*Comprising of only Rx prescriptions from patients on Statutory Health Insurance (SHI / GKV).

Rx cohorts already outperform strong non-Rx cohorts in year 1 by a multiple.

Start Q1/2024 = Q0

- Main drivers for better cohort performance: active rate (share of returning customers after first order), average order value, order frequency.
- Metrics driven by high share of patients with chronic conditions.

Successful placement of new convertible bonds and buy-back of existing on 8 April.

Rationale:

- ▶ Refinance outstanding 2021 convertible bond, lengthening the maturity profile. Previous 7-year bond included a put option right for investors for repayment in January 2026.
- ▶ Pro-active balance sheet management to strengthen capital structure.
- ▶ Enhance long-term financial flexibility.
- ▶ New bond: EUR 300M, 7-year put-5, conversion price (rounded) EUR 174 and effective conversion price EUR 194, yearly coupon 1.75%, 110% premium redemption.

Outlook and guidance 2025.

Guidance, full-year 2025.

- ▶ Total sales growth in excess of 25%.
- ▶ Rx in Germany in excess of EUR 0.5 billion.
- ▶ Non-Rx total company growth in excess of 18%.

The market and industry remain dynamic. **As always, we will optimise growth and margins, and short and longer-term value creation**, and will anticipate on results and developments.

Mid- to longer-term guidance of adjusted EBITDA margin in excess of 8% unchanged.

Time to
ask questions.
