# 29 Year Track Record of Steady Growth

# Approach to Real Estate Lending: Low Leverage & Shared Philosophy

- **Since 1929, we have a long history of lending in metro New York City**
  - Historically, credit quality has outperformed the industry and peers
    - From 2001-2024, median NCOs to average loans has been 4 bps compared to 59 bps for the industry
    - Median noncurrent loans to total loans has been 41 bps compared to 127 bps for the industry over the same period
- **The key to our success is shared client philosophy**
  - Our clients tend to have low leverage (average LTV is <35%) and strong cash flows (DCR is 1.9x for multifamily and investor CRE<sup>1</sup>)
  - Multigenerational – our clients tend to build portfolio of properties; generally, buy and hold
  - Borrowers are not transaction oriented – average real estate loan seasoning is over 8 years, which is generally passed the 5-year reset for multifamily and investor CRE loans
  - We do not attract clients who are short term borrowers, who want funds on future cash flows, or who are aggressively trying to convert rent regulated units into market rents

<sup>1</sup> Based on most recent Annual Loan Review

**Our conservative  
lending profile has  
served us well over  
many cycles.**

- Underwritten Net Operating Income (NOI) at origination includes forecasted increases in expenses and potential increase in interest rates, which limits overall leverage
- Cap rates were underwritten to 5%+ when rates were low
- Annual loan reviews performed; cash flows updated annually and a trend analysis on the portfolio is performed
- 30-year amortization
- Loans generally reset every 5 years (FHLB Advance rate + spread)

# Reconciliation of GAAP Earnings (Loss) and Core Earnings

## Non-cash Fair Value Adjustments to GAAP Earnings

The variance in GAAP (loss) earnings and core earnings is partly driven by the impact of non-cash net gains and losses from fair value adjustments. These fair value adjustments relate primarily to borrowings carried at fair value under the fair value option.

Core Net Income, Core Diluted EPS, Core ROAE, Core ROAA, Pre-provision, Pre-tax Net Revenue, Core Net Interest Income FTE, Core Net Interest Margin FTE, Core Interest Income and Yield on Total Loans, Core Noninterest Income, Core Noninterest Expense and Tangible Book Value per common share are each non-GAAP measures used in this presentation. A reconciliation to the most directly comparable GAAP financial measures appears below in tabular form. The Company believes that these measures are useful for both investors and management to understand the effects of certain interest and noninterest items and provide an alternative view of the Company's performance over time and in comparison, to the Company's competitors. These measures should not be viewed as a substitute for net income. The Company believes that tangible book value per common share is useful for both investors and management as this measure is commonly used by financial institutions, regulators and investors to measure the capital adequacy of financial institutions. The Company believes this measure facilitates comparison of the quality and composition of the Company's capital over time and in comparison, to its competitors. This measure should not be viewed as a substitute for total shareholders' equity.

These non-GAAP measures have inherent limitations, are not required to be uniformly applied and are not audited. They should not be considered in isolation or as a substitute for analysis of results reported under GAAP. These non-GAAP measures may not be comparable to similarly titled measures reported by other companies.
