

## 1. Purpose, application and objective

This packaging instruction regulates the requirements for packaging materials and products that are delivered to WashTec. The ultimate objective of the recycling law is the avoidance of waste. By conserving resources and using sustainable packaging and filling materials, the environmental impact is further reduced.

## 2. Scope

This packing instruction applies to all suppliers who supply materials and products to WashTec Cleaning Technology GmbH as well as to AUWA Chemie GmbH.

## 3. Basic information

In principle, the current version of the German packaging law is always to be applied. The protection of goods / materials continues to have the highest priority, while complying with WashTec's expectations of its suppliers and partners.

## 4. WashTec's expectations

- Optimum protection of the packaged goods without wasting material → Economical use of resources
  - The use of:
    - Returnable packaging
    - Materials from renewable resources
    - Reusable packaging materials
    - Recyclable packaging materials and packaging aids
- 
- The abandonment of:
    - Materials of concern to health
    - Styrofoam and packaging chips
    - Chlorine bleached, paraffinized, oiled or bituminized materials
    - Oversized shipping packages
    - Fresh fibre paper
    - Unnecessary material mixtures
    - Styrofoam / foam rubber
    - Plastics such as foam and bubble wrap
  - Actively express potential for improvement regarding the optimisation of packaging

## 5. Conclusion

**Joint optimisation of packaging with the greatest possible benefit for the product and the environment.**
