

Strategy & Product Session

February 8, 2024

Forward-looking statements

This presentation contains forward-looking statements including, among other things, statements regarding F5's future financial performance including revenue, revenue growth, profitability, earnings growth, earnings per share expectations, future customer demand and spending, and the performance and benefits of the Company's products. These, and other statements that are not historical facts, are forward-looking statements. These forward-looking statements are subject to the safe harbor provisions created by the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those projected in the forward-looking statements as a result of certain risk factors. Such forward-looking statements involve risks and uncertainties, as well as assumptions and other factors that, if they do not fully materialize or prove correct, could cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements.

Such factors include, but are not limited to: customer acceptance of offerings; continued disruptions to the global supply chain resulting in inability to source required parts for F5's products or the ability to only do so at greatly increased prices thereby impacting our revenues and/or margins; global economic conditions and uncertainties in the geopolitical environment; overall information technology spending; F5's ability to successfully integrate acquired businesses' products with F5 technologies; the ability of F5's sales professionals and distribution partners to sell new solutions and service offerings; the timely development, introduction and acceptance of additional new products and features by F5 or its competitors; competitive factors, including but not limited to pricing pressures, industry consolidation, entry of new competitors into F5's markets, and new product and marketing initiatives by our competitors; increased sales discounts; the business impact of the acquisitions and potential adverse reactions or changes to business or employee relationships, including those resulting from the announcement of completion of acquisitions; uncertain global economic conditions which may result in reduced customer demand for our products and services and changes in customer payment patterns; litigation involving patents, intellectual property, shareholder and other matters, and governmental investigations; potential security flaws in the Company's networks, products or services; cybersecurity attacks on its networks, products or services; natural catastrophic events; a pandemic or epidemic; F5's ability to sustain, develop and effectively utilize distribution relationships; F5's ability to attract, train and retain qualified product development, marketing, sales, professional services and customer support personnel; F5's ability to expand in international markets; the unpredictability of F5's sales cycle; the ability of F5 to execute on its share repurchase program including the timing of any repurchases; future prices of F5's common stock; and other risks and uncertainties described more fully in our documents filed with or furnished to the Securities and Exchange Commission, including our most recent reports on Form 10-K and Form 10-Q and current reports on Form 8-K and other documents that we may file or furnish from time to time, which could cause actual results to vary from expectations.

The financial information contained in this document should be read in conjunction with the consolidated financial statements and notes thereto included in F5's most recent reports on Forms 10-Q and 10-K as each may be amended from time to time. All forward-looking statements in this press release are based on information available as of the date hereof and qualified in their entirety by this cautionary statement. F5 assumes no obligation to revise or update these forward-looking statements.

GAAP to non-GAAP presentation

In addition to financial information prepared in accordance with U.S. GAAP, this presentation also contains adjusted financial measures that we believe provide investors and management with supplemental information relating to operating performance and trends that facilitate comparisons between periods and with respect to projected information. These adjusted financial measures are non-GAAP and should be considered in addition to, but not as a substitute for, the information prepared in accordance with U.S. GAAP. We typically exclude certain GAAP items that management does not believe affect our basic operations and that do not meet the GAAP definition of unusual or non-recurring items. Other companies may define these measures in different ways. Further information relevant to the interpretation of adjusted financial measures, and reconciliations of these adjusted financial measures for historical data to the most comparable GAAP measures, may be found on F5's website at www.f5.com in the "Investor Relations" section. A reconciliation of non-GAAP guidance measures to corresponding GAAP measures is not available on a forward-looking basis due to the high variability and low visibility with respect to the charges which are excluded from these non-GAAP measures. For additional information, please see the appendix of this presentation.

On our agenda today...

Tom Fountain

EVP Global Services,
Chief Strategy Officer

1:05 – 1:20 PT

**Our Customers' Hybrid,
Multicloud, and AI Challenges**

Arul Elumalai

SVP & GM BIG-IP

1:20 – 2:05 PT

Our Portfolio Transformation and Opportunity

Kara Sprague

Chief Product Officer

Break

2:05 – 2:15 PT

Zeus Kerravala

Industry Analyst,
Founder ZK Research

2:15 – 2:30 PT

An Expert Perspective

Q&A with the Exec Team

Our customers' hybrid, multicloud, and AI challenges

Tom Fountain

EVP Global Services & Chief Strategy Officer

Takeaways from today's discussion

- 1** Our digital world is in crisis: the current multicloud “ball of fire” is untenable.
- 2** AI is an accelerant that will make the crisis exponentially worse.
- 3** To capitalize on this new reality, F5 invested early and transformed its portfolio.
- 4** F5's market opportunity is much larger and growing faster than 5 years ago.
- 5** F5's competitive position is stronger and more differentiated than ever before.
- 6** F5 is successfully executing land-and-expand motions across our portfolio.
- 7** F5 is positioned for sustainable revenue growth and committed to double-digit earnings growth.

Takeaways from today's discussion

1 Our digital world is in crisis: the current multicloud “ball of fire” is untenable.

2 AI is an accelerant that will make the crisis exponentially worse.

3 To capitalize on this new reality, F5 invested early and transformed its portfolio.

4 F5's market opportunity is much larger and growing faster than 5 years ago.

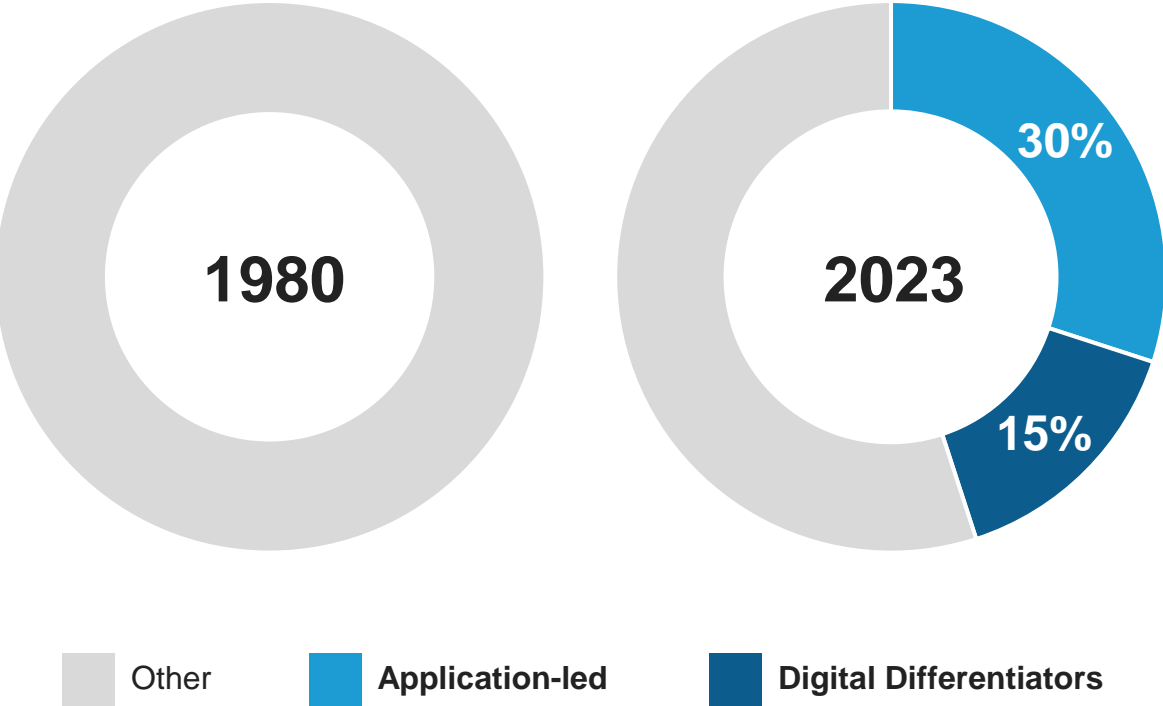

5 F5's competitive position is stronger and more differentiated than ever before.

6 F5 is successfully executing land-and-expand motions across our portfolio.

7 F5 is positioned for sustainable revenue growth and committed to double-digit earnings growth.

'Application-led' companies make up ~30% of the value of the U.S. S&P 500; another 15% is 'digital differentiators'

Mix of company type in the U.S. S&P index
Percent

Application-led examples

Digital differentiators examples

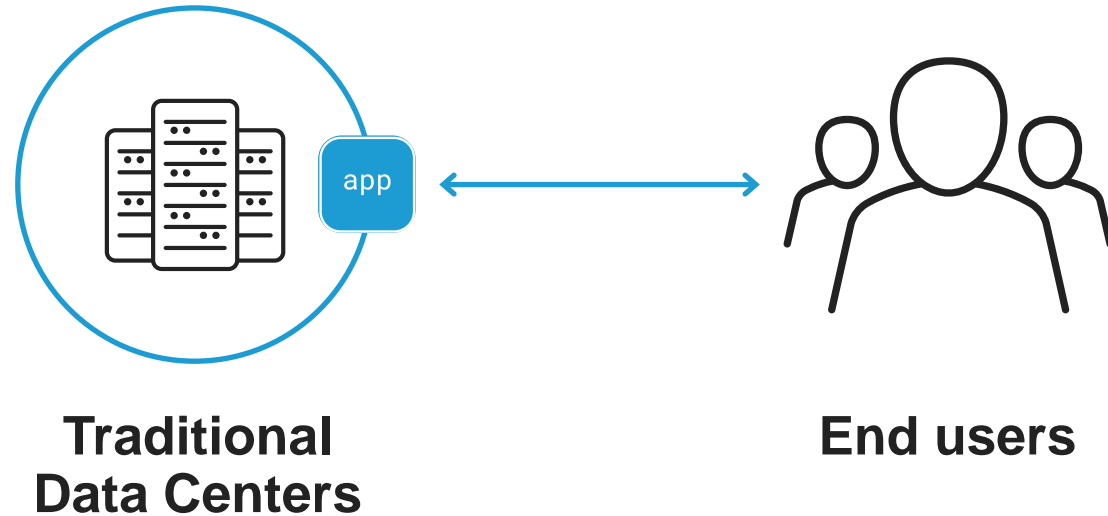

The number of apps and APIs continues to multiply

2023
1 billion
app instances
+
~1-2 APIs per
app instance

2027
2.3 billion
app instances
+
~3-5 APIs per
app instance

The way enterprises delivered and secured apps used to be more simple

Just 5 years ago, it was commonly assumed that all apps would soon be in the public cloud or consumed as SaaS

This cloud-based future promised several enticing outcomes

**Greater
business agility**

**Improved
TCO**

**Increased
uptime**

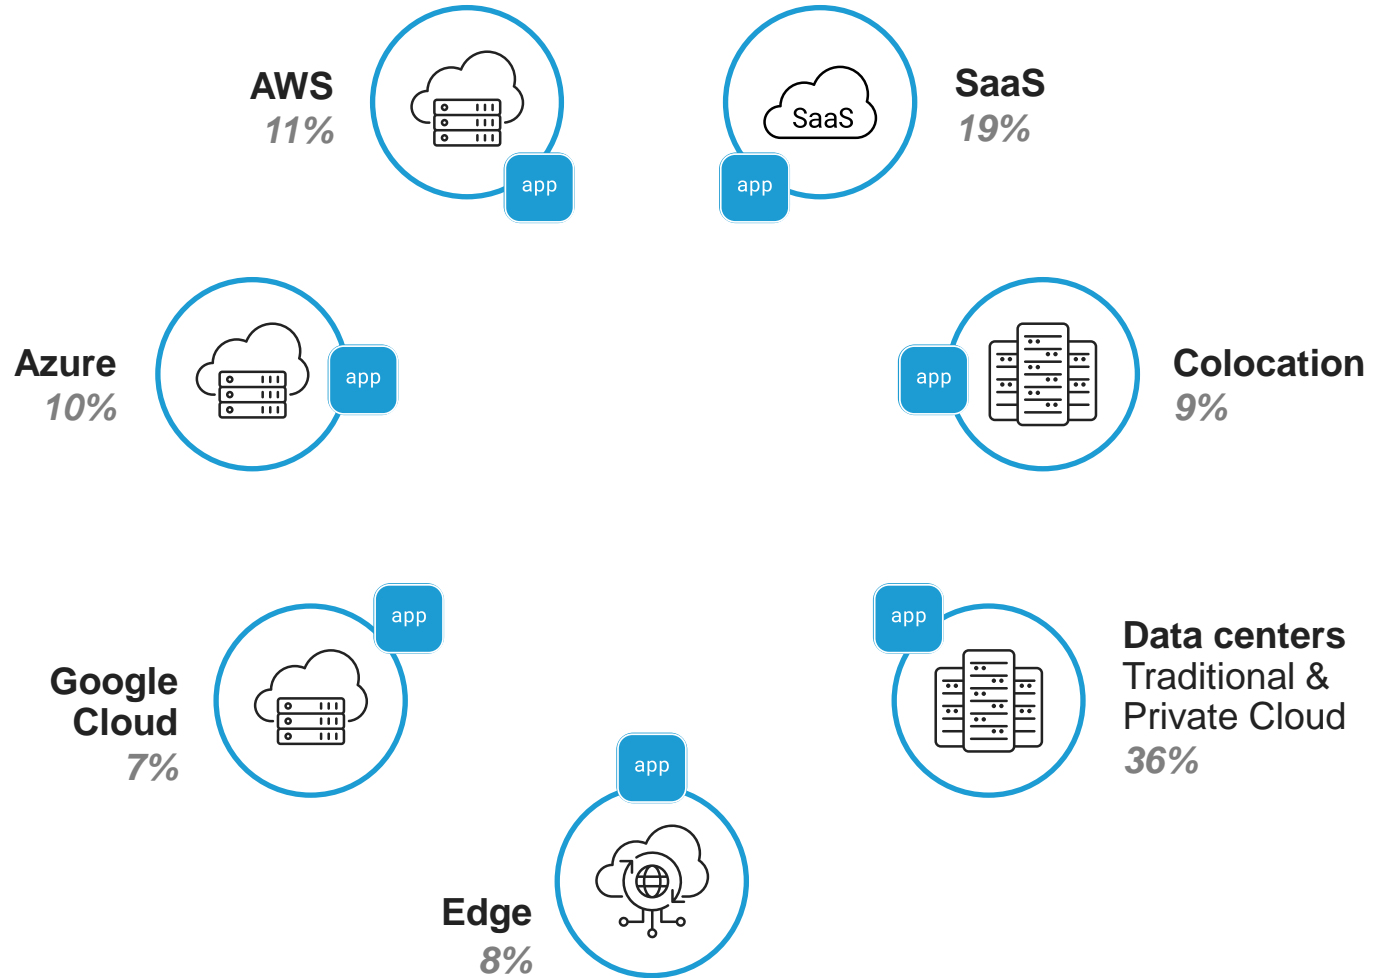

**More reliable
security**

**That prediction has proven
wrong on multiple levels**

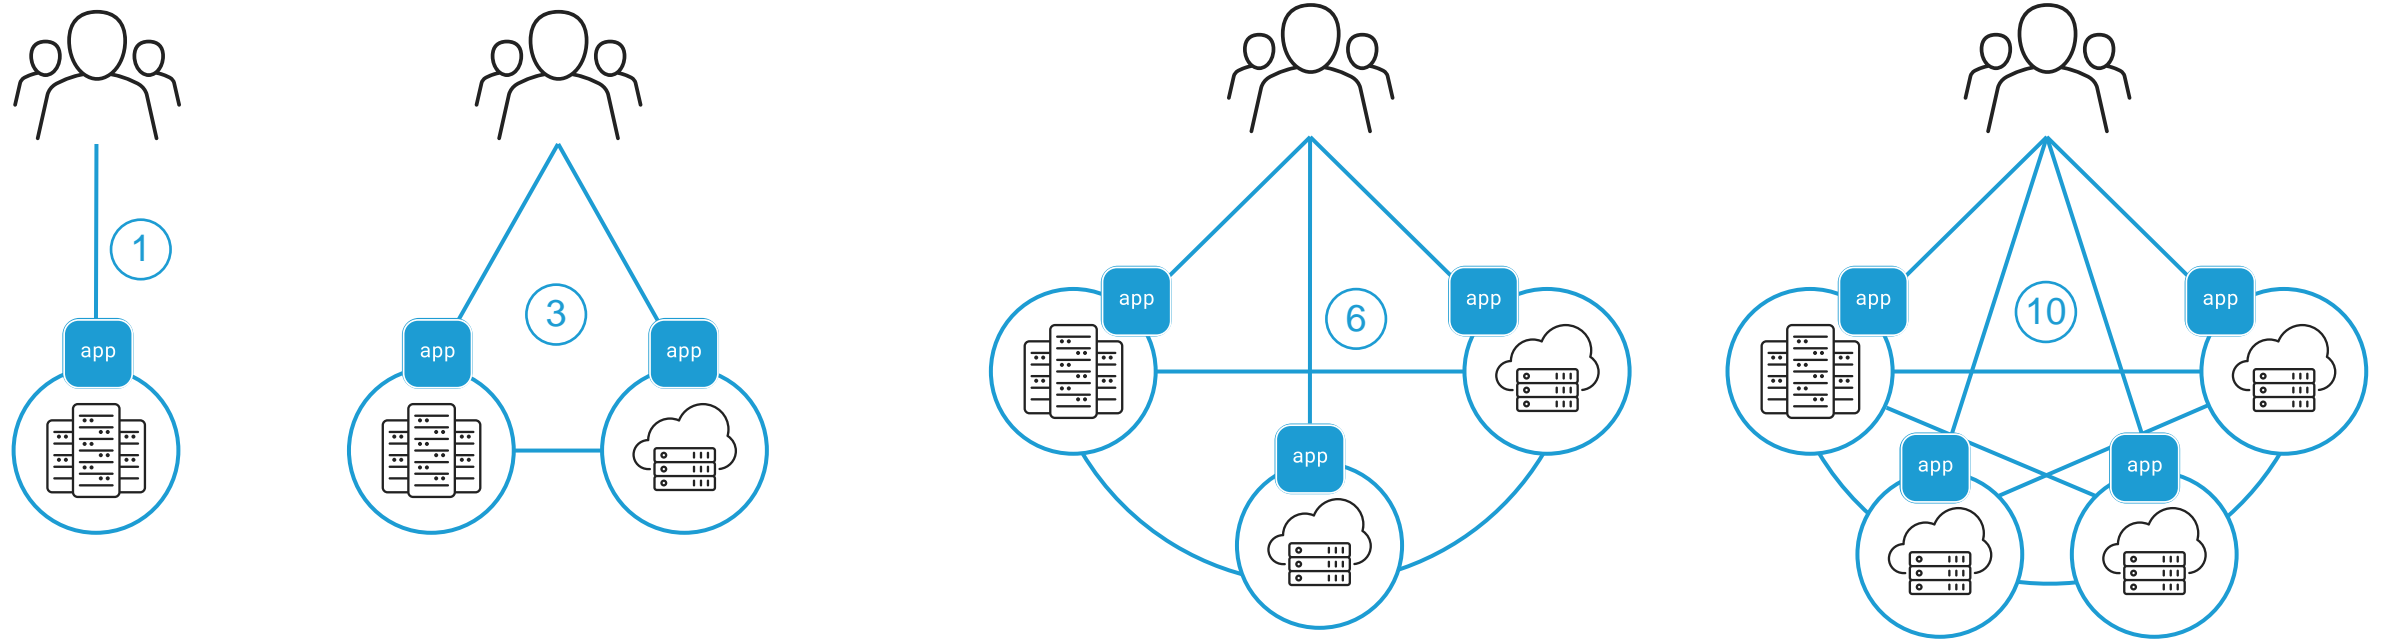

Apps now live in not one, but many environments

The median number of app environments managed by an enterprise is 4.5

With each new app environment, complexity rises exponentially

Enterprises deploying apps across 4 environments have ~10x more application traffic routes to manage and secure than those with just 1 environment

Apps and data are distributed across these environments and many apps are now container-native and fronted by APIs

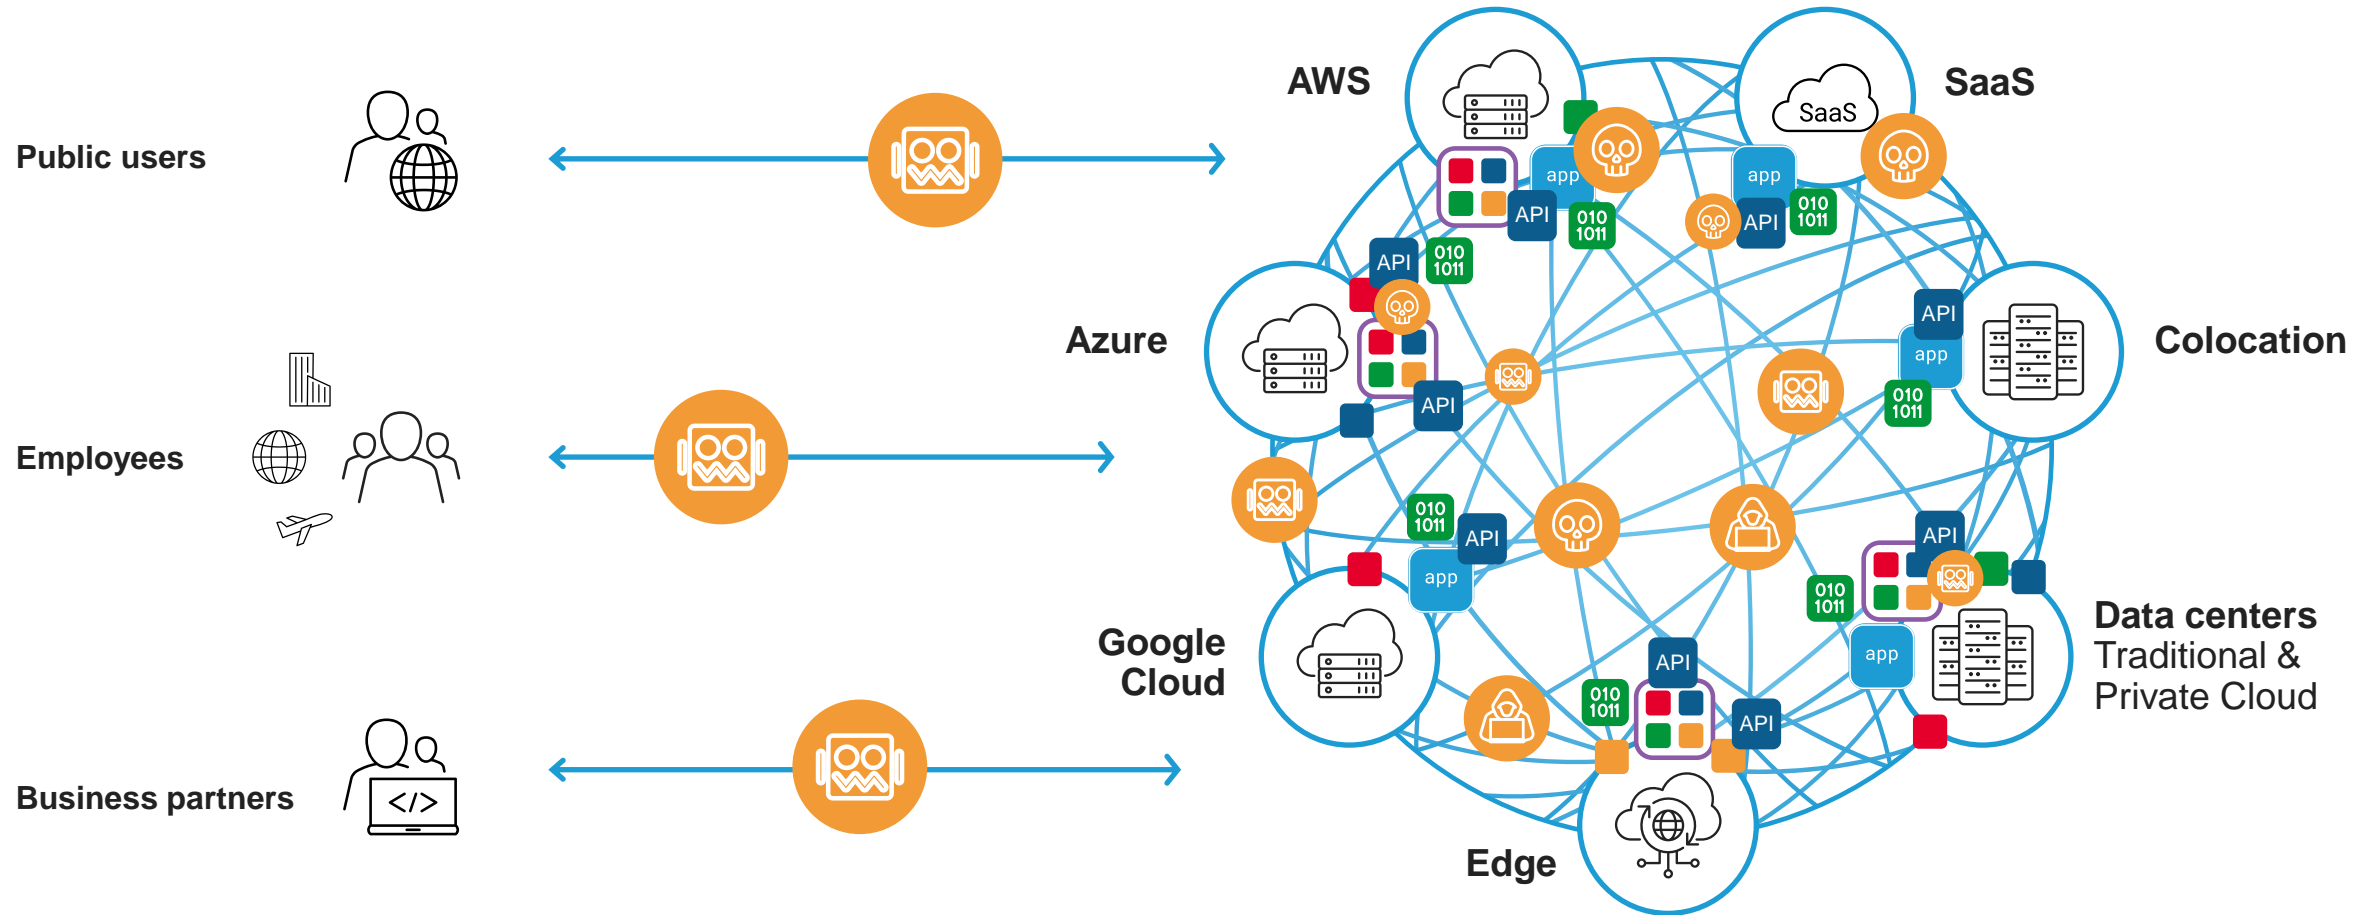

84% of enterprises are managing a mix of traditional and modern app architectures

% represents % of apps deployed/environment

This app and data distribution results in an expanded attack surface area

Takeaways from today's discussion

1 Our digital world is in crisis: the current multicloud “ball of fire” is untenable.

2 AI is an accelerant that will make the crisis exponentially worse.

3 To capitalize on this new reality, F5 invested early and transformed its portfolio.

4 F5's market opportunity is much larger and growing faster than 5 years ago.

5 F5's competitive position is stronger and more differentiated than ever before.

6 F5 is successfully executing land-and-expand motions across our portfolio.

7 F5 is positioned for sustainable revenue growth and committed to double-digit earnings growth.

AI brings a whole new set of distributed apps and APIs, which amplifies multi-cloud complexity and security risk

Growing number of applications

Growing number of APIs in front of applications

Increasing distribution of apps across hybrid and multicloud environments

Increasing cyber risk with more business value accessible via apps and APIs

AI brings a whole new set of distributed apps and APIs, which amplifies multi-cloud complexity and security risk

AI is a powerful accelerant for each of these secular trends

Growing number of applications

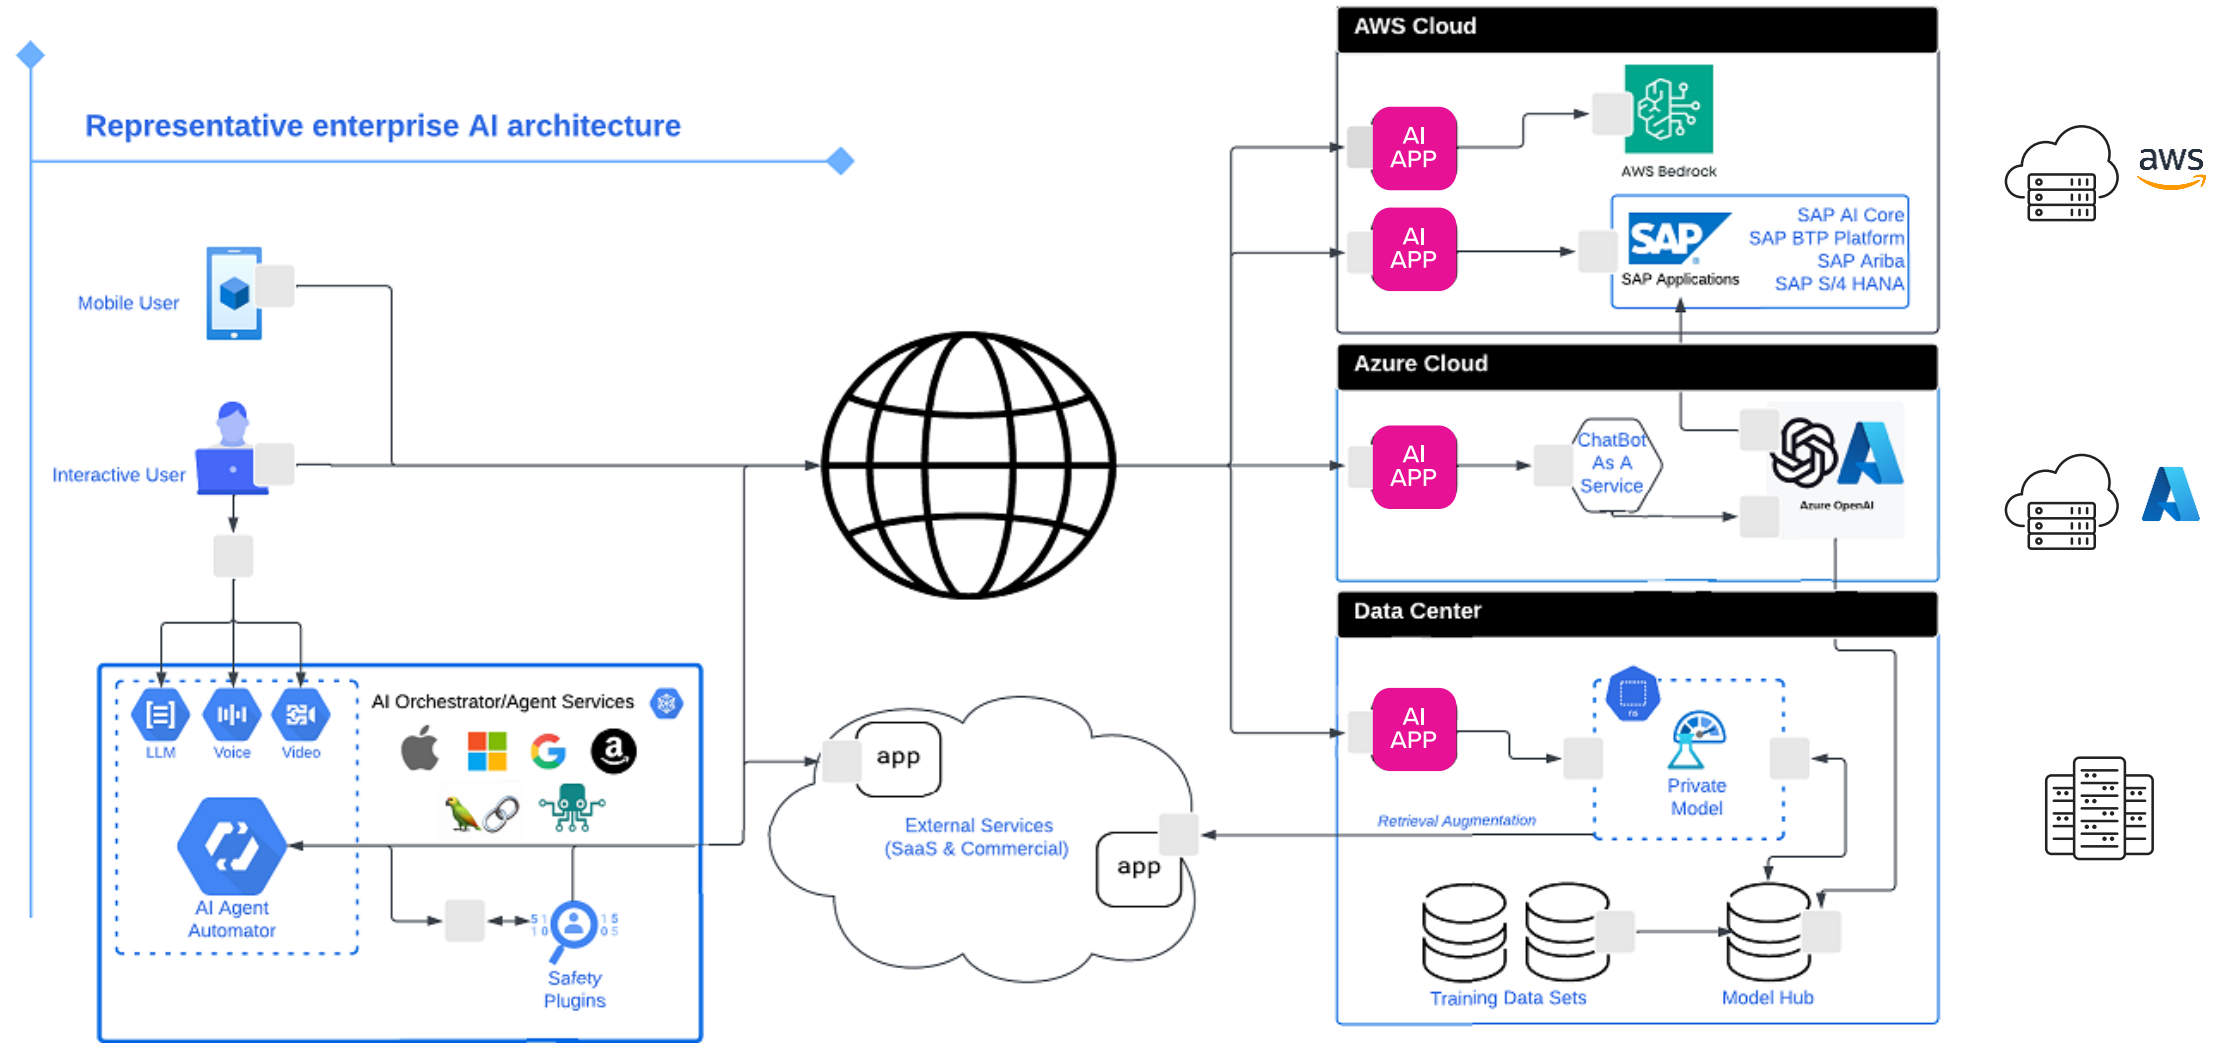

Growing number of APIs in front of applications

Increasing distribution of apps across hybrid and multicloud environments

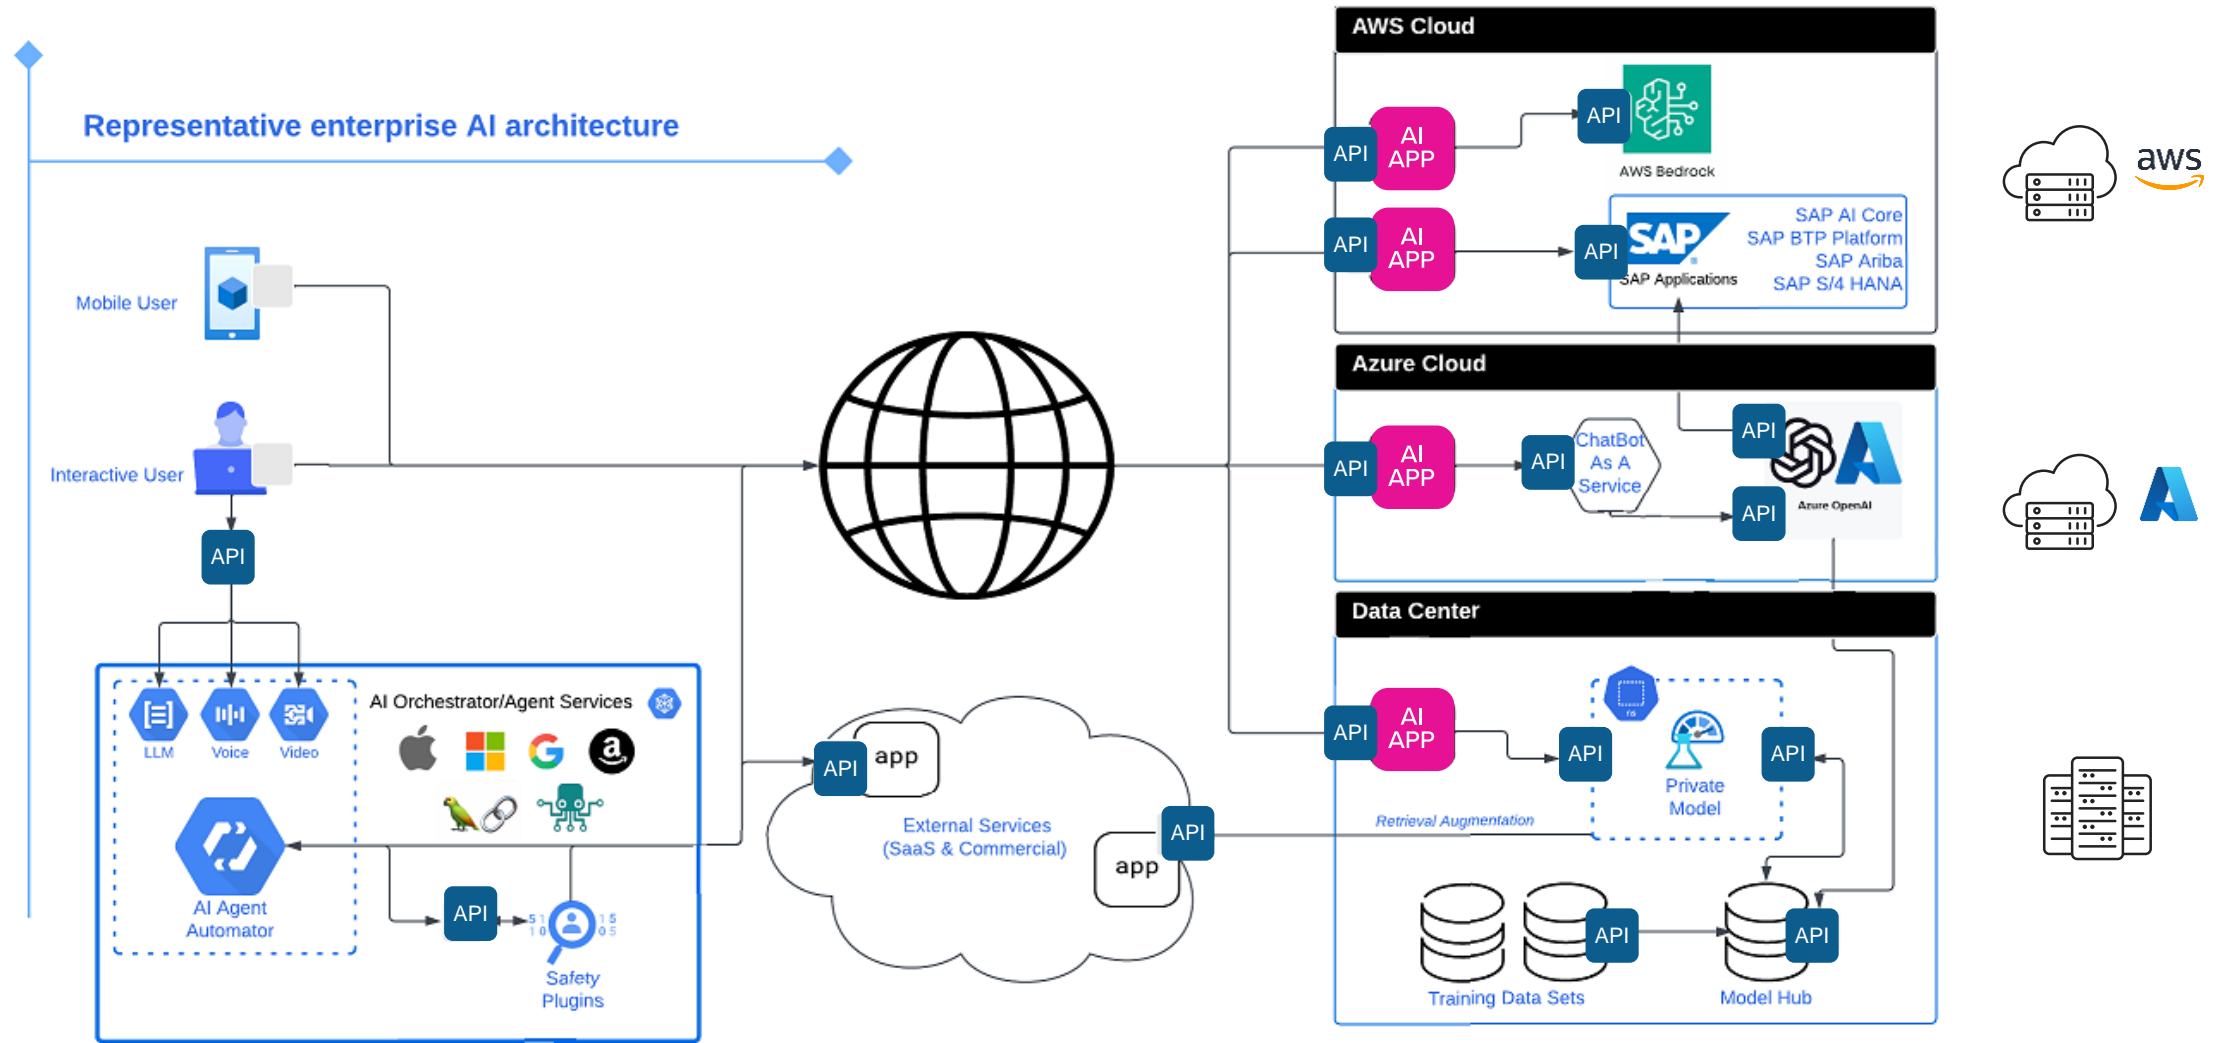

Increasing cyber risk with more business value accessible via apps and APIs

AI apps are highly distributed and every AI-powered experience might involve 10's of APIs

AI apps are highly distributed and every AI-powered experience might involve 10's of APIs

Enterprise adoption of AI technologies will unleash a flood of new AI-driven apps and an even greater number of APIs

2023 →

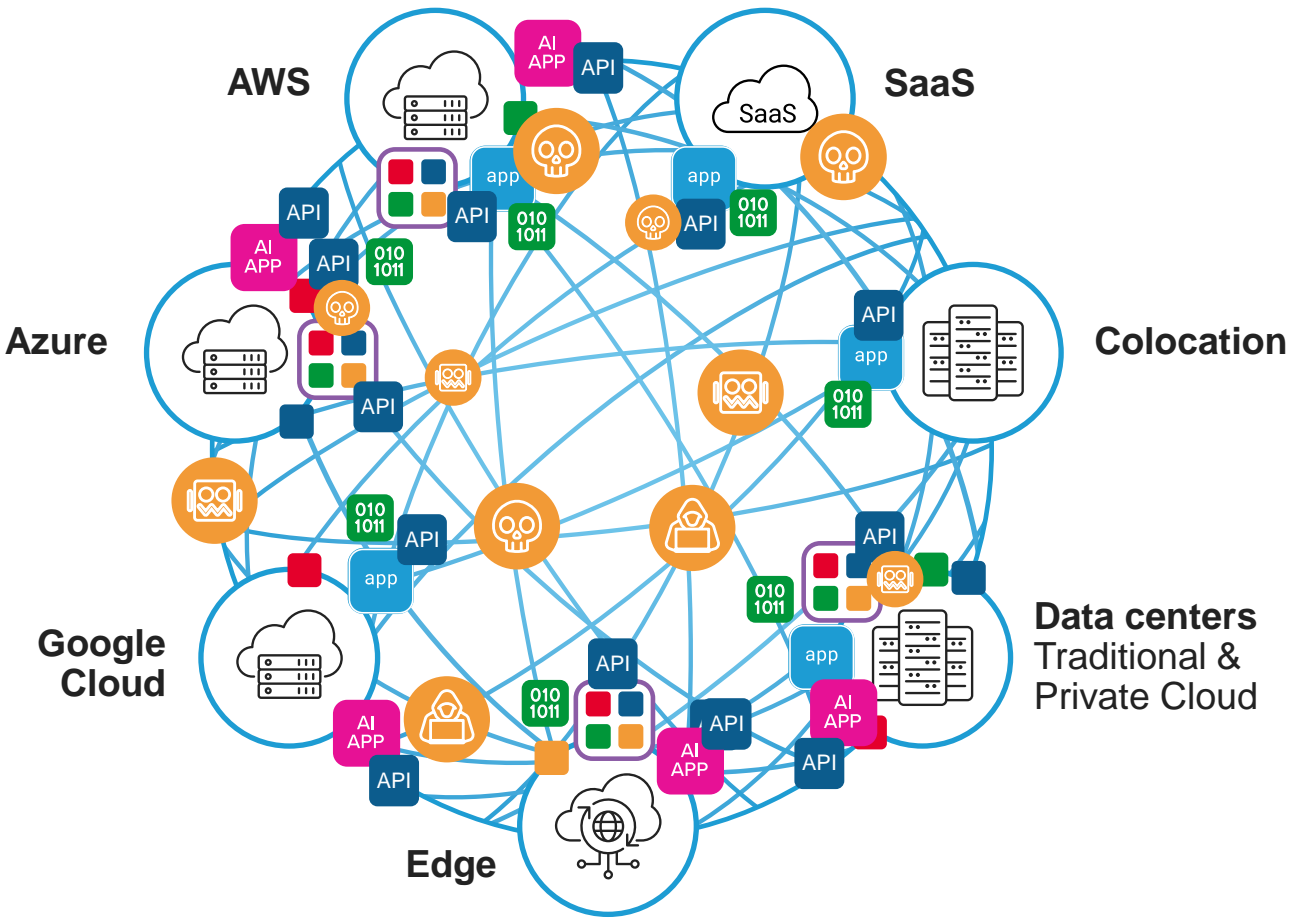

Development of AI models and services

2024 →

Infrastructure build-out in preparation for AI apps

2025+ →

Broad-based enterprise deployment of AI-driven apps

This complexity stops IT from operating at the speed of business

Manual tasks

Inconsistent security controls & operational siloes

Lack of available talent

Cloud costs and inefficient traffic routing

This is where enterprises thought they were going...

This is where enterprises thought they were going...

and this is where 9 in 10 have ended up

Our portfolio transformation and opportunity

Arul Elumalai

Senior Vice President and General Manager, BIG-IP

Kara Sprague

Chief Product Officer

Takeaways from today's discussion

1 Our digital world is in crisis: the current multicloud “ball of fire” is untenable.

2 AI is an accelerant that will make the crisis exponentially worse.

3 To capitalize on this new reality, F5 invested early and transformed its portfolio.

4 F5's market opportunity is much larger and growing faster than 5 years ago.

5 F5's competitive position is stronger and more differentiated than ever before.

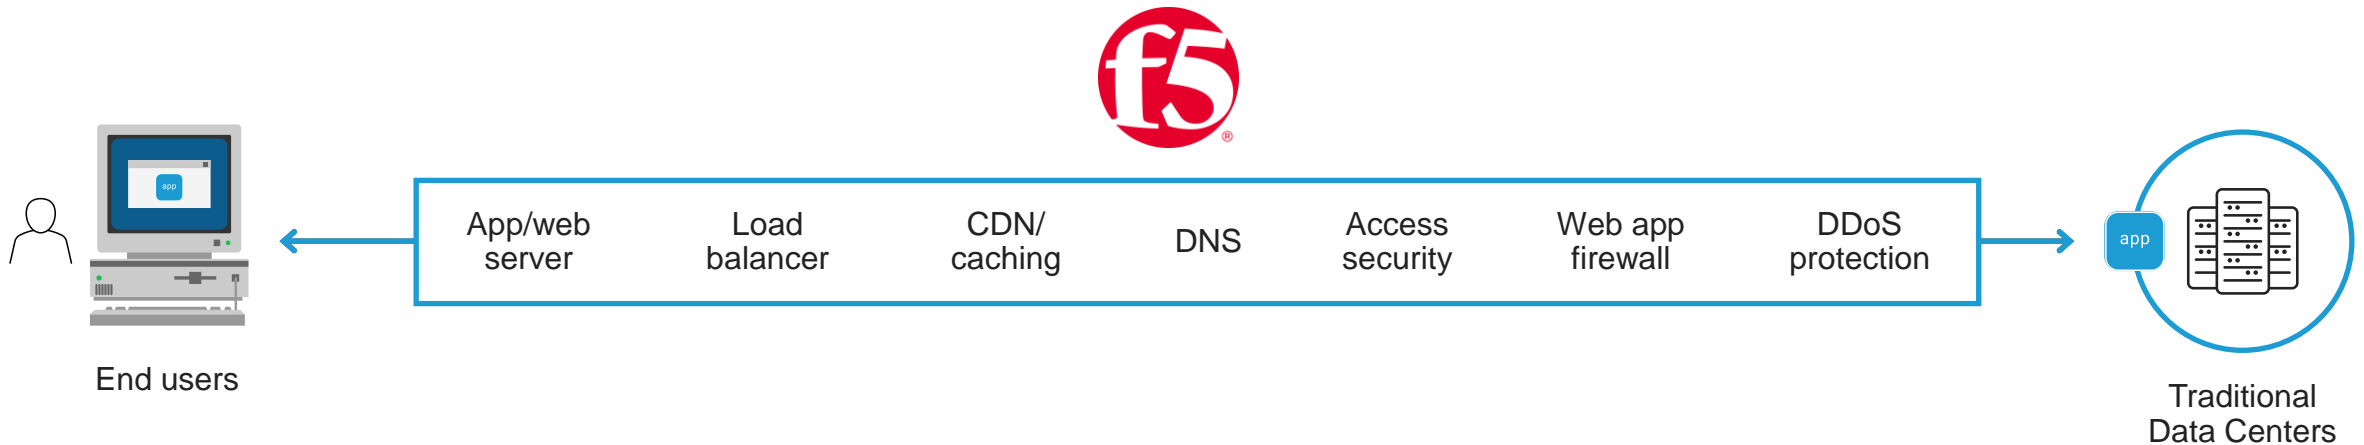

6 F5 is successfully executing land-and-expand motions across our portfolio.

7 F5 is positioned for sustainable revenue growth and committed to double-digit earnings growth.

Years ago, app traffic flowed from an on-premises location to end-users through a standard set of data path services

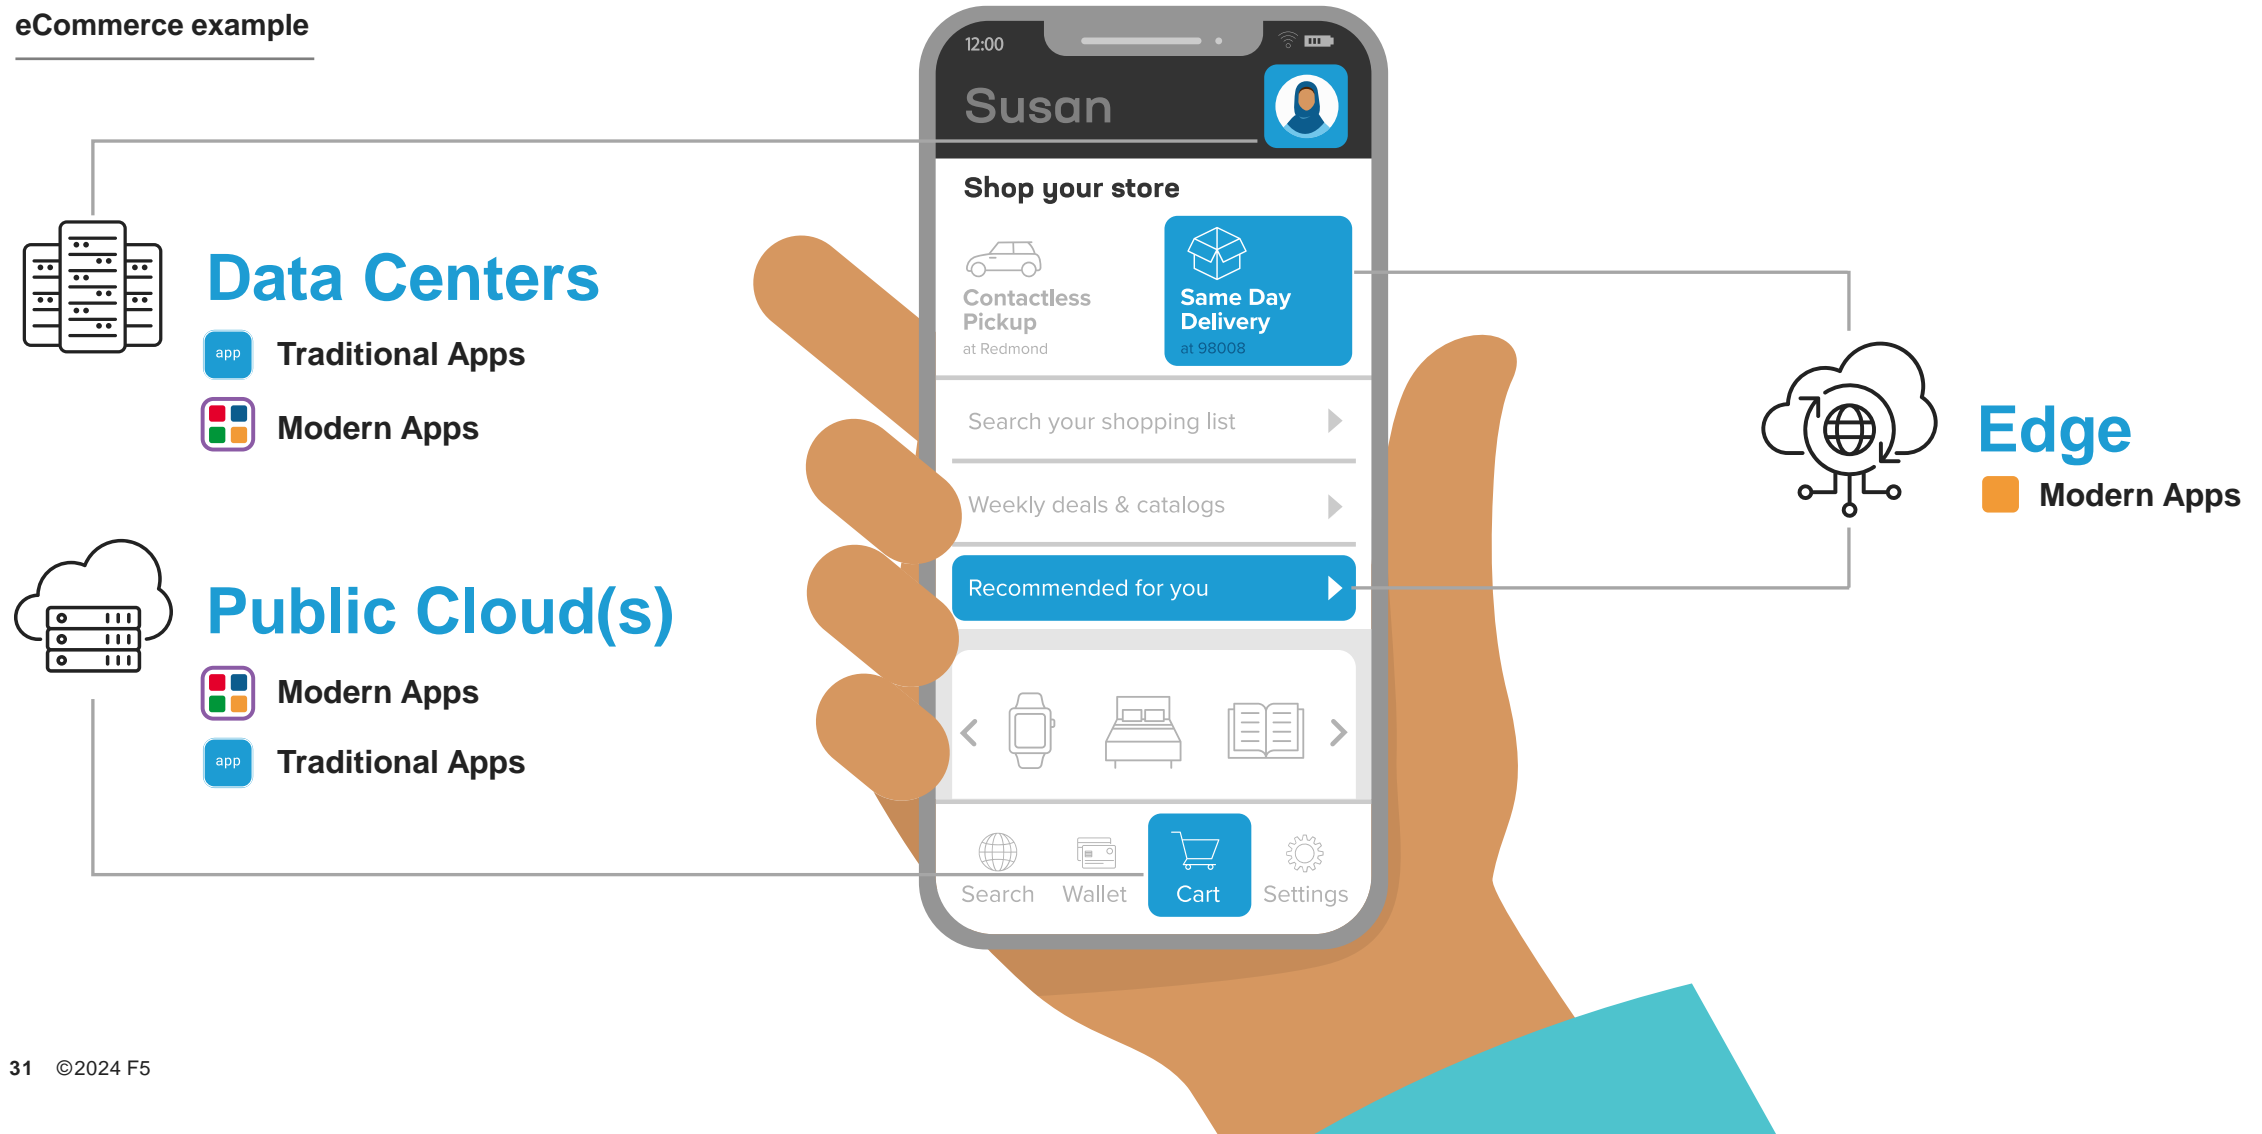

Years ago, app traffic flowed from an on-premises location to end-users through a standard set of data path services

Today's digital experiences are made up of many apps, spanning architectures and app environments

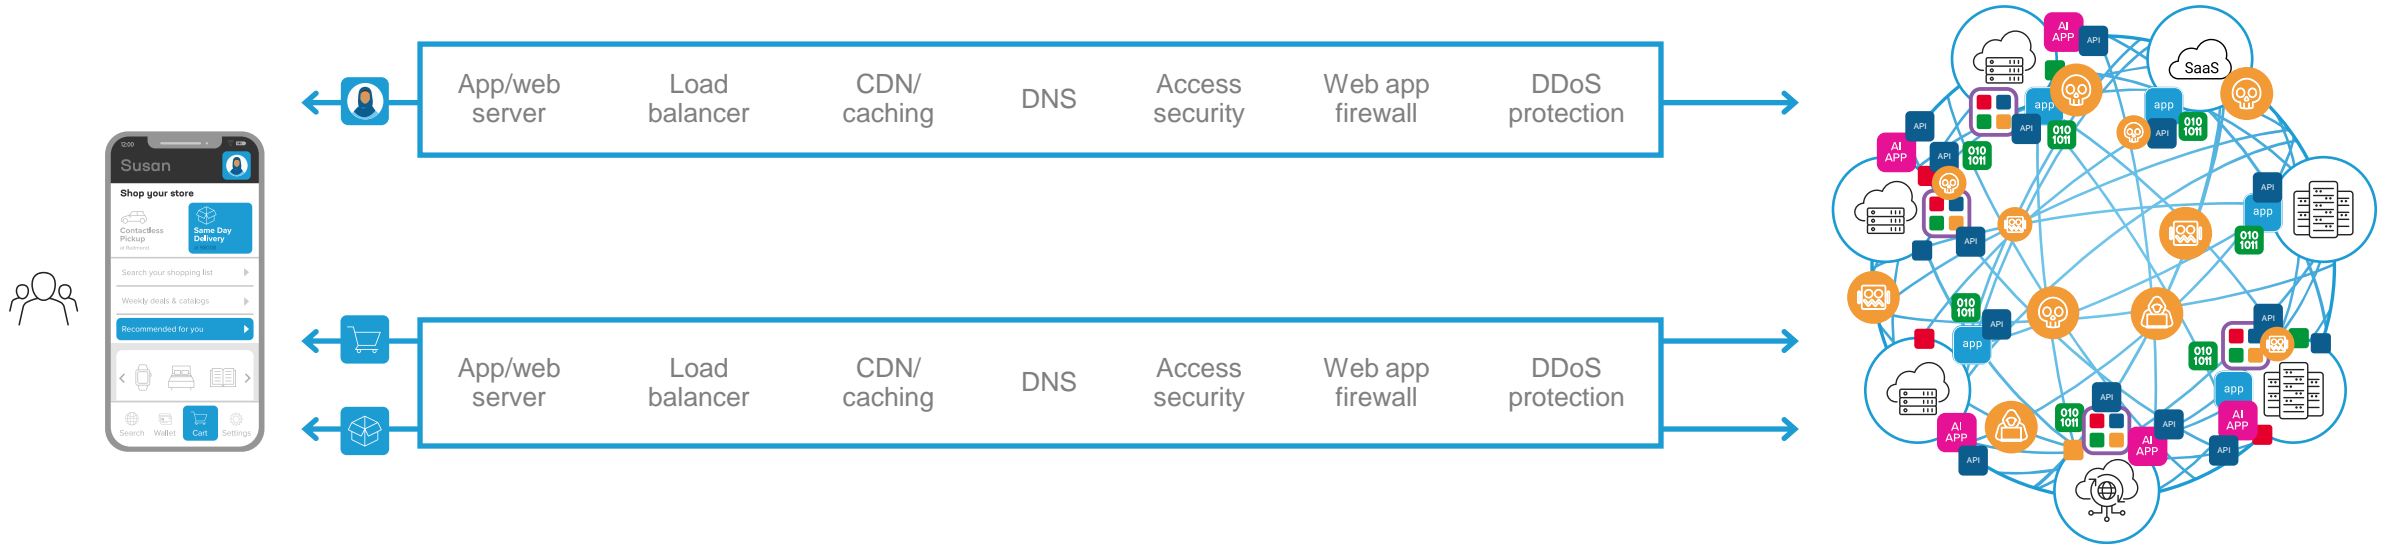

eCommerce example

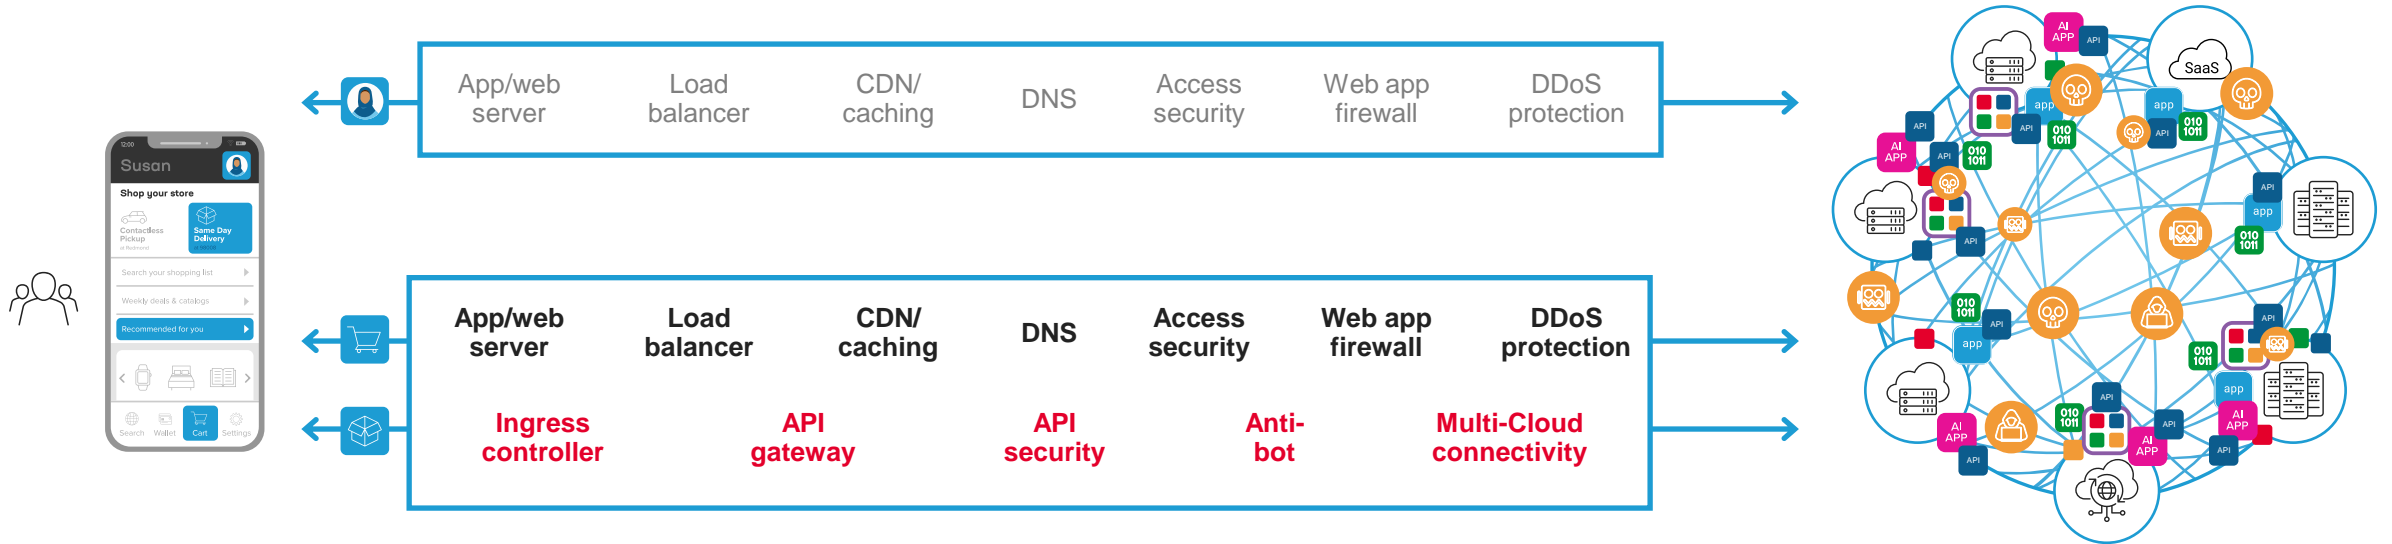

Each app's traffic traverses its own data path to the end user

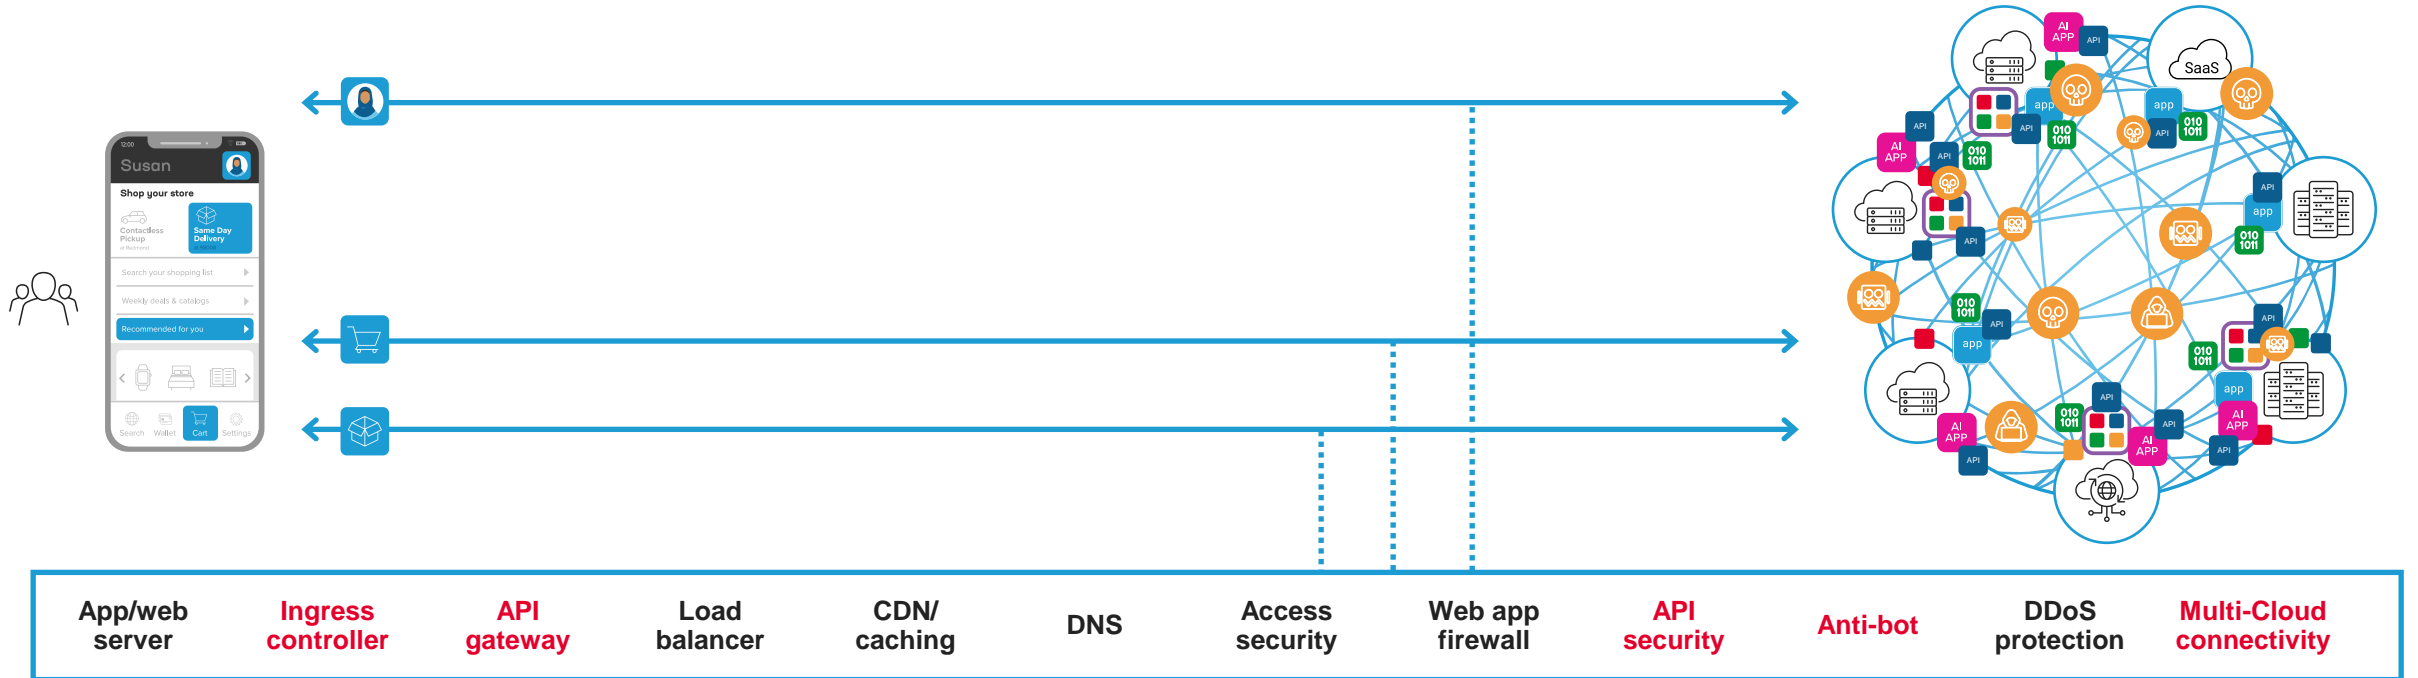

The new data paths require additional services

The new data paths require additional services

Each of these services are critical for delivering digital experiences

**To capitalize on this new reality,
F5 has transformed its portfolio**

We have fundamentally re-architected BIG-IP for the next decade

We have fundamentally re-architected BIG-IP for the next decade

Bringing the benefits of the cloud to deployable solutions

We acquired NGINX to address modern apps

F5 is the *only* solution provider that secures, delivers, and optimizes any app, any API, anywhere.

Traditional ADC & Security

citrix

AVI Networks
Now part of VMware

A10

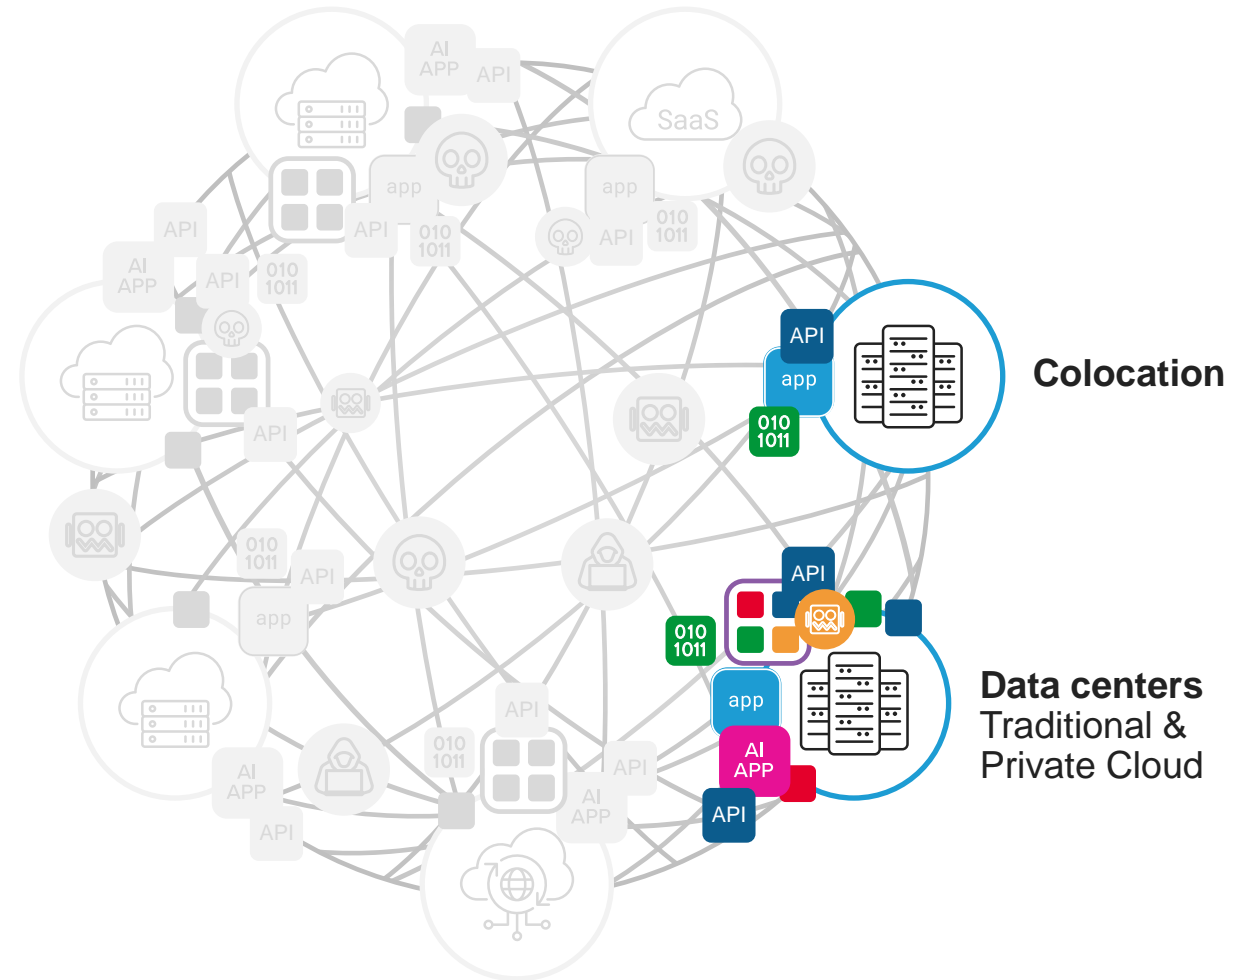

radware

F5 Advantages

Truly hybrid, multicloud v. limited reach

Investing and innovating v. limited innovation

Deployment and consumption model flexibility
v. restricting customer choice

Hyperscalers

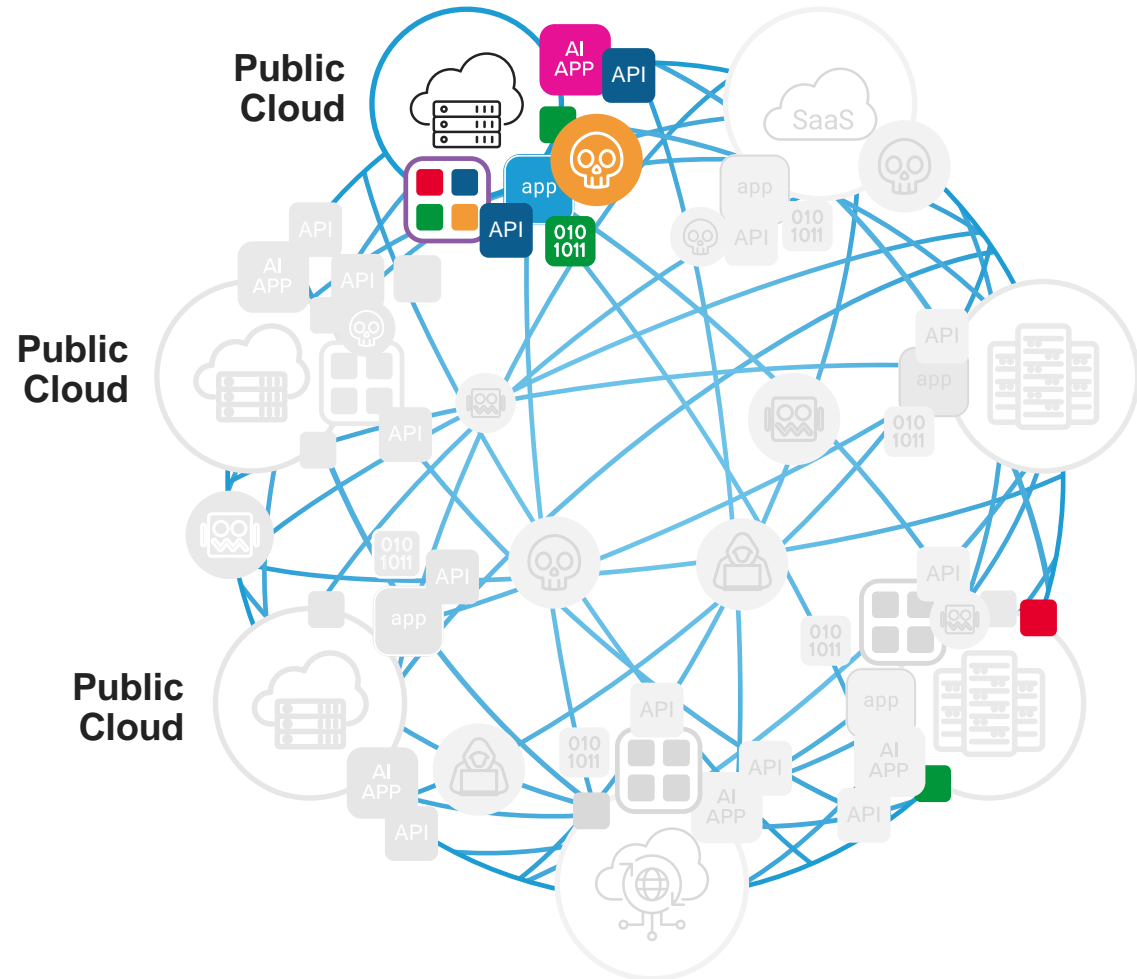

Google Cloud Platform

F5 Advantages

Truly hybrid, multicloud v. networking and security specific to their own cloud

Environment agnostic v no reach into third-party SaaS and Edge

On premises strength v. limited reach

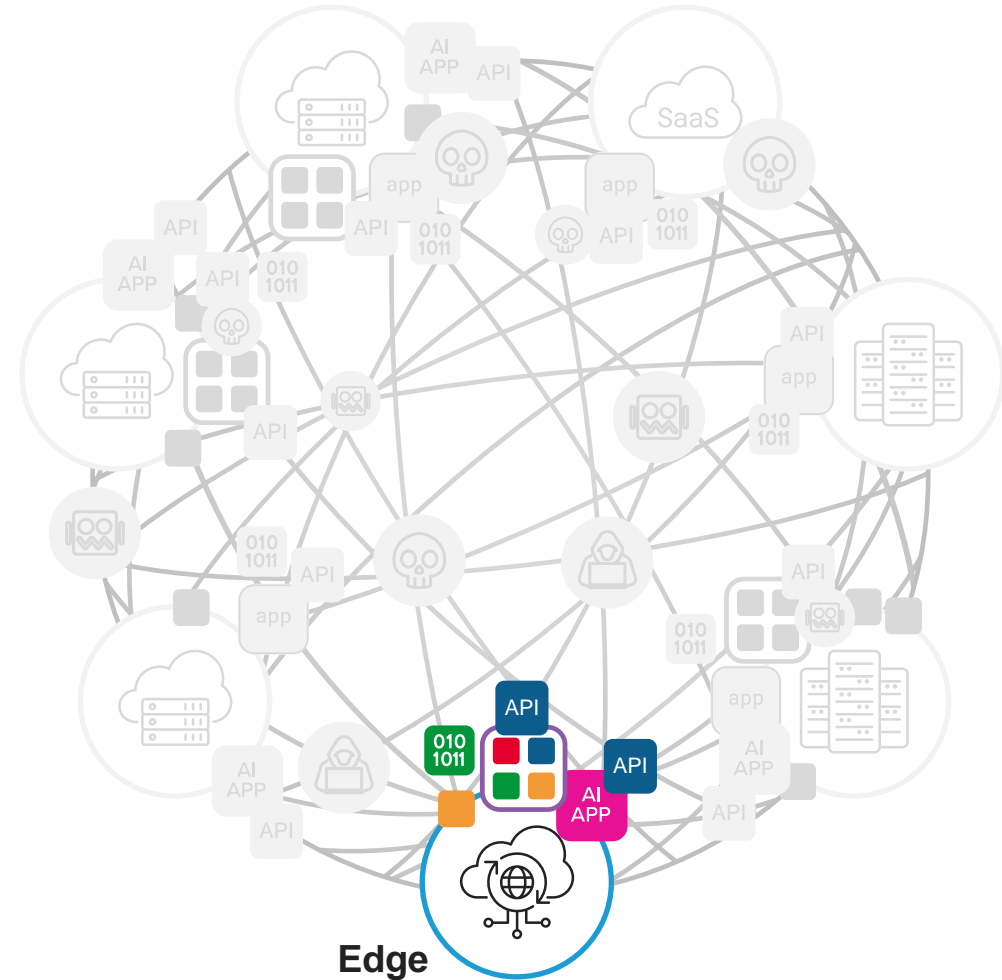

Edge & CDN

F5 Advantages

Truly hybrid, multicloud v. limited reach

Efficient traffic routing v. inefficient traffic routing

Multicloud Networking

Handful of private companies

F5 Advantages

Focus on networking infrastructure and applications v. focus on networking infrastructure

Best-in-class application security v. limited security capabilities

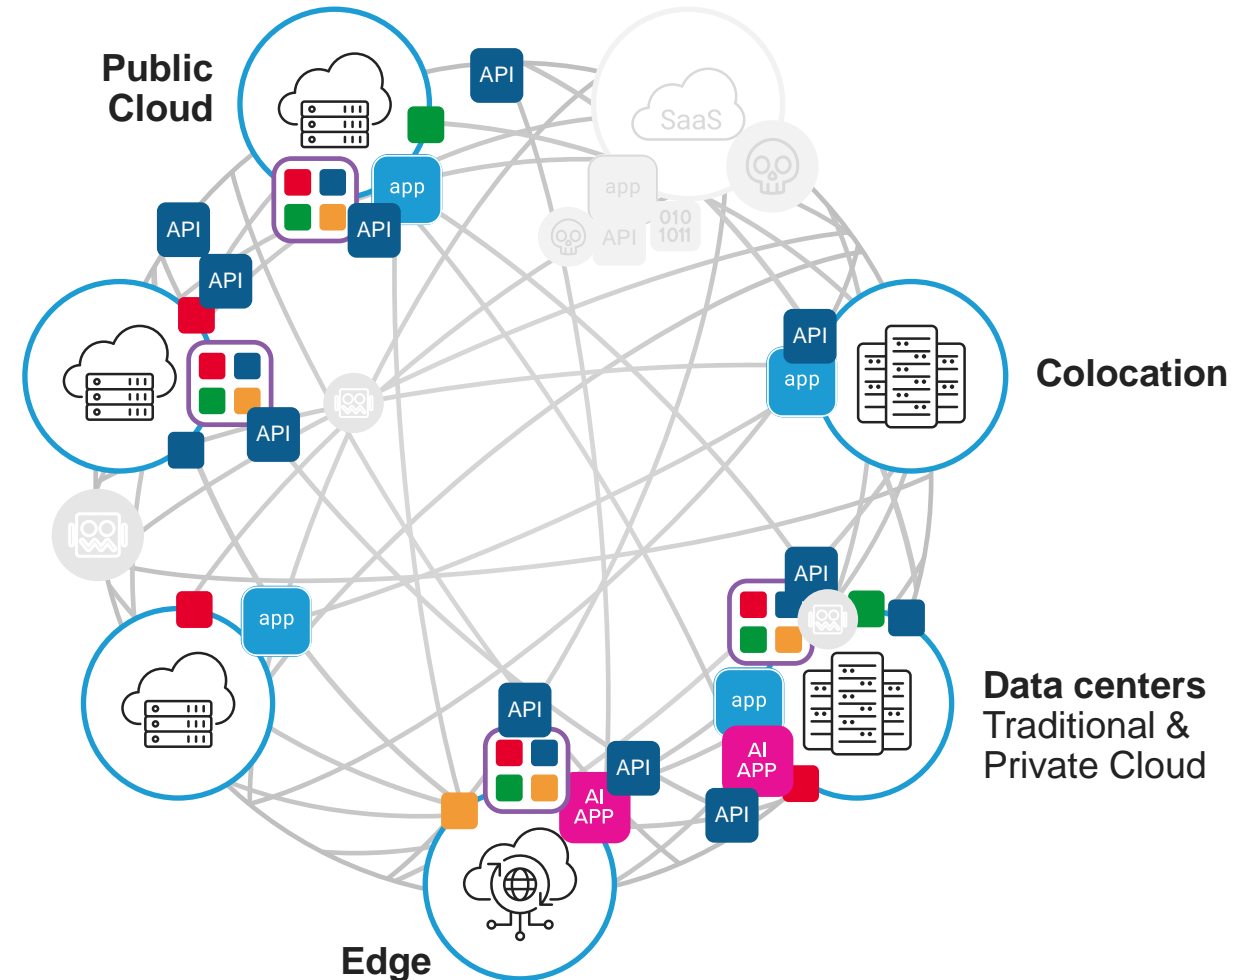

Multicloud App Platform Providers

vmware® / BROADCOM®

F5 Advantages

Truly hybrid, multicloud v. limited multi-cloud networking capabilities

Best-in-class application security v. no/limited application security capabilities

F5 is the *only* solution provider that secures, delivers, and optimizes any app, any API, anywhere.

F5 is building the industry's first distributed app security and delivery platform

Secure all apps and APIs everywhere

F5 is building the industry's first distributed app security and delivery platform

Secure all apps and APIs everywhere

F5 is building the industry's first distributed app security and delivery platform

Secure all apps and APIs everywhere

Connectivity for every user and app

F5 is building the industry's first distributed app security and delivery platform

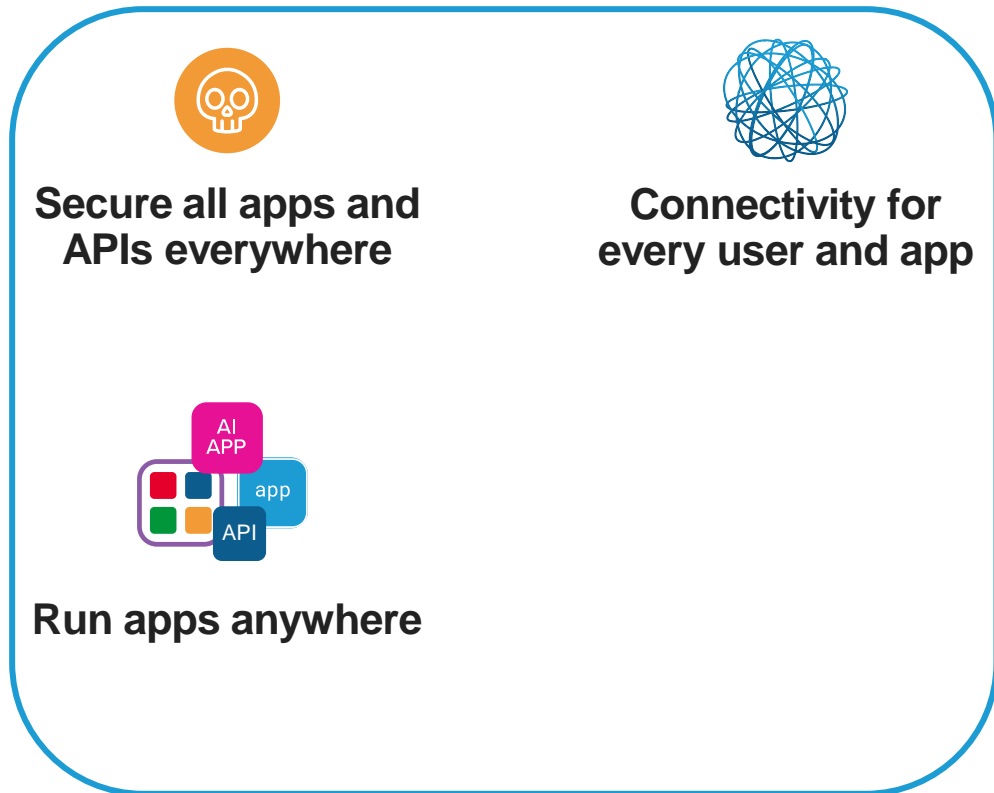

Secure all apps and APIs everywhere

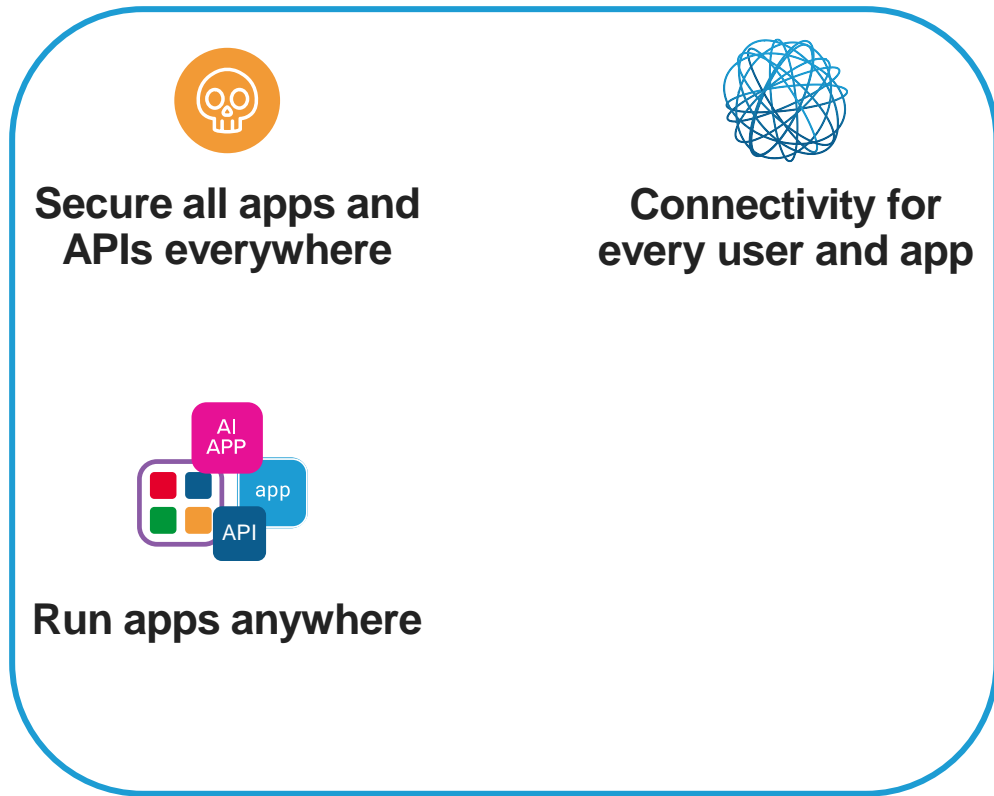

Connectivity for every user and app

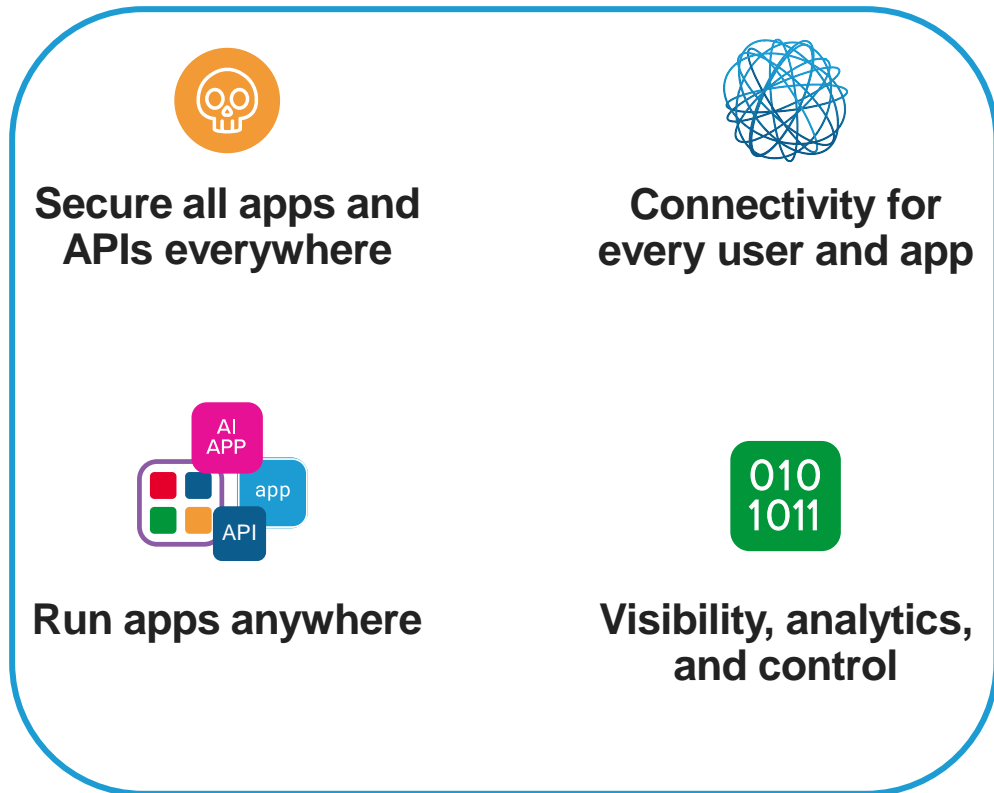

F5 is building the industry's first distributed app security and delivery platform

F5 is building the industry's first distributed app security and delivery platform

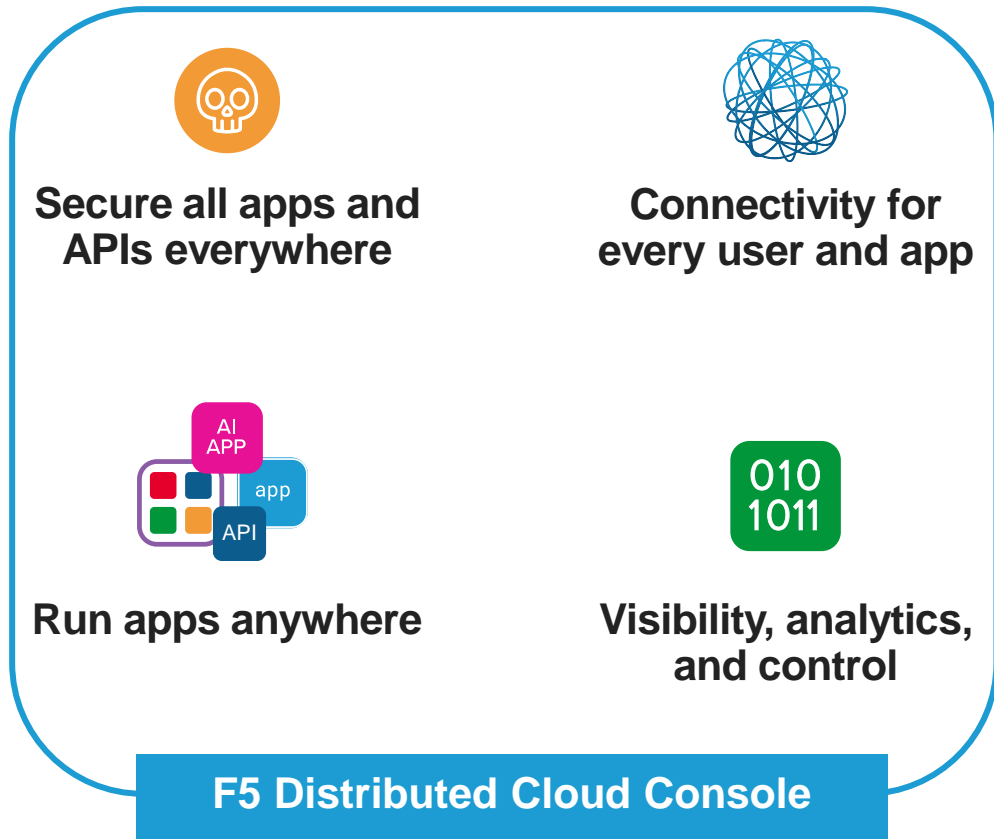

F5 is building the industry's first distributed app security and delivery platform

F5 is building the industry's first distributed app security and delivery platform

F5 is building the industry's first distributed app security and delivery platform

F5 abstracts the multi-cloud complexity and sets up IT to run at the speed of the business

Manual tasks

Automation

Inconsistent security controls & operational siloes

Security policy & operational consistency

Lack of available talent

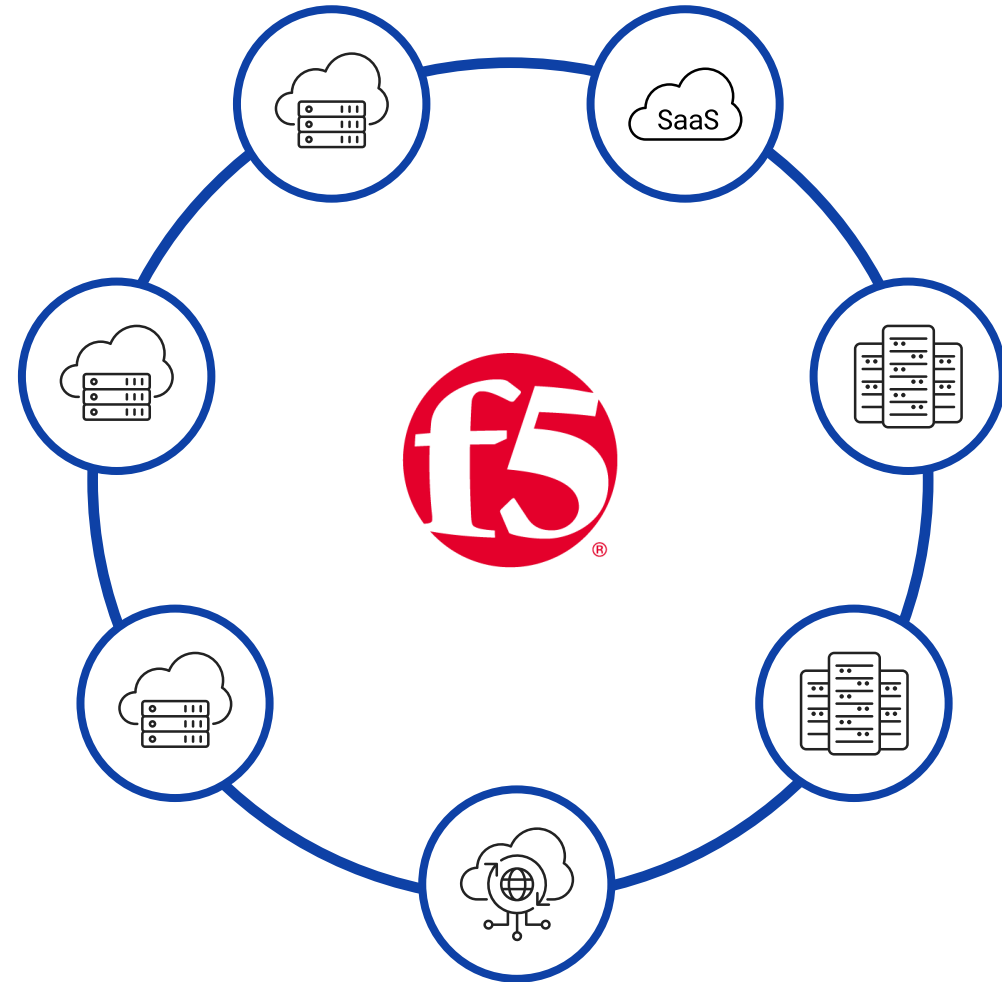

Optimized talent alignment

Cloud costs and inefficient traffic routing

Cloud savings & more efficient traffic routing

**This is what we mean by
'ridiculously easy' app
security and delivery**

And we are creating further differentiation with AI

API security

The industry's most comprehensive, AI-ready API security solution.

AI Data Fabric

F5 AI Data Fabric will make AI pervasive across all F5 offerings.

AI assistant

F5's AI assistant within F5 Distributed Cloud Console will serve as an intelligent partner to stretched IT and security teams.

Takeaways from today's discussion

1 Our digital world is in crisis: the current multicloud “ball of fire” is untenable.

2 AI is an accelerant that will make the crisis exponentially worse.

3 To capitalize on this new reality, F5 invested early and transformed its portfolio.

4 F5's market opportunity is much larger and growing faster than 5 years ago.

5 F5's competitive position is stronger and more differentiated than ever before.

6 F5 is successfully executing land-and-expand motions across our portfolio.

7 F5 is positioned for sustainable revenue growth and committed to double-digit earnings growth.

The number of BIG-IP customers also purchasing NGINX has doubled from 2020 to 2023

Customers of both F5 BIG-IP and F5 NGINX

50%

of NGINX customers
are also BIG-IP
customers

The number of customers purchasing BIG-IP and SaaS & Managed Services also doubled over the same time period

Customers of both F5 BIG-IP and F5 SaaS and Managed Services

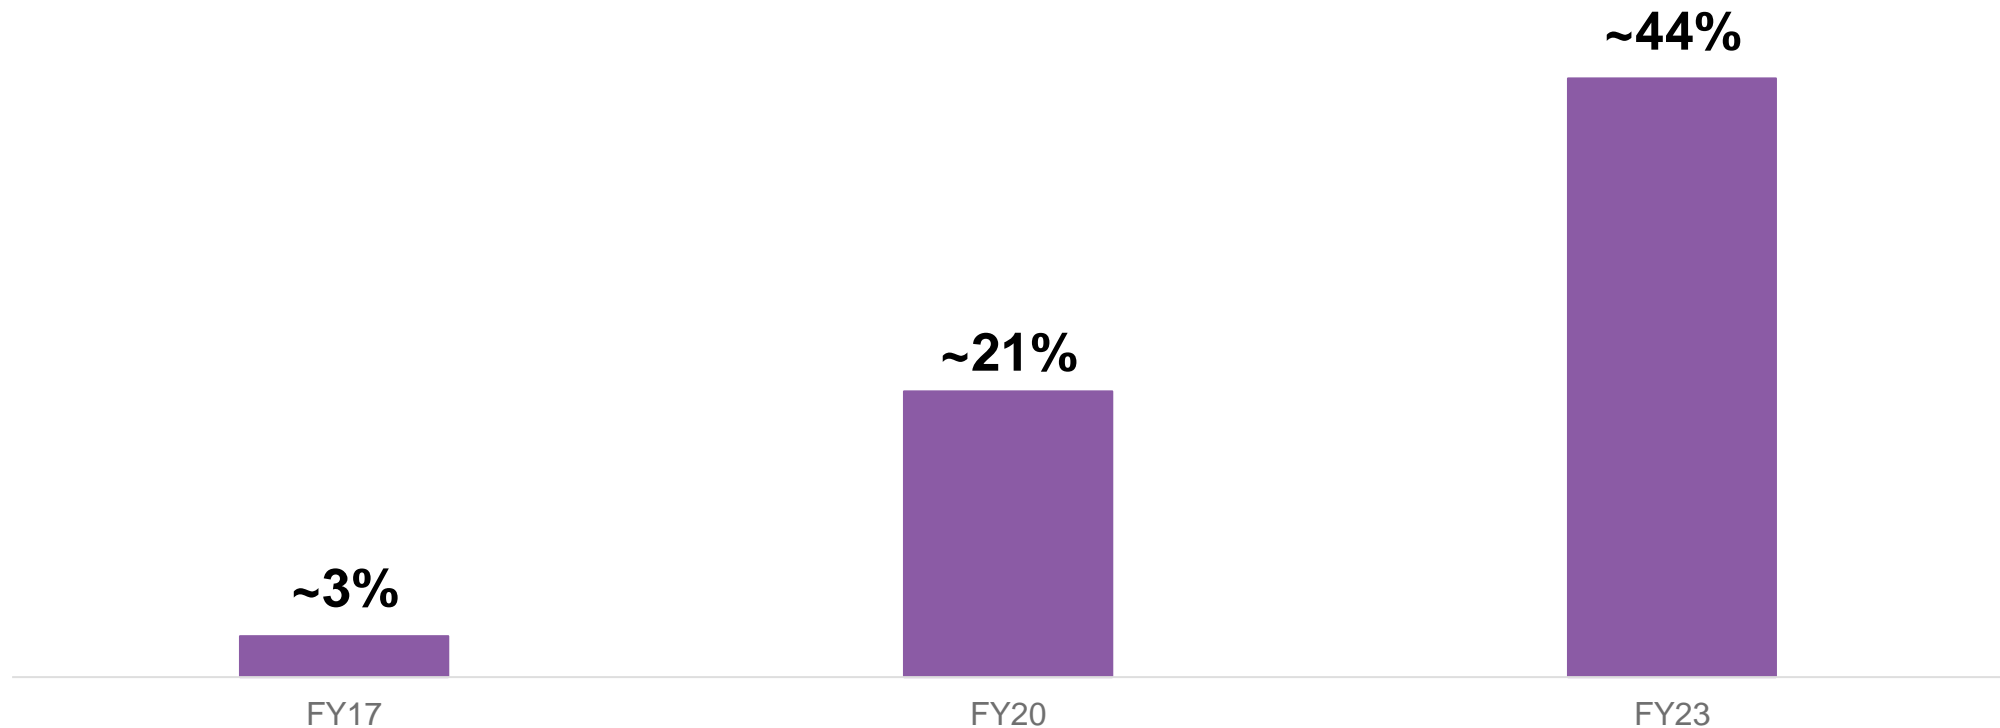

63%

of SaaS and Managed Services customers are also BIG-IP customers

The number of customers consuming multiple F5 product families is steadily increasing

% of F5's top-1000 customers with multiple F5 product families*

The number of customers consuming multiple F5 product families is steadily increasing

Understanding The Evolution Of Application Delivery

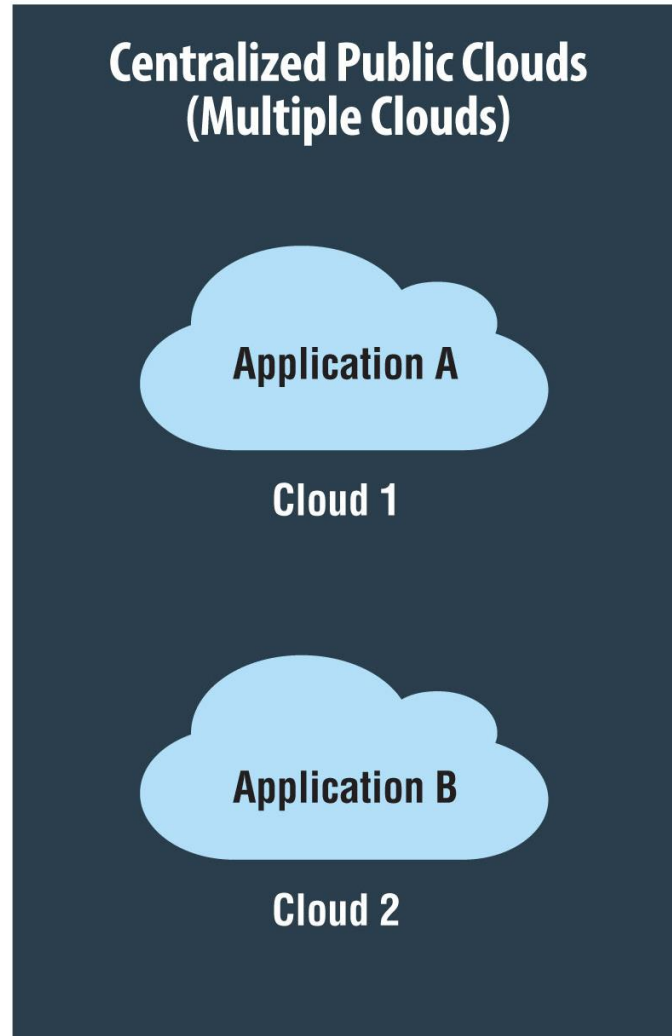

Presented by Zeus Kerravala
Principal Analyst

The Definition of Cloud is Changing

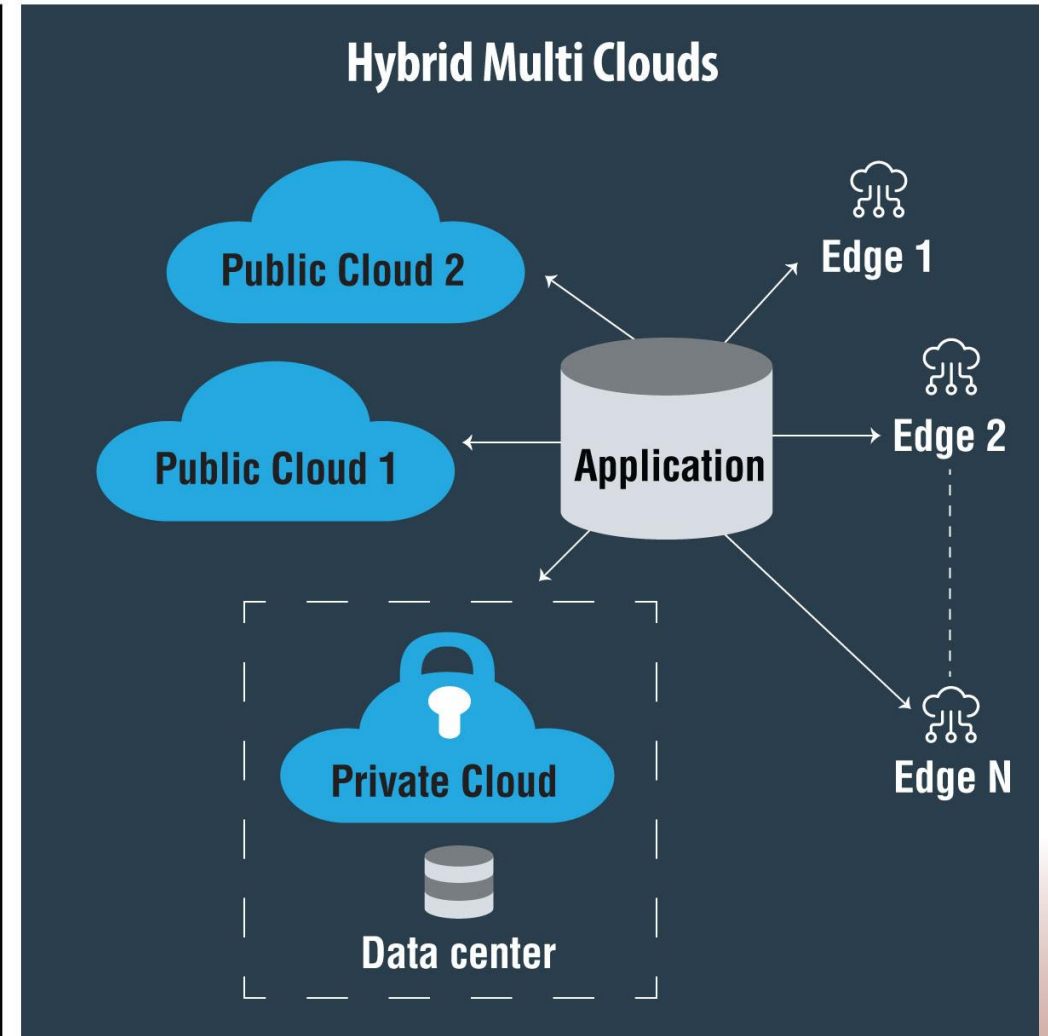

Phase 1

Phase 2

Phase 3

Defining Hybrid Multi-Cloud

- Comprised of public clouds, private clouds, edge locations
- Moves data and compute closer to the user
- Enables better, smarter analytics
- Microservices, containers based edges enables ephemeral services
- Dramatically increases app complexity

Cloud Spend is Shifting

Distributed Cloud Drives App Delivery Evolution

Hardware ADC

- Optimized for performance
- Deployed in traditional data centers and private clouds

Virtual ADC

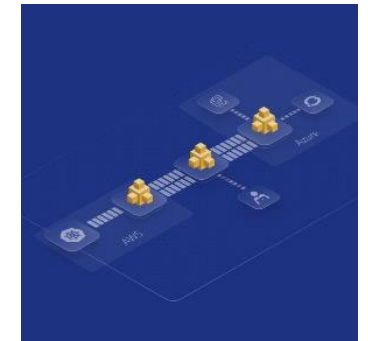

- Optimized for agility
- Deployed in traditional data centers and public clouds

Container ADC

- Cloud native deployments
- Ephemeral in nature

API level ADC

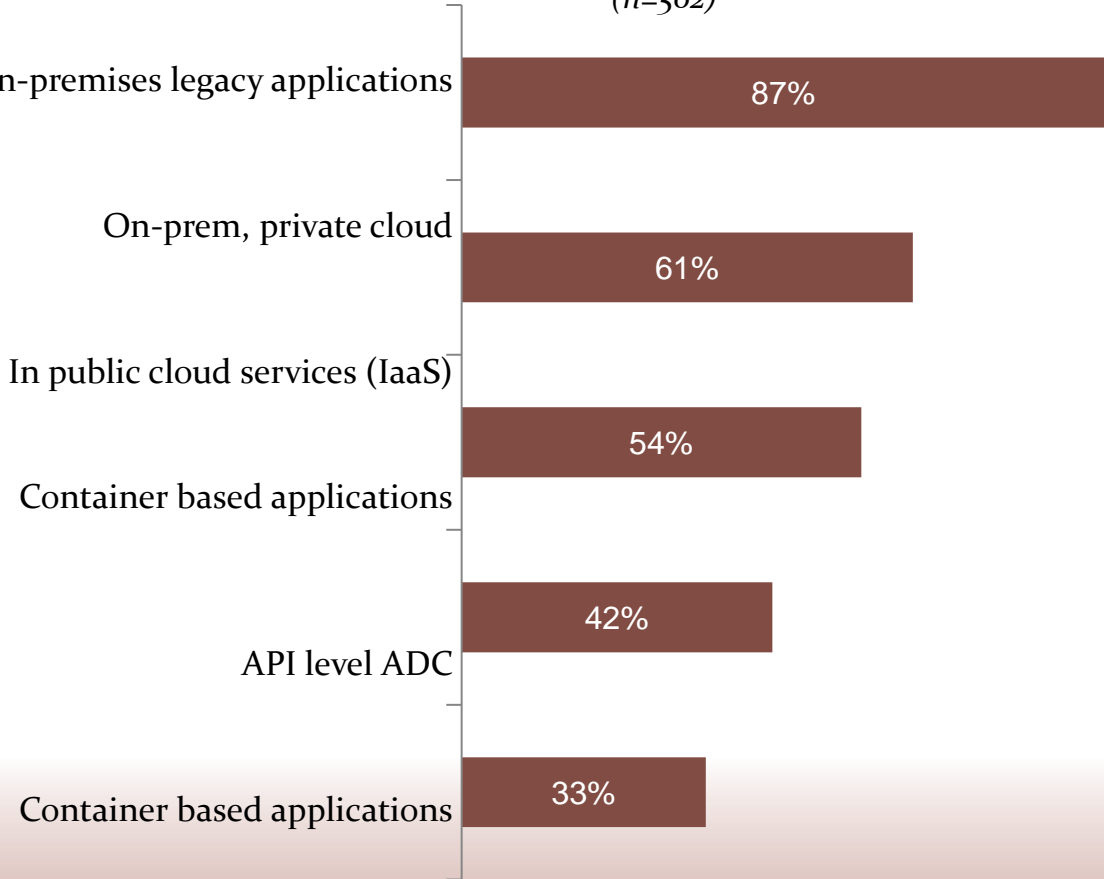

- Distributed environments
- Programmable

ADC Form Factors and Feature Set Continues to Expand

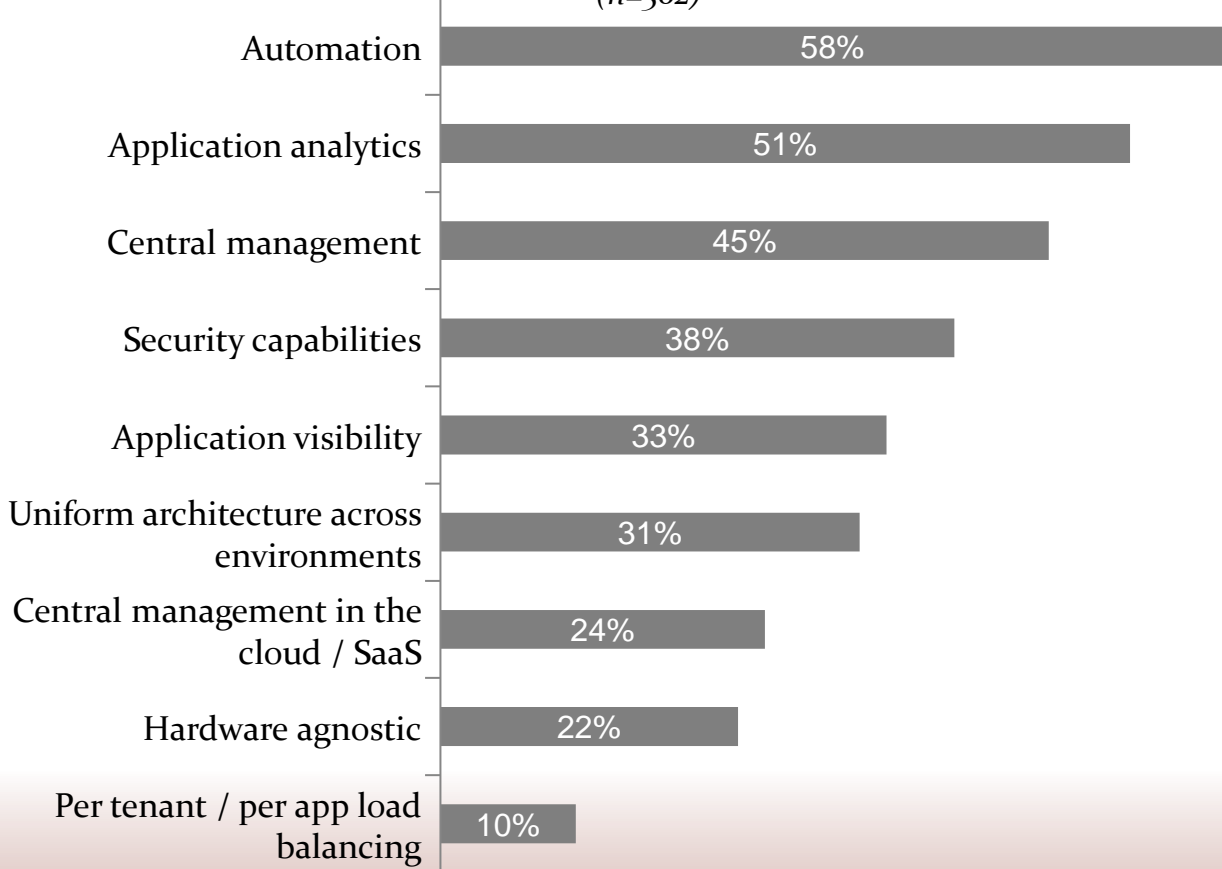

Currently Deploying ADCs

Total
(n=502)

ADC Features Most Appealing to Support Digital Initiatives

Total
(n=502)

Where are you currently deploying application delivery controllers (ADCs)?

The F5 Advantage

- The only “complete” ADC vendor – hardware, virtual, cloud, container, edge
- Can address all app services across distributed cloud environments
- Cloud providers cannot address hybrid-multicloud
- Consistent operational model
- Strong security portfolio
- Lack of viable competitors

Thank you!

Financial recap

Frank Pelzer
EVP & Chief Financial Officer

Takeaways from today's discussion

- 1 Our digital world is in crisis: the current multicloud “ball of fire” is untenable.
- 2 AI is an accelerant that will make the crisis exponentially worse.
- 3 To capitalize on this new reality, F5 invested early and transformed its portfolio.
- 4 F5's market opportunity is much larger and growing faster than 5 years ago.
- 5 F5's competitive position is stronger and more differentiated than ever before.
- 6 F5 is successfully executing land-and-expand motions across our portfolio.
- 7 F5 is positioned for sustainable revenue growth and committed to double-digit earnings growth.**

Three core financial pillars will drive our long-term success

Sustained mid-single-digit revenue growth

supported by our differentiated positioning in attractive end markets along with a durable, high margin global services business

Non-GAAP operating margin expansion

achieved through gross margin improvements and operating discipline

Strong capital return via share buybacks

of at least 50% of annual free cash flow

Driving double-digit non-GAAP EPS (CAGR)

Global Services delivers strong revenue and gross profit

Global Services Revenue
\$ in USD millions

Global Services Non-GAAP* Gross Profit
\$ in USD millions / % of revenue

Recurring revenue represents > 95% of services revenue

A few key operational metrics demonstrate the strength of Global Services

¹ Number of active obligations divided by aggregate potential obligations over the prior 7 years; software includes perpetual only, excludes term-based subscriptions, marketplace consumption, SaaS and managed services

We expect to deliver sustainable double-digit EPS growth

	FY23A	FY24 Outlook	Target Operating Model (FY25+)
Revenue	4% growth	Flat to low-single-digit decline	Mid-single-digit growth
Non-GAAP gross margin	81.5%	82% to 83%	83% to 84%
Non-GAAP operating margin	30.2%	33% to 34%	35%+
Effective tax rate	18.3%	21% to 22%	
Non-GAAP EPS	\$11.70 14.8% growth y/y	6% to 8% growth (≥10% growth on a tax neutral basis to FY23)	≥10% CAGR
Capital return as % of annual FCF	58%	At least 50% of annual FCF	At least 50% of annual FCF

*Free cash flow defined as cash flow from operations less capital expenditures

In the last three years, we have returned 83% of our free cash flow to shareholders via share repurchases

83%

of the last 3-years cash flow* used for buyback

- We are committed to using **at least 50% of annual free cash flow for share repurchases.**
- During FY23 we used 58% of our ~\$600M free cash flow for share repurchases.
- As of January 29, 2024, there was \$772 million remaining under our currently authorized stock repurchase program.

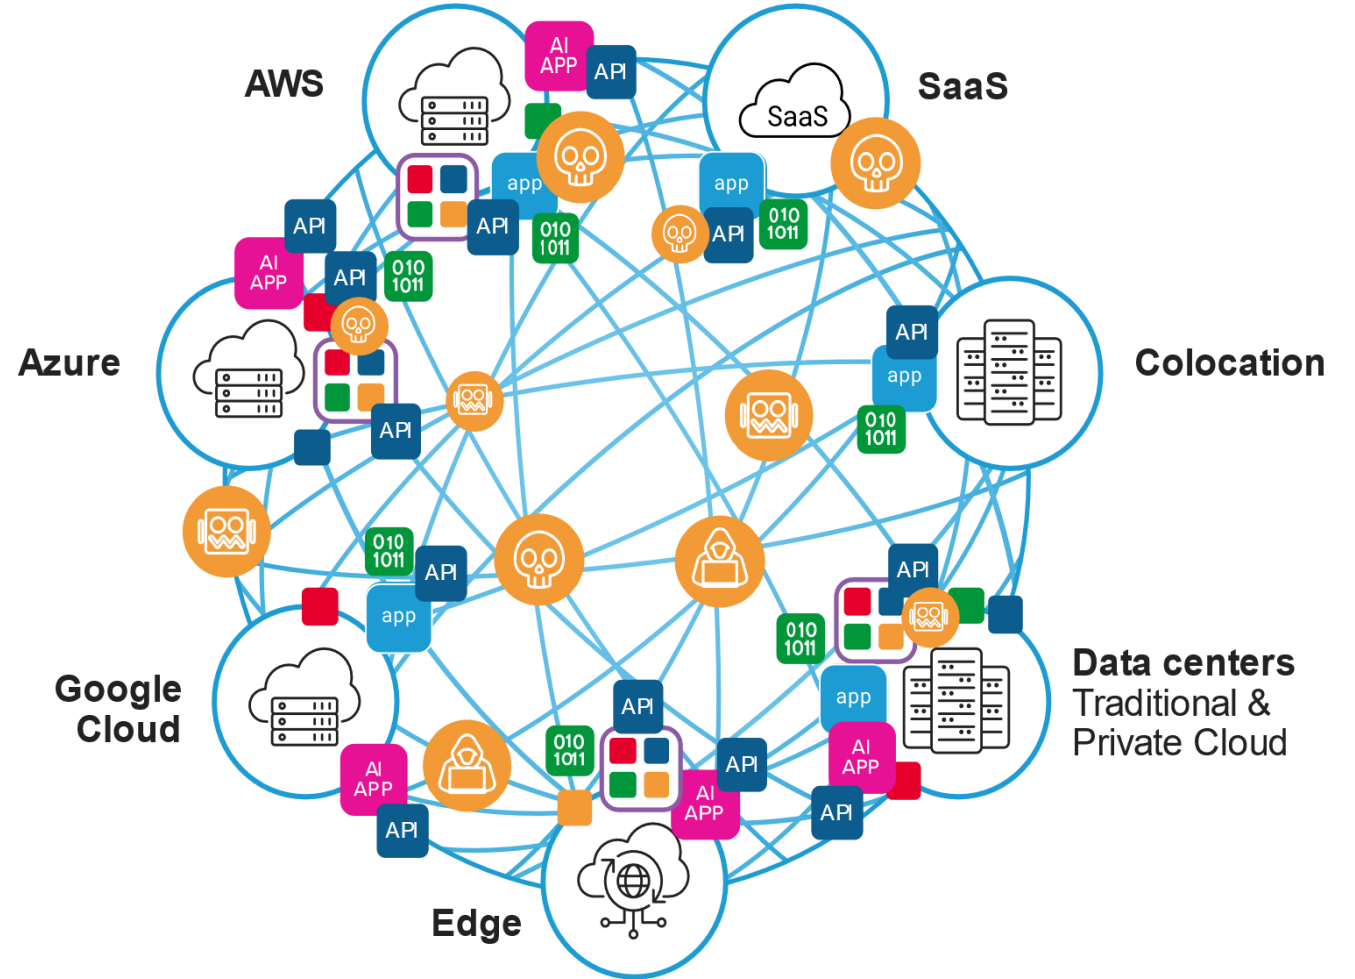

*Free cash flow defined as cash flow from operations less capital expenditures

Takeaways from today's discussion

- 1** Our digital world is in crisis: the current multicloud “ball of fire” is untenable.
- 2** AI is an accelerant that will make the crisis exponentially worse.
- 3** To capitalize on this new reality, F5 invested early and transformed its portfolio.
- 4** F5's market opportunity is much larger and growing faster than 5 years ago.
- 5** F5's competitive position is stronger and more differentiated than ever before.
- 6** F5 is successfully executing land-and-expand motions across our portfolio.
- 7** F5 is positioned for sustainable revenue growth and committed to double-digit earnings growth.

The only company that secures, delivers, and optimizes any app, any API, anywhere.
