» THE STRUCTURE OF THE AD PEPPER GROUP

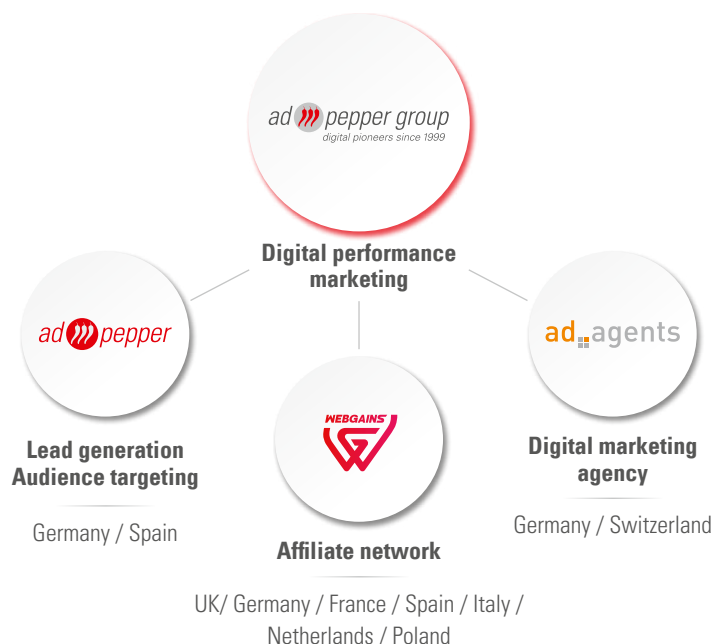

ad pepper media International N.V. is the holding company of one of Europe's leading international performance marketing groups. Founded in 1999, the ad pepper Group is one of the pioneers in the online marketing business. With eleven offices in Germany, Italy, France, Spain, Switzerland, Poland, the United Kingdom and the Netherlands, the ad pepper Group develops performance marketing solutions for its customers around the world.

The ad pepper Group operates in the highly dynamic digital commerce market, which is characterised by dynamic growth in both consumer and advertising expenditure. Channels such as social media, search, video and mobile – to name just a few – continue to expand their market share.

The ad pepper Group provides services for large corporations and major SMEs based in Europe and abroad. Our clients operate primarily in the “Trade & Consumer Goods”, “Financial Services”, “Telecommunications & Technology” and “Transport and Tourism” sectors. The ad pepper Group strives for long-term client relationships and has been working with some of its clients for more than a decade.

The ad pepper Group focuses on long-term value creation through organic growth in its existing businesses, while also evaluating inorganic growth opportunities through value-accretive acquisitions. The Group is divided into three reporting segments, which work in close cooperation with the holding company and operate independently in the marketplace: **ad pepper** (performance marketing company), **ad agents** (digital marketing agency) and **Webgains** (affiliate marketing network). The holding company assumes responsibility for the transfer of know-how between the segments, the strategic focus, as well as financing and liquidity as part of the overall governance and administration of the Group. The ad pepper Group's overall strategy is to support and strengthen each segment individually, as each business has its own distinctive culture, clients, product range and regional focus. All three business segments offer their clients performance-based solutions. This means that the advertiser only pays if there are measurable results (completion of specific actions). The most common models in performance-based marketing are: CPM (cost-per-mile), CPC (cost-per-click), CPL (cost-per-lead) and CPA (cost-per-acquisition).

The ad pepper Group also offers a broad range of services, such as consulting and the development of strategies for the use of digital technologies, the design, implementation and execution of digital marketing and communication solutions as well as consulting on digital media strategies and digital media technologies and tools. The ever-increasing importance of digital processes for businesses leads to an increase in the corresponding budgets, and the vast amounts of data thus generated require thorough analysis (preferably in real time). To be successful in the field of digital marketing, companies therefore need to develop competencies that go beyond an effective allocation of digital media spend across multiple channels and managing the respective campaigns. And they need help to achieve this. It is therefore not surprising that – in some areas of our business – the ad pepper Group is competing more and more with well-known strategy and IT consultancies that offer consulting services in the digital marketing space.

Internal control system

Revenue and profits (EBIT, EBITDA, gross profit) are some of the parameters that the ad pepper Group analyses monthly and compares with the original business plan to control and monitor the development of individual subsidiaries. In addition, further key performance indicators are calculated each month for control purposes and are used within all the operating companies of the ad pepper Group. External indicators are also regularly analysed for company management purposes. In addition, weekly jour fixes as well as regular shareholder meetings are held with the individual subsidiaries.

» MACROECONOMIC FRAMEWORK

According to IfW Kiel Institute for the World Economy (IfW) the German economy — still the most important market for the company - is stuck in stagnation. There are no signs of a significant economic recovery. Instead, there are increasing signs that the economic weakness is primarily structural rather than cyclical, which means there is little room for improvement in economic activity in the short term. There is also a risk of additional headwinds in 2025. If the new US administration follows through on its protectionist announcements, this will be a further drag on exports. Against this backdrop, IfW has lowered its forecast and expect GDP to stagnate in 2025. In 2026, economic output is expected to grow by 0.9 percent, whereby almost 0.3 percentage points are attributed to the additional number of working days. The economic weakness is leaving its mark on the labor market. The unemployment rate is expected to rise from 5.7percent in 2023 to 6 percent in 2024 and 6.3 percent in 2025. After a noticeable increase this year, real disposable household income will barely grow in the next two years. As a result, private consumption will not gain much momentum either, according to IfW.

As far as the global economy is concerned, IfW is forecasting an expansion of 3.1 percent in 2025. The outlook for 2026 has deteriorated and IfW recently reduced its forecast by 0.2 percentage points to 3.1 percent. The decline in inflation has slowed down of late, and the lack of a year-on-year fall in energy prices and the expected further decline in inflation towards the target of 2 percent is likely to be sluggish mainly due to the persistent rise in services

prices. There is a risk that monetary policy will remain restrictive for longer than currently expected. In addition, there are still major risks for the global economy from a possible escalation of geopolitical conflicts. Trade conflicts could also escalate further, but they could also turn out to be less severe than assumed, according to IfW.

Online advertising market

The following developments are expected for 2025:

- **e-commerce:** Global e-commerce revenue is forecast to reach around EUR 4,366 billion in 2025 (source: Digital Commerce 360);
- **Expanded use of AI:** AI is increasingly being used to provide personalised content and optimise marketing strategies (source: eMarketer);
- **Price comparison engines:** The use of price comparison sites is growing in importance as consumers increasingly look for the best deals, and companies use these platforms to attract new customers (source: Digital Commerce 360);
- **Sustainability and value-centric marketing:** Consumers are increasingly prioritising sustainability and ethical business practices, which prompts companies to adapt their marketing messages accordingly (source: Digital Commerce 360);
- **Affiliate marketing:** On Cyber Monday, the online sales day of the year 2024, social media influencers and other affiliate marketers contributed to around 20 percent of e-commerce sales, an increase of 7 percent compared to the previous year. Products promoted via affiliate links were six times more likely to result in a purchase than content without such links, underlining the importance of affiliate marketing as an effective channel for acquiring new customers (source: businessinsider.com);
- **Data privacy and transparency:** As data privacy concerns grow, consumers expect companies to be transparent about their data practices and to protect their personal information (source: El País);
- **Search engine advertising and Google:** Search engine advertising is a vital component of online marketing, with Google maintaining a dominant position in both search and search advertising (source: Think with Google);
- **Social media:** Platforms such as TikTok and Instagram continue to grow in importance, particularly through the integration of shopping features that enable direct purchases via social media (source: Wall Street Journal).

Cash flow from financing activities amounted to EUR -122k in the first quarter 2025 (Q1 2024: EUR -200k) and consists of cash outflow for leasing payments made in conjunction with capitalised right-of-use assets (Q1 2024: EUR 177k).

Net asset position

Total assets decreased by EUR 7,776k to EUR 40,594k compared with 31 December 2024 (EUR 48,370k). The decrease was mainly due to lower trade receivables and lower trade payables, which fell by EUR 3,445k to EUR 12,572k

(31 December 2024: EUR 16,018k) respectively by EUR 6,257k to EUR 14,353k (31 December 2024: EUR 20,610k). Mainly lower VAT liabilities resulted in a decrease in other liabilities by EUR 1,134k to EUR 1,299k (31 December 2024: EUR 2,433k). Financial liabilities amount to EUR 3,074k (31 December 2024: EUR 3,471), showing a decrease of EUR 398k mainly due to bonus payments made in the first quarter of 2025. Total non-current liabilities amount to EUR 776k (31 December 2024: EUR 853k), whereof EUR 763k (31 December 2024: EUR 840k) relate to long term-lease liabilities for capitalised right-of-use assets.

Total liabilities amount to EUR 20,096k (31 December 2024: EUR 27,767k). The Group still has no liabilities to banks. Total equity stands at EUR 20,498k (31 December 2024: EUR 20,603k). The equity ratio increased to 50 percent (31 December 2024: 43 percent).

5. Segment reporting according to IFRS 8

IFRS 8 requires an entity to report financial and descriptive information about its so-called “reportable segments”. Reportable segments are either operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity for which separate financial information is available that is evaluated regularly by the chief operating decision-maker for the purpose of allocating resources and assessing performance.

In general, financial information is required to be reported on the same basis as used internally to evaluate the operating segments (management approach). The information reported to the chief operating decision-maker for the purpose of resource allocation and assessment of segment performance is focused on the category of services delivered. For this reason, the Group reports segment information for the operating segments of “ad pepper” (lead, mail, banner), “Webgains” (affiliate marketing), “ad agents” (SEM/SEO), and for the non-operating “admin” (administration) segment. The accounting policies of the reportable segments correspond to the Group’s accounting policies described in Note [2] of the consolidated Annual Report for the year ended 31 December 2024.

The segment results are measured by EBIT and EBITDA for each segment without differences to IFRS. The segment results thus calculated are reported to the chief operating decision-maker for the purpose of allocating resources and assessing segment performance.

The “dealing at arm’s length” principle forms the basis of accounting for intersegment transactions.
