Q1 prelims: Bellingham pushes profitability; chg.

On Friday, Borussia Dortmund released preliminary Q1 results which were largely in line with our estimates. Here are the key takeaways:

Q1 sales slightly decreased by 1.9% yoy, coming in at € 102.3m (eNuW: € 101.8m). In detail: Sales from Match Operations decreased 18.9% yoy to € 7.7m (eNuW: € 9.0m) as the club only played three home games compared to five in Q1'22/23. The same applies for sales from TV Marketing (-17.3% yoy to € 37.8m) and advertising (-7.2% yoy to € 31.0m). On the other side, merchandising revenues grew by 91.4% yoy to € 15.5m (eNuW: € 8.7m) which is mainly explained by sales of a special edition jersey which the club launched earlier this year. Moreover, sales in the Conference, Catering and Miscellaneous segment increased by 35.5% yoy to € 10.3m following a pick-up in company events.

Q1 EBITDA came in at € 79.4m (eNuW: € 79.8m) implying a 77.4% EBITDA margin (vs 70.3% in Q1 22/23). The strong margin improvement was mainly due to an increased net transfer income (+33% yoy to € 82.3m) following the transfer of Jude Bellingham to Real Madrid which offset increased other operating expenses (+21% to € 36.6m) following the cost intensive US marketing tour in summer as well as higher personnel expenses.

On this basis, the company should be well on track to reach their FY targets of >€ 427m sales (eNuW: € 431m), € 104-114 EBITDA (eNuW: € 133m) and € 15-25m EBT (eNuW: € 24.3m). Mind you, that we conservatively forecast BVB to miss out on the Champions League knock-out stage, leaving some upside to our estimates on the table should the team improve their performance in the competition.

That said, the team's performance on the pitch leave a positive impression so far, despite the recent defeat against rivals Bayern, as the club is unbeaten in 13 out of 15 games this season. Against this backdrop, BVB should be set for a Top-4 finish this season, which will be crucial amidst the increased premium payments in the Champions League starting next season.

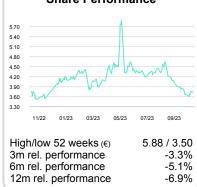

Valuation continues to look undemanding, as the stock is trading at only 1.0x EV/Sales 2023/24, a notable discount to its peers Juventus (2.0x), Olympique Lyon (2.3x) and Manchester United (4.3x).

BUY with an unchanged PT of € 5.50 based on DCF.

4. Information Concerning the Methods of Valuation/Update

The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made.

The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate of 7.5%. The operating cash flow is calculated as EBITDA less maintenance capex and taxes.

Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjust-

ment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value.

NuWays AG uses the following three-step rating system for the analysed companies:

Buy: Sustainable upside potential of more than 20% within 12 months

Sell: Sustainable downside potential of more than 20% within 12 months.

Hold: Upside/downside potential is limited. No immediate catalyst visible.
